1. GENERAL DESCRIPTION OF THE PROGRAMME

1.1 Content of the programme

The Issuer issues credit linked securities (hereinafter also referred to as the "**Securities**") under its Euro 7,000,000,000 Credit Linked Securities Programme pursuant to German law. The establishment of the programme and the issuance of the Securities under the programme were duly authorised by the management board of HVB in the year 2011.

For this purpose, the Issuer has prepared and published this Base Prospectus for the Securities (the "**Base Prospectus**"). A detailed description of this Base Prospectus, in particular its structure and function, can be found in section "*3. General Description of the Base Prospectus*".

1.2 Overview of the Securities described in this Base Prospectus

The Securities may reference one or more Reference Entity(ies). The following product types are described in this Base Prospectus:

- Reference Entity is a single corporate (Product Type 1).

In this situation, you bear the credit risk of the Issuer and the credit risk of the corporate.

The payments of interest and redemption of the Securities depend on the respective credit risks.

- Reference Entity is a single sovereign (Product Type 2).

In this situation, you bear the credit risk of the Issuer and the credit risk of that sovereign.

The payments of interest and redemption of the Securities depend on the respective credit risks.

- Reference Entity is a single financial institution (Product Type 3).

In this situation, you bear the credit risk of the Issuer and the credit risk of this financial institution.

The payments of interest and redemption of the Securities depend on the respective credit risks.

- The Reference Entities are multiple corporates (Product Type 4).

In this situation, you bear the credit risk of the Issuer and the credit risk of each individual corporate.

1. General description of the programme

The payments of interest and redemption of the Securities depend on the respective credit risks. This means: A Credit Event can occur separately for each of the Reference Entities. The amount of the interest payments and redemption payments is reduced proportionately with each Credit Event.

- The Reference Entities are multiple sovereigns (Product Type 5).

In this event, you bear the credit risk of the Issuer and the credit risk of each individual sovereign.

The payments of interest and redemption of the Securities depend on the respective credit risks. This means: A Credit Event can occur separately for each of the Reference Entities. The amount of the interest payments and redemption payments is reduced proportionately with each Credit Event.

- The Reference Entities are multiple financial institutions (Product Type 6).

In this situation, you bear the credit risk of the Issuer and the credit risk of each individual financial institution.

The payments of interest and redemption of the Securities depend on the respective credit risks. This means: A Credit Event can occur separately for each of the Reference Entities. The amount of the interest payments and redemption payments is reduced proportionately with each Credit Event.

A more detailed description of how the Securities function can be found in section "6. Description of the Securities" on page 59 et seq. of this Base Prospectus. It is highly recommended to read the risk factors regarding the Issuer and the Securities in section "2. Risk Factors" on pages 9 et seq. thoroughly at the same time.

1.3 Further information about the Securities, public offering and trading

The Securities will be issued as debt instruments in bearer form (*Inhaberschuldverschreibungen*) pursuant to § 793 BGB. They will be represented by a global bearer note. No definitive notes will be issued. Therefore, you need a securities account at a bank to purchase the Securities.

It is intended to publicly offer the Securities to private clients, institutional investors and/or other qualified investors in Croatia, Luxembourg and Poland.

For Securities under this Base Prospectus an application can be made for admission to trading on a securities exchange and/or any other trading system in Croatia, Luxembourg and Poland.

You can find additional information regarding the Securities, the public offering and trading of the Securities in section "6. Description of the Securities" on page 59 et seq. of this Base Prospectus.

2. RISK FACTORS

The purchase of Credit Linked Securities described in this Base Prospectus involves risks.

Below you will find the risk factors which, in the view of the Issuer, are material when investing in the Securities. In addition, you should consider the risk factors described in the Registration Document dated 21 October 2019 (the "**Registration Document**") on pages 4 to 10, which are incorporated by reference herein. The risks can substantially reduce the value of the Securities. The risks may also make it difficult to sell the Securities.

The risks described below can occur individually or together. They may also amplify each other.

Negative effects on the value of the Securities are also possible:

- as a result of risks which are still unknown today,
- as a result of risks which are not considered material today.

The Securities are Credit Linked Securities. The payments of interest and redemption depend on the occurrence of a Credit Event with respect to one or more Reference Entity(ies).

A Credit Event is only considered to occur in the following circumstances: the Issuer has knowledge of the occurrence of a Credit Event with respect to a Reference Entity on the basis of publicly available information. All Requirements for the Occurrence of a Credit Event have to be fulfilled in relation to the relevant Reference Entity(ies).

Comment on this point: When these risk factors refer to a Credit Event with respect to a Reference Entity, the following applies: Only those Credit Events are meant for which all Requirements for the Occurrence of a Credit Event described in the Conditions are satisfied. This applies especially if the Credit Event triggers a reduction or deferral of the payments of interest and/or redemption of the Securities.

An investment in Credit Linked Securities involves substantial risks. **You bear the credit risk of the Issuer and the respective Reference Entity to which the Securities relate. Therefore, you can completely (total loss) or partially lose the amount you paid for the purchase.**

Comment on this point: The amount paid to purchase the Securities includes here and below all costs related to the purchase.

When deciding whether to purchase the Securities, you should consider all other information about the Securities and of the Issuer:

- Information in this Base Prospectus and in any supplement thereto.
- Information in the Registration Document dated 21 October 2019, the information of which is incorporated into this Base Prospectus by reference.

2. Risk Factors

- Information in the Final Terms of the Securities and the respectively attached summaries specific for the issue (together, the "**Final Terms**").

An investment in these Securities is only appropriate for you if you are experienced with Credit Linked Securities. Therefore, you should know all risks involved with purchasing the Securities. You should especially be aware of the risk of a potential loss up to and including a total loss.

2.1 Specific material risks related to the Issuer

The risk factors related to the Issuer included in the Registration Document of UniCredit Bank AG dated 21 October 2019 are hereby incorporated by reference into this Base Prospectus. A list setting out the information incorporated by reference is provided in Section "11.3 Information incorporated by reference into this Base Prospectus" below on page 379 et seq.

Potential investors should consider the information within the Section entitled "Risk Factors" of the Registration Document. This Section contains information on risks which may affect the assets, liabilities and the financial position of the Issuer and its ability to fulfil its obligations arising from the Securities.

2.2 Specific material risks related to the Securities

In the following section, the specific risk factors related to the Securities, which in the view of the Issuer are material, are described.

You should only invest in the Securities, if you understand the risks and characteristics of the Securities. To better understand these risks, you should study the description of the Securities in section "5. General information on the Securities" and section "6. Description of the Securities" and in addition, the relevant terms and conditions of the Securities in section "7. Terms and Conditions".

All Securities issued under this Base Prospectus share the characteristic, that the Security Holder may incur a **total loss** with respect to the capital amount spent.

Comment on this point: The amount paid to purchase the Securities includes here and below all costs related to the purchase.

Taking these risks and the risks described below into consideration, the Securities are only suitable for investors, who can properly assess these risks. You should be prepared to bear potential losses up to a **total loss** of the amount you paid for the purchase.

2.2.1 Specific risks resulting from the type of the Securities

(a) *Insolvency risk and resolution measures*

As a Security Holder, you bear the risk of the insolvency of the Issuer.

Insolvency risk means: The Issuer is unable, or only partially able to fulfil its obligations resulting from the Securities or it is unable to do so when they become due. This may occur when the Issuer becomes insolvent or overindebted.

In case insolvency proceedings are opened against the Issuer, you can only assert your claims pursuant to the German Insolvency Code (*Insolvenzordnung*). You will in that case receive an amount which is determined pursuant to the insolvency ratio (*Insolvenzquote*). This amount will regularly be nowhere near the amount you paid for the purchase of the Securities. An insolvency of the Issuer may even lead to the complete loss of the amount you paid for the purchase of the Securities.

You may become subject to resolution measures if the Issuer is failing or likely to fail.

Legal provisions included in

- the European Regulation (EU) No 806/2014 ("**SRM**"), and
- the German Restructuring and Resolution Act (*Sanierungs- und Abwicklungsgesetz – "SAG"*),

afford the authorised resolution authority the right to implement certain resolution measures against the Issuer. These measures can be detrimental to your interests.

The resolution authority is the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin"*). The resolution authority may, in certain cases which are set out in the SAG, convert your claims resulting from the Securities into shares in the Issuer (e.g. stocks). In that case, you bear the same risks as any shareholder of the Issuer. In such a situation, the price of the Issuer's shares will have regularly fallen dramatically beforehand. This means that you will most likely incur a loss under these circumstances.

The Nominal Amount of the Securities as well as any interest may be completely or partially reduced. In that case, you will receive a lower or no repayment of the capital amount spent for the purchase of the Securities. It is also possible that you receive lower or no interest payments.

The resolution authority may also amend the Conditions. It may for example postpone the redemption of the Securities. In that case, you will receive the redemption payments under the Securities at a later point in time than originally scheduled.

2. Risk Factors

Only in exceptional cases, the Issuer may be stabilised using public funds. Previously, all other resolution measures will have to have been exhausted. This also includes the conversion and reduction of the Issuer's obligations.

The prerequisites for a resolution are met under the SAG when the resolution authority determines that the Issuer is failing or is likely to fail.

In case the resolution authority exercises any resolution measures, you bear the risk of losing your claims resulting from the Securities. This pertains in particular to your claims for payment of the Redemption Amount or payment of interest or other payments under the Securities. This means that there is a substantial risk of loss for you, including a **risk of total loss**.

The German Credit Institution Reorganisation Act (*Kreditinstitute-Reorganisationsgesetz* – "**KredReorgG**") also enables the BaFin to intervene in claims of Security Holders resulting from the Securities. This will happen as part of a reorganisation proceeding. These measures may include the reduction of claims of the Security Holders resulting from the Securities as well as the suspension of payments. You bear the risk of losing your claims resulting from the Securities. This means that there is a substantial risk of loss for you, including a **risk of total loss**.

If there is a threat regarding the fulfilment of the obligations of the Issuer, BaFin can take certain measures. This includes a temporary decree which prohibits further payments by the Issuer. For the duration of the prohibition of payments, you cannot claim any payments resulting from the Securities from the Issuer.

(b) No deposit protection and no compensation scheme

The Obligations under the Securities are not secured or guaranteed by third parties or protected by any special measures.

The obligations of the Issuer resulting from the Securities are not secured. They are also not protected through any deposit protection or compensation scheme. There are also no other guarantees or assurances from a third party for the obligations of the Issuer.

Therefore in case of insolvency of the Issuer, the following applies: You are not protected from the complete loss of the amount you have paid for the purchase of the Securities.

2.2.2 Specific risks with regard to the payment of interest and redemption of the Securities

The specific risks with regard to the payment of interest and redemption of the Securities are described in this Section.

An investment in the Securities involves substantial risks for you. Upon the occurrence of a Credit Event, there is a substantial reduction in the redemption of the Securities. The amount which you then receive as redemption will be substantially lower than the amount you paid to

2. Risk Factors

purchase the Securities. Furthermore, you can suffer a loss of interest upon the occurrence of Credit Event.

The Final Terms of the Securities designate the Product Type to which the Securities relate.

- Reference Entity is a single corporate (Product Type 1).

In this situation, you bear the credit risk of the Issuer and the credit risk of the corporate.

The payments of interest and redemption of the Securities depend on the respective credit risks.

- Reference Entity is a single sovereign (Product Type 2).

In this situation, you bear the credit risk of the Issuer and the credit risk of that sovereign.

The payments of interest and redemption of the Securities depend on the respective credit risks.

- Reference Entity is a single financial institution (Product Type 3).

In this situation, you bear the credit risk of the Issuer and the credit risk of this financial institution.

The payments of interest and redemption of the Securities depend on the respective credit risks.

- The Reference Entities are multiple corporates (Product Type 4).

In this situation, you bear the credit risk of the Issuer and the credit risk of each individual corporate.

The payments of interest and redemption of the Securities depend on the respective credit risks. This means: A Credit Event can occur separately for each of the Reference Entities. The amount of the interest payments and redemption payments is reduced proportionately with each Credit Event.

- The Reference Entities are multiple sovereigns (Product Type 5).

In this event, you bear the credit risk of the Issuer and the credit risk of each individual sovereign.

The payments of interest and redemption of the Securities depend on the respective credit risks. This means: A Credit Event can occur separately for each of the Reference Entities. The amount of the interest payments and redemption payments is reduced proportionately with each Credit Event.

2. Risk Factors

- The Reference Entities are multiple financial institutions (Product Type 6).

In this situation, you bear the credit risk of the Issuer and the credit risk of each individual financial institution.

The payments of interest and redemption of the Securities depend on the respective credit risks. This means: A Credit Event can occur separately for each of the Reference Entities. The amount of the interest payments and redemption payments is reduced proportionately with each Credit Event.

(see on this point in detail, Section 2.2.1(b)).

If it appears that a Credit Event will occur, payments on the Securities can also be deferred. Both the interest as well as the redemption payments can take place at a date which is later than you expect.

Under certain circumstances, you can also suffer a total loss. This is e.g. the situation in the following circumstances.

The probability that the Reference Entity pays its Obligations is assessed by market participants to be zero (0). This means that also the value of the Reference Entity's bonds is valued at zero (0). The Credit Event Redemption Amount and, thus, the redemption of the Securities is then zero (0). You would suffer a complete loss of the purchase amount paid by you for the purchase of the Securities. If you have already received payments of interest, your total loss is reduced for the amount of these interest payments.

(a) Interest and Redemption depend on Credit Events

Upon acquiring the Securities, you bear the insolvency risk of the Issuer and the risk of the occurrence of a Credit Event with respect to the Reference Entity. This can have an effect on the redemption and interest for the Securities. A total loss of the amount you paid for the purchase is possible.

(A) Securities with one Reference Entity (Product Types 1, 2 and 3)

Your risk with respect to the Securities does not only consist of the fact that the Issuer cannot make payments when the Securities become due.

You also bear the risk that the credit standing of the Reference Entity deteriorates. This may have the result that the Reference Entity can no longer comply with its payment obligations. A so-called Credit Event may occur with regard to the Reference Entity. In this event, interest of the Securities will cease and the redemption amount of the Securities will be reduced and might even be zero.

2. Risk Factors

This means specifically the following:

Interest after the occurrence of a Credit Event

The interest of the Securities stops upon the occurrence of the Credit Event starting with the point in time set forth in the Final Terms. If the Credit Event occurs prior to the first Interest Payment Date, you may even not receive any interest for your Securities.

Redemption after the occurrence of a Credit Event

If a Credit Event has occurred with respect to a Reference Entity, this also has substantial effects on the redemption of your Securities. After the publication of the Credit Event Notice, the Nominal Amount of the Securities will not be repaid on the Scheduled Maturity Date. Instead, you will receive the Credit Event Redemption Amount on the Settlement Date. The Credit Event Redemption Amount is normally well below the Nominal Amount of the Securities and might even be zero (0). In the latter case, you will not receive any redemption. The Settlement Date can fall before or after the Scheduled Maturity Date.

The Credit Event Redemption Amount is determined and depends on how the Obligations of the Reference Entity are valued in ISDA auction proceedings or in the reasonable discretion of the Issuer.

Example:

Nominal Amount: EUR 10,000.

Assumption: ISDA auction proceedings take place.

The Credit Event Redemption Amount is determined on the basis of the Auction Final Price for the Obligations of the Reference Entity.

Auction Final Price: 8%

Credit Event Redemption Amount: EUR 800 (8% of EUR 10,000).

The Credit Event Redemption Amount (EUR 800) is paid to you as soon as it has been determined.

The Credit Event Redemption Amount can also be reduced as a result of deduction of a Swap Unwind Amount of the Issuer. The deduction of the Swap Unwind Amount can lead to a total loss of the amount paid for the purchase, although, the Securities have a positive Credit Event Redemption Amount.

Upon the occurrence of a Credit Event, the probability is large that you will only receive a small portion of the amount you paid for the purchase. You will also incur losses of interest with regard

to interest that has not yet been paid. This can lead to a **total loss** of the amount you paid for the purchase.

(B) Securities **with multiple Reference Entities (Product Types 4, 5 and 6)**

Your risk with respect to the Securities does not only consist of the fact that the Issuer cannot make payments when they become due.

You also bear the risk that the credit standing of one or more Reference Entities deteriorates. This may have the result that the respective Reference Entity can no longer comply with its payment obligations. A so-called Credit Event may occur with regard to the relevant Reference Entity. In this event, there can be a reduction of both the interest as well as the redemption of the Securities.

This means specifically the following:

Weighted Amount and Reduced Nominal Amount

In order to be able to evaluate the effective Credit Events in the case of Securities with multiple Reference Entities, you have to pay attention to the following:

A Weighted Amount applies for each Reference Entity in the case of Securities with multiple Reference Entities. Since the weightings of the individual Reference Entities are equal, the Weighted Amount of the individual Reference Entity corresponds to the weighted share in the Nominal Amount.

Example:

Nominal Amount: EUR 10,000.

In the case of two Reference Entities, the Weighted Amount for each Reference Entity is EUR 5,000.

In the case of four Reference Entities, the Weighted Amount attributable to each Reference Entity is EUR 2,500.

The Credit Event Redemption Amount can also be reduced by deduction of a Swap Unwind Amount of the Issuer. The deduction of the Swap Unwind Amount can lead to a total loss of the amount paid for the purchase, although the Securities have a positive Credit Event Redemption Amount.

After the occurrence of a Credit Event with respect to one or more Reference Entities, the following applies: The Reduced Nominal Amount is the basis for calculating the future interest as well as all repayable amounts. The Reduced Nominal Amount corresponds to the Nominal Amount minus the Weighted Amounts for those Reference Entities where a Credit Event has occurred.

Example:

Nominal Amount: EUR 10,000.

Assumption: A Credit Event has occurred at one of four Reference Entities.

The Reduced Nominal Amount is EUR 7,500 (EUR 10,000-EUR 2,500).

Interest after the occurrence of a Credit Event

The interest on the Securities is reduced after the occurrence of a Credit Event starting at the point in time designated in the Final Terms.

Example:

Nominal Amount: EUR 10,000. Redemption and Interest Payments on the Securities depend on the credit standing of four Reference Entities. The Weighted Amount for each Reference Entity is then EUR 2,500.

Assumption: Occurrence of a Credit Event for one Reference Entity.

Initially the Reduced Nominal Amount is determined: EUR 10,000 minus Weighted Amount for the Reference Entity affected by the Credit Event (EUR 2,500). The Reduced Nominal Amount is EUR 7,500.

The interest payments on the Interest Payment Dates after the occurrence of the Credit Event are determined on the basis of the Reduced Nominal Amount (EUR 7,500). They are accordingly reduced by 25%.

If a Credit Event occurs with respect to all Reference Entities prior to the first Interest Payment Date, you may even not receive any interest for your Securities.

Redemption after the occurrence of a Credit Event

If a Credit Event has occurred with respect to one or more Reference Entities, this also has substantial effects on the redemption of your Securities. After the publication of the Credit Event Notice, the Nominal Amount of the Securities will no longer be repaid on the Scheduled Maturity Date. Instead, you will receive the following payments:

- You receive the Reduced Nominal Amount on the Scheduled Maturity Date.
- You receive on the respective Settlement Date the Credit Event Redemption Amount for each Reference Entity affected by a Credit Event. The Credit Event Redemption Amount for the relevant Reference Entity is determined on the basis of its Weighted Amount. The respective Settlement Date can fall before or after the Scheduled Maturity Date. The Credit

2. Risk Factors

Event Redemption Amount is normally well below the Weighted Amount. It can even be valued at zero (0). The Credit Event Redemption Amount is determined according to how the Obligations of the Reference Entity are value in any ISDA auction proceedings or in the reasonable discretion of the Issuer.

Example:

Nominal Amount: EUR 10,000. Redemption and Interest Payments on the Securities depend on the credit standing of four Reference Entities. The Weighted Amount for each Reference Entity is then EUR 2,500.

Assumption: Occurrence of a Credit Event for one Reference Entity. ISDA auction proceedings take place.

Initially the Reduced Nominal Amount is determined: EUR 10,000 minus Weighted Amount for the Reference Entity affected by the Credit Event (EUR 2,500). The Reduced Nominal Amount is EUR 7,500.

The Credit Event Redemption Amount for the Weighted Amount for this affected Reference Entity is then determined. The basis for this is the Auction Final Price.

Auction Final Price: 8%

Credit Event Redemption Amount: EUR 200 (8% of EUR 2,500).

The Credit Event Redemption Amount (EUR 200) is paid to you as soon as it has been determined. You receive the Reduced Nominal Amount (EUR 7,500) on the Scheduled Maturity Date.

The Interest Payments on the Interest Payment Dates after the occurrence of the Credit Event are determined on the basis of the Reduced Nominal Amount (EUR 7,500). They are accordingly reduced by 25%.

The Credit Event Redemption Amount can also be additionally reduced by deduction of a Swap Unwind Amount of the Issuer. The deduction of the Swap Unwind Amount can also lead to a total loss of the amount paid for the purchase, although the Securities have a positive Credit Event Redemption Amount.

If a Credit Event occurs, you will very probably only receive a fraction of the amount you paid for the purchase. You will also incur interest losses with regard to the interest that has not yet been paid. This can lead to a **total loss** of the amount you paid for the purchase if a Credit Event occurs for all Reference Entities.

(b) Risks in connection with the determination of the Credit Event Redemption Amount

The Credit Event Redemption Amount is normally determined by reference to the results of an auction procedure conducted by ISDA. If there is no such auction, the Issuer makes the determination. The Issuer will select the lower value of the result of an auction or an obligation to be valued which has the lowest price, as applicable in the individual case. Your loss of principal after a Credit Event depends on these determinations of the Credit Event Redemption Amount. There can be delays in determining the Credit Event Redemption Amount.

The calculation of the Credit Event Redemption Amount to be paid after a Credit Event at a Reference Entity is made at the so-called Final Price. This corresponds normally to the Auction Final Price determined in the context of ISDA auction proceedings. The Auction Final Price can be lower than the market value of bonds of the Reference Entity on the secondary market for such bonds.

ISDA can carry out multiple ISDA auction proceedings with regard to a Reference Entity which is not a country. If ISDA does so, there are multiple Auction Final Prices available for determining the Final Price. You must be aware that the lowest of these Auction Final Prices is the Final Price for the purposes of the Securities. As a Security Holder, you have no right to be involved in the ISDA auction proceedings.

You should also be aware that the Issuer itself determines the necessary Final Price if no ISDA auction proceedings take place. In these situations, the Issuer proceeds as follows: The Issuer chooses, in its discretion, an obligation of the relevant Reference Entity which is supposed to be used as a Valuation Obligation. The prerequisite is that this obligation satisfies the specific features for Valuation Obligations set forth in the Conditions. If multiple Obligations have these features, the obligation of the Reference Entity with the lowest price (*cheapest to deliver*) is the Valuation Obligation.

The Credit Event Redemption Amount can also be reduced additionally by the deduction of a Swap Unwind Amount of the Issuer. The deduction of the Swap Unwind Amount can lead to a total loss of the amount paid for the purchase, although the Securities have a positive Credit Event Redemption Amount.

Please, also be aware that Obligations of the Reference Entity are also most likely completely or partially lost after a Credit Event. This means: The Obligations of the Reference Entity are no longer paid by the Reference Entity. Under these circumstances, these "distressed" Obligations are traded and valued with corresponding deductions. This means that they are traded at a price which is very substantially below the price of the Obligations prior to the Credit Event.

This means with regard to the Credit Event Redemption Amount of the Securities which you receive on the Settlement Date the following in the case ISDA auction proceedings take place:

2. Risk Factors

Assumption: The market participants submit ask and bid prices in the ISDA auction proceedings. This leads to a result in the auction of 8% of the nominal value of the Obligations of the Reference Entity. The Auction Final Price (and, thus, the Final Price for the calculation of the Credit Event Redemption Amount) is 8%.

This means that the Securities will no longer be redeemed at their Nominal Amount of EUR 10,000 and instead will only be redeemed at EUR 800.

Assumption: The participants in the ISDA auction proceedings value the probability that the Reference Entity will pay its Obligations at zero (0). In this event, the Credit Event Redemption Amount is EUR 0. You then retain only the interest that has been paid to you on the Interest Payment Dates. If no interest was paid on the Securities prior to the occurrence of the Credit Event, you even suffer a **total loss**.

Therefore, you bear the following risk: After the occurrence of a Credit Event, you receive a Credit Event Redemption Amount. Experience shows that this is well below 100% of the Nominal Amount of your Note. In our example, this is EUR 800 instead of EUR 10,000. Under certain circumstances, you can even incur a total loss.

Please also be aware that an obligation of the Reference Entity can exist in a currency other than the Euro. This currency risk can have a negative effect in ISDA auction proceedings or when the Issuer determines the Final Price.

In the case of a country or a financial institution as the Reference Entity, the Final Terms also provide as follows for determining the Credit Event Redemption Amount:

Assets will be used which replace Obligations of the Reference Entity after a restructuring or Governmental Intervention as a result of conversion or exchange. This also applies if the Credit Event mentioned in the Credit Event Notice is a different Credit Event, for example, a Failure to Pay. The value of these assets can be substantially below the value of other Obligations of the Reference Entity and can even be zero (0).

The determination of the Final Price may in case of a financial institution also be based on so called senior non-preferred debt obligations, which rank in case of a bankruptcy after protected deposits and unsecured senior liabilities of the Reference Entity. You should take into account that the price of a senior non-preferred debt obligation may be substantially lower than the market value of other senior liabilities of the Reference Entity.

You should be aware that the date on which the Credit Event Redemption Amount is determined can be a long time after the Credit Event. This delay can even be months. The time of payment of the Credit Event Redemption Amount to you is accordingly deferred. The Issuer is not required to pay additional interest to you for the period of the delay.

(c) Deferral of payments upon suspicion of the occurrence of a Credit Event

It can take a long time until the Issuer has determined a Credit Event. Therefore, you bear the risk that payments on the Securities will be deferred by the Issuer. The deferral of payments can last up to one year and five Banking Days.

This can affect both interest as well as the redemption of the Securities. Deferrals are possible if it is not clear at the time of payment whether the Requirements for the Occurrence of a Credit Event exist.

Example:

- The Issuer is waiting to see the resolution of the ISDA Determination Committee with regard to the existence of a Credit Event.
- Where the Credit Event Repudiation/Moratorium applies: A deferral in payment occurs when a Credit Event threatens on the basis of a corresponding announcement. The determinative, outstanding payment obligation of the Reference Entity, however, is not yet due and could still be fulfilled.
- When considering a grace period in the case of a Credit Event Failure to Pay: A deferral of payment occurs when a Credit Event threatens on the basis of a corresponding failure to pay. The determinative, outstanding payment obligation of the Reference Entity is due, but it still could be fulfilled.

If the Requirements for a Payment Deferral exist, the Issuer has the following possibilities: The Issuer can pay the Interest Amount becoming due after the relevant Interest Payment Date, and the Issuer can defer the redemption of the Nominal Amount.

Deferred payments of interest occur at the latest on the Deferred Interest Payment Date or the Deferred Redemption Date. The deferred redemption of the Nominal Amount occurs at the latest on the Deferred Redemption Date. The Issuer is not required to pay to you interest or other amounts for the period of the deferral.

(d) Risks with regard to the scheduled interest payments when a Credit Event does not occur

You have the risk during the term of the Securities that the value of the Securities will fall when market interest rates increase.

In the case of Securities with a fixed Interest Rate or a set-up Interest Rate, you bear the following risk: The value of the Securities can fall as a result of changes in the market interest rate. The current market interest rate in the capital market changes continuously. If the market interest rate in the capital market increases, the value of the Securities falls. If you sell the Securities in a phase of increasing market interest rates, the proceeds from the sale can be well below the Nomi-

2. Risk Factors

nal Amount of the Securities. If the price at which you sell the Securities is below the amount you have paid for the purchase, you incur a loss.

You have the risk during the term of the Securities that levels of Reference Rates of the Securities fall or that Reference Rates change or disappear.

In the case of Securities with a floating Interest Rate linked to a Reference Rate you bear the following risks:

Fluctuations in level

You can receive lower payments of interest under the Securities if the value of the Reference Rate has developed adversely.

You are particularly exposed to the risk of fluctuating interest rates. Fluctuating interest rates make it impossible to determine in advance the return of Securities with floating interest rates.

The development of the Reference Rate is influenced by a large number of factors such as:

- supply and demand on the international money and capital markets,
- economic and macro-economic influences,
- measures taken by central banks and governments, as well as
- politically motivated factors.

Risks related to the cessation of publication of the Reference Rate

The final cessation of the publication of the Reference Rate may lead to an adjustment of the Conditions of the Securities. The Securities can also be terminated.

It cannot be ruled out that publication of a Reference Rate will be discontinued. In particular, regulatory requirements (in particular in respect to the regulation of so-called Benchmarks) may result in a Reference Rate not being available for the entire term of the Securities.

Such an event can entitle the Issuer or the Calculation Agent in particular to extraordinarily terminate the Securities (with respect to the associated risks see section "2.2.4(b) Risk of early termination").

Risks related to the calculation of the Reference Rate

Changes, errors or manipulation in the calculation of a Reference Rate may have a material adverse effect for you with respect to the Reference Rate.

The rules for a Reference Rate can be subject to changes from time to time. This may be the case, for example, due to regulatory requirements (in particular for the regulation of so-called Bench-

2. Risk Factors

marks). In particular, such changes may result in the method by which the Reference Rate is determined no longer being comparable to the method used before the adjustment. Such a change could, for example, affect the source of so-called input data. A change to the rules for a Reference Rate may have a substantial adverse effect for you with regard to the Reference Rate.

Moreover, it cannot be excluded that the determination or disclosure of Reference Rates may be subject to inaccuracies or even manipulation by the persons responsible for their determination and/or disclosure or by other market participants. Such inaccuracies or manipulations are difficult or impossible to detect for third parties and may have a material adverse effect on the price of the Reference Rate for you.

Regulation of benchmarks

There is the risk that the regulation of Reference Rates leads to an adjustment of the Conditions of the Securities. Early termination of the Securities is also possible.

An Underlying or the Reference Rate may be a so-called benchmark (the "**Benchmark**") within the meaning of the Regulation (EU) 2016/1011 (the "**Benchmark Regulation**").

According to the Benchmark Regulation, the Issuer may use a Benchmark as the Underlying or Reference Rate of the Securities only if its administrator (the "**Benchmark Administrator**") or the Benchmark itself is entered in a public register. Exception: The Transitional Period under the Benchmark Regulation has not yet expired. The "**Transitional Period**" ends on 31 December 2019.

This means: There is a risk that a Benchmark for which the aforementioned condition has not yet been met or is no longer met when a Security is issued may no longer be used as its Underlying or Reference Rate after the end of the Transitional Period.

Moreover, the Benchmark Regulation may make it necessary to modify the methodology or other provisions of a Benchmark in order to allow it to continue to be provided or used. As a result of such a measure, the Benchmark may change significantly. Such a change may, in particular, have an adverse effect on the risk profile of the Benchmark and its future performance.

The Benchmark Regulation leads to an increase in the regulatory requirements and controls with regard to the Benchmarks. This may increase the costs and risks associated with the management of such Benchmarks. Other currently unforeseeable effects on the calculation of Benchmark are also conceivable. This may, for example, include the discontinuation of the calculation and publication of a Benchmark as a consequence of the Benchmark Regulation.

The impermissibility of using a Benchmark, the cessation of the Benchmark or a material change in its calculation or publication can entitle the Issuer to adjustments to the Conditions of the Security (see section "B.3.c) Risks arising from Adjustments to the Conditions of the Securities"). In this case in particular the original Reference Rate may be replaced by another Reference Rate.

2. Risk Factors

Early termination of the Securities is also possible (see section "2.2.4(b) Risk of early termination").

Furthermore, a termination of the listing or trading of the Securities on an exchange cannot be excluded. You could be subject in this situation to the risk of lack of trading or trading with limited liquidity in the Securities (see section "2.2.5(b) Liquidity risk").

(e) Foreign currency risk

In the case of Securities issued in foreign currencies, there is a foreign currency risk.

Currency exchange rates in the international currency markets are determined by supply and demand. Supply and demand can be influenced by the following factors, among others: macro-economic factors, political factors (including currency controls and restrictions), actions by central banks and governmental agencies as well as speculation by the participants in the market.

If the Securities have been issued in a currency ("**Foreign Currency**"), other than the currency of the jurisdiction where you are domiciled or where you seek to receive funds, you are subject to the risk of strongly fluctuating currency exchange rates, in addition to the other risks. This applies both during the term of the Securities as well as at the end of the term.

The foreign currency risk exists especially in the following situation: Your account to which the amounts of money paid under the Securities are credited is maintained in a currency that is different from the currency of the Securities. The conversion of the relevant amount into the currency of the account can be at a disadvantageous currency exchange rate at the relevant point in time.

Currencies can also be devalued or replaced by another currency, the development of which cannot be foreseen.

(f) No recourse against the Reference Entity

The Securities do not establish any legal relationship between you and the respective Reference Entity. The Securities are neither guaranteed nor otherwise secured by the respective Reference Entity.

If a Credit Event occurs, you have no claims for damages or other claims against the relevant Reference Entity. You also do not benefit from any positive developments at the relevant Reference Entity after the occurrence of a Credit Event. Especially the consequences from the occurrence of a Credit Event described in the Conditions cannot be reversed. In the case of a Restructuring, you do not participate in the restructuring process. You are especially not entitled to completely or partially challenge the restructuring process. An investment in the Securities possibly involves a higher risk than e.g. a direct investment in bonds of the Reference Entity.

2.2.3 Risks with regard to the Reference Entity

(A) Credit risk

As a Security Holder, you bear the credit risk of the Reference Entity.

An investment in the Securities involves substantial risks. The reason: You **additionally** bear the credit risk of the Reference Entity(ies). The risk under the Securities is accordingly substantially higher than in the case of a comparable investment in fixed or floating interest securities. The interest and redemption of the Securities depends on whether a Credit Event occurs at one or more Reference Entity(ies).

Credit Events, from the point of view of the creditors of the respective Reference Entity, designate the occurrence or the threatening occurrence of various economically adverse circumstances. They are accordingly an expression of a material, negative development of the credit standing of the Reference Entity.

There are various Credit Events for the Reference Entity. They include:

- If a company is the Reference Entity:
 - the Insolvency of the Reference Entity,
 - the Failure to Pay an Obligation of the Reference Entity, or
 - the Restructuring of an Obligation.

- If a country is the Reference Entity:
 - the Failure to Pay an Obligation,
 - the Reputation/Moratorium of an Obligation, or
 - the Restructuring of an Obligation.

- If a financial institution is the Reference Entity:
 - the Insolvency of the Reference Entity,
 - the Failure to Pay and the Obligation by the Reference Entity,
 - the Restructuring of an Obligation, or
 - Governmental Intervention related to the substance of Obligations of the Reference Entity.

Please note that a change in currency or the exit from the Euro can constitute a Credit Event for a Reference Entity. That is the case if the change in currency reduces the duties of the Reference Entity under its Obligations.

2. Risk Factors

A Credit Event is determinative with regard to the Securities if the Issuer publishes a corresponding Credit Event Notice. The Conditions establish the periods of time for the occurrence of a Credit Event and the publication of a Credit Event Notice by the Issuer.

After the occurrence of a Credit Event with regard to the Reference Entity, subsequent positive (economic) developments of the Reference Entity do not benefit you. Especially the consequences of the occurrence of a Credit Event cannot be reversed. You should accordingly assume the following: An investment in the Securities can involve a higher risk than e.g. a direct investment in bonds of the Reference Entity.

Furthermore, an event can occur which has a negative effect on the credit standing of the relevant Reference Entity. Even if this does not lead to the occurrence of a Credit Event, the price of the Securities can decrease. If you sell your Securities at this point in time in the secondary market, you can incur a substantial loss. The sales proceeds you realize can then be substantially lower than the amount you paid to purchase the Securities.

(B) Complex analysis

The analysis of the risks related to the Securities is complex. It can especially be difficult for you to assess the probability of the occurrence of a Credit Event.

The risks related to the respective Reference Entity and the analysis of the probability of the occurrence of a Credit Event are complex. They are not equivalent with investment decisions in other Securities of the Issuer which are not Credit Linked or in other companies or financial institutions.

The trading and the pricing of the Securities depend on the trading and the pricing of the credit risks of the Reference Entity. Trading and pricing these credit risks occur in markets which are not very transparent and lie outside the exchanges.

It is also possible that not all bonds or Obligations of the Reference Entity are traded on exchanges. This can make it difficult to analyse the probability of the occurrence of a Credit Event at the Reference Entity.

You should, therefore, consider that all information for analysing the credit risks may not be complete or publicly available on a specific date. In order to assess the credit risk of the respective Reference Entity, you should consider and analyse the following information. You should base your investment decision on the following:

- all available public information about the capacity and the financial situation of the Reference Entity, and
- the published financial information or the published government debt.

2. Risk Factors

The probability that a Credit Event occurs with regard to one or more Reference Entities depends, among other aspects, on the following factors:

- the financial position and earning situation and other key data of the relevant Reference Entity,
- the general economy,
- the position in specific markets,
- political events, developments or tendencies in certain industries, or
- changes in the applicable interest rates.

You should, therefore, thoroughly examine the Reference Entity(ies). You should especially conduct your own research and make your own analyses with regard to the credit standing of the Reference Entity(ies). You should also analyze the probability of the occurrence of a Credit Event with regard to the Reference Entity(ies).

You should be aware that the financial and earnings position of Reference Entities or government debt by governmental Reference Entities can change. The other above mentioned parameters can also experience adverse changes during the term of the Securities. You should consider that information for analysing credit risks is not necessarily completely or publicly available on a specific date.

(C) Risks resulting from laws governing recovery and resolutions in the case of Product Type 3 and Product Type 6

The content and scope of the applicable national legislation on recovery and resolutions of financial institutions can increase the probability of the occurrence of a Credit Event.

The law applicable to a financial institution governing recovery and resolutions can permit substantial influence and impact on the Obligations of a financial institution. Measures including a reduction of debt are conceivable. All these measures can possibly occur in advance of any Insolvency. Especially measures can be carried out if the financial institution threatens to fail or, for example, if the loss of the banking license must be feared.

In the case of Securities related to financial institutions, you must accordingly particularly pay attention to the fact that they depend to a high degree on the content and scope of the applicable national legislation on recovery and resolutions.

The Credit Event may in case of a financial institution occur with respect to a so called senior non-preferred debt instrument if the senior non-preferred status is specified for the respective Reference Obligation. Such senior non-preferred debt instruments rank in bankruptcy proceedings after other unsecured senior liabilities of a financial institution. Accordingly, these senior

non-preferred debt instruments will become subject to resolution action before other unsecured senior liabilities. Potential investors therefore bear the risk of a Credit Event even if other senior liabilities of the financial institution are (still) not affected by a Credit Event.

(D) Concentration risks in the case of Product Types 4, 5 and 6

In the case of a concentration of the Reference Entities in one industry, the risk of a deterioration of the credit standing of all Reference Entities is increased.

You should pay attention to the fact that in the case of Securities related to multiple Reference Entities that the credit standing of each Reference Entity can deteriorate. The deterioration of the credit standing of the Reference Entity leads to a decrease in the price for the affected Note. In the case of a concentration of the Reference Entities in one industry, the risk for a deterioration of the credit standing of all Reference Entities is higher. This is due to the fact that the credit standing of all Reference Entities can deteriorate if the parameters for the relevant industry deteriorate. This also applies if the Reference Entities are subject to similar financial risks or other similar risks.

(E) Risks in the case of Reference Entities in emerging countries

Securities which relate to Reference Entities in emerging countries involve additional risks.

The Reference Entities under the Securities can also be an emerging country or a developing country or a company in such a country. Such Securities involve additional risks. They can be of a legal, political or economic nature (including a collapse of the currency).

There are substantial legal, economic and political risks in the case of emerging countries and developing countries. These risks can be greater than for EU Member States or other industrialized countries. The risks include the unstable political or economic situation, increased inflation as well as higher currency risks. There can also be less available public information about Reference Entities in emerging countries and developing countries. Securities markets in emerging countries can have a substantially lower trading volume than in developed markets. The securities markets may possibly be less liquid than developed securities markets in industrialized countries. Experience shows that the prices in such securities markets fluctuate more strongly.

(F) No research and guarantees of the Issuer; no information by the Issuer

You bear the risk that you will not be fully informed about the Reference Entity. Not all information about the Reference Entity is publicly available.

The Issuer does not conduct any research with regard to the respective Reference Entity. You cannot rely on events being published with regard to the Reference Entity. Especially events which have occurred (shortly) before issuing the Securities are not necessarily already published in publicly available sources.

2. Risk Factors

The Issuer does not give any warranties or guarantees with regard to the credit standing of the Reference Entity. Therefore, please pay attention to the following: The selection of a Reference Entity for the Securities is not based on the assessments by the Issuer with regard to the future development of the credit standing of that Reference Entity.

The Issuer also may not have public information with regard to the respective Reference Entity during the term of the Securities. The Issuer is not required to disclose this information to you. This also applies if the Issuer is not required to treat the information as confidential. The Issuer is also not required to keep you continuously informed about the economic development of the Reference Entity. This also applies for information which indicates the occurrence of a Credit Event or a succession in right for the respective Reference Entity.

Therefore, there is a risk that the Issuer has better information than you with regard to the Reference Entity.

(G) Development of the credit standing of a Reference Entity

You bear the risk that the future economic development of the Reference Entity will deteriorate.

Conclusions about the future (economic) development of the respective Reference Entity cannot be drawn from the past (economic) development of that Reference Entity. This also applies for the past development of comparable companies, financial institutions or countries. Therefore, you have uncertainty with regard to the future (economic) development of the respective Reference Entity. Statistics about failures in the past may not take into account the events which constitute Credit Events for your Securities.

(H) Rating information about Reference Entities

You bear the risk that the ratings for the Reference Entity deteriorate.

Ratings are produced by recognized rating agencies on the basis of public and non-public information about a Reference Entity. Published ratings about a Reference Entity, despite their widespread use, represent only a condensed variable for the valuation. A rating of a Reference Entity reflects the Reference Entity's credit standing. The rating constitutes an assessment of the possibilities for the Reference Entity to comply with its payment obligations in the future. Any change in the rating of a Reference Entity can have an adverse effect on the value of the Securities.

2.2.4 Specific further risks resulting from the terms of the Securities

(a) *Changes with regard to the Reference Entities*

You bear the risk that the Reference Entity(ies) might change during the term of the Securities. The credit standing of a new Reference Entity can be worse than the credit standing for the original Reference Entity.

2. Risk Factors

The Reference Entity or the composition of the Reference Entities in the case of Product Type 4, 5 or 6 can change. This is especially the situation if a Reference Entity is replaced by a Successor. Such a replacement takes effect upon publication of a corresponding Succession Notice by the Issuer.

In the case of a Succession in right, you bear the risk that the credit standing of the new Reference Entity(ies) will be worse. Your Securities can, therefore, suffer a loss of value. The risk of the occurrence of a Credit Event by the new Reference Entity(ies) can also increase. You bear this risk as the Security Holder. Therefore, it is possible that you may suffer economic harm as a result of a change in the Reference Entity(ies).

Specifically:

(A) Securities with one Reference Entity (Product Types 1, 2 and 3)

In the case of Product Types 1, 2 or 3, the Issuer is entitled as follows:

- In the case of Securities with one Reference Entity, the Issuer can replace the Reference Entity in the case of a Succession in right by one or more Successors. The Final Terms contain provisions about selecting the Successor(s).

Or

- The Issuer can give extraordinary notice of termination of the Securities if there are more than one Successor. The Issuer can also give extraordinary notice of termination if the Transaction Type for the Reference Entity changes. This is the situation under the following conditions: The Successor has its corporate headquarters in a country which is different than for the original Reference Entity. Therefore, the Transaction Type for the new Reference Entity changes according to the trading standards of ISDA. Example: A German company becomes an American company as a result of a merger. See with regard to the risks in the case of an extraordinary notice of termination, Section 2.2.2 (f).

You now bear the risk that a Credit Event can occur in the future with regard to the Successor as the new Reference Entity. If the Issuer determines more than one Successor to the Reference Entity, each of the selected Successors becomes a Reference Entity. You now bear the risk that a Credit Event can occur in the future with regard to each Successor. The Securities now relate proportionately to each Successor.

(B) Securities with multiple Reference Entities (Product Types 4, 5 and 6)

In the case of Product Types 4, 5 and 6, the Issuer is entitled as follows:

- In the case of Securities with multiple Reference Entities, the Issuer can replace a Reference Entity in the case of a Succession in right by one or more Successors. The Final Terms contain provisions about selecting the Successor(s).

Or

- The Issuer can give extraordinary notice of termination of the Securities if there are more than one Successor. The Issuer can also give extraordinary notice of termination if the Transaction Type for the Reference Entity changes. This is the situation under the following conditions: The Successor has its corporate headquarters in a country which is different than for the original Reference Entity. Therefore, the Transaction Type for the new Reference Entity changes according to the trading standards of ISDA. Example: A German company becomes an American company as a result of a merger. See with regard to the risks in the case of an extraordinary notice of termination, Section 2.2.2 (f).

You now bear the risk that a Credit Event can occur in the future with regard to the Successor as the new Reference Entity. If the Issuer determines more than one Successor for the Reference Entity, each of the selected Successors becomes a Reference Entity. The weighting of the original Reference Entity is allocated in accordance with the number of Successors. You now bear the risk that a Credit Event can occur in the future with regard to each Successor as a new Reference Entity.

Example:

Nominal Amount: EUR 10,000.

Assumption: One Reference Entity from among four Reference Entities is replaced by two Successors.

The Weighted Amount of the three original Reference Entities continues to be in each case EUR 2,500. The Weighted Amount for the two Successors is in each case EUR 1,250.

In the case of Product Types 4, 5 and 6, you bear an additional risk. The Successor of a Reference Entity can already be a Reference Entity. This has the result that the weighting of the affected Reference Entity increases compared to the other Reference Entities. Upon the occurrence of a Credit Event at that Reference Entity, therefore, there is a higher risk of loss than in the case prior to the succession.

Example:

Nominal Amount: EUR 10,000.

Assumption: There are four Reference Entities A, B, C and D. The Reference Entity A takes over the Reference Entity D.

A is, thus, the Successor of D. The Weighted Amount of A is increased to EUR 5,000. The Weighted Amounts of the Reference Entities B and C continue to be unchanged at EUR 2,500.

It is even possible that the number of Reference Entities can be reduced to one in the case of Securities with two Reference Entities. You then lose the benefit of risk diversification with two Reference Entities.

(b) Risk of early termination

You bear the risk that the Securities are terminated early.

The Conditions for the Securities provide for an extraordinary right of termination for the Issuer. Certain special Call Events for termination are defined in the Conditions which establish the right to give extraordinary notice of termination. In addition, you bear a Reinvestment Risk.

Example:

The Reference Entity originally domiciled in Germany is taken over by another company.

This Successor has its headquarters in Asia. It is, thus, subject to another Transaction Type than the Transaction Type determined in the Conditions in accordance with the trading standards of ISDA.

The Securities are terminated.

The Cancellation Amount which is paid by the Issuer upon extraordinary termination of the Securities is very low under certain circumstances. It can especially be lower than the amount which you would have received if no extraordinary termination of the Securities had occurred. You then incur a loss if the Cancellation Amount is below the amount paid for the purchase of the Securities. A **total loss** is also possible.

You also bear the risk that the Issuer issues a notice of termination at a point in time which is not favourable for you. This can be the case if you have expected a further increase in the price for the Securities specifically just at the time of termination. The time can be unfavourable for you for the following reason: You can only reinvest the Cancellation Amount for a return which is below the expected return on the terminated Securities. Under certain circumstances, the termination deprives you of the possibility of collecting interest for your Securities. This is the case when the Issuer terminates the Securities before the Interest Payment Date.

The development of the respective Reference Entity after a termination has an adverse impact on the amount of the Cancellation Amount under the following conditions: The expectation for the credit standing of the Reference Entity falls between the point in time of the extraordinary notice of termination and the point in time when the Cancellation Amount is determined.

There is also a reinvestment risk. The "**Reinvestment Risk**" is the risk that the cash amount you receive can be reinvested for a comparable term only on worse market conditions (such as a lower return or an increased risk). As a result, the yield achieved by this new investment over the respective term may be significantly lower than the return expected with the pur-

chase of the Securities. In addition, the likelihood of a loss of the amounts paid in relation to the reinvestment may increase significantly.

(c) Risks in connection with determinations by the Issuer

Discretion on the part of the Issuer can have an adverse impact on the value of the Securities as well as the amount and/or the timing of the payments.

The Conditions provide that the Issuer will make certain determinations with regard to the Securities. The Issuer has, for example, discretion in the following areas:

- There is discretion when choosing the Valuation Obligation and fixing the Credit Event Redemption Amount.
- There is discretion in selecting a Successor.
- There is discretion in the case of an ISDA Statements or ISDA announcement which is not appropriate for determining a result that is fair for the economic substance of the Securities due to differences between the Conditions and the ISDA Terms or for other reasons.
- There is discretion when determining the Cancellation Amount after an extraordinary notice of termination as a result of a special Call Event for termination.

The Issuer makes such determinations in its reasonable discretion (§ 315 BGB). The Issuer will comply with the applicable ISDA Statements and resolutions of the ISDA Determination Committee.

Please, be aware that a determination made by the Issuer can reduce the value of the Securities. The amounts payable under the Securities are then also affected by the adverse impact of such a determination by the Issuer. The adverse impact can also affect the point in time of a payment.

(d) Consideration of the decisions by the ISDA Determination Committee

Material decisions in connection with the Securities depend on the content of the decisions of the ISDA Determination Committee. You have absolutely no influence on the resolutions of the ISDA Determination Committee.

Events and sets of facts which play an important role for the interest and redemption of the Securities are defined in the Conditions. They are based on standard Conditions for financial instruments which depend on the occurrence of a Credit Event at one or more Reference Entities ("**Credit Derivatives**").

These standard terms and conditions are referred to as the "**ISDA Credit Derivatives Definitions**". They were published by the International Swaps and Derivatives Association, Inc. (**ISDA**) for its members in the year 2014 (the "**ISDA Terms**"). The ISDA Terms are applied by a com-

mittee established by ISDA. The members of the committee are traders and purchasers of Credit Derivatives. It has the name "**ISDA Determination Committee**".

You should know that material decisions in connection with the Securities depend on the content of the resolutions of the ISDA Determination Committee. **This is especially the case in decisions about whether a Credit Event at a Reference Entity exists or not.**

You should pay attention to the fact that the ISDA Terms, which form the basis for the decision by the ISDA Determination Committee, are not published in this Base Prospectus. The ISDA Terms are published on the website of ISDA. However, they are not visible there for everyone. They can only be obtained for a charge and in the English language.

There is also the risk that not all relevant provisions in the ISDA Terms can be viewed on the website of ISDA. In this situation, you cannot check and examine the resolutions of the ISDA Determination Committee.

As a Security Holder, you have no influence on the ISDA Determination Committee or its rules. You also cannot influence the selection of its members. The members of the ISDA Determination Committee have absolutely no obligations towards you. As a consequence, you have no right to assert claims against the members of the ISDA Determination Committee. The members of the ISDA Determination Committee are not required to check the accuracy of information in connection with a decision that is to be made. They are also not bound by previous resolutions. Therefore, different decisions can be made also in the case of comparable factual situations.

Publications, determinations or resolutions of ISDA and/or the ISDA Determination Committee are published on their internet page.¹ There is no duty of the Issuer to inform you about these publications, determinations or resolutions.

(e) The ISDA Terms and their interpretation can change

You bear the risk that the ISDA Terms change in the future. The interpretation of the ISDA Terms can also change.

These changes can be reflected in the decisions of the Issuer, for example, in the decision about whether a Credit Event has occurred with regard to a Reference Entity. Such changes can also have a negative effect on your Securities.

Although ISDA has published the ISDA Terms, in order to harmonise transactions in the credit derivatives market, these ISDA Terms can be interpreted differently. Such different interpretations of the terms can also have an adverse effect on the Securities.

2.2.5 Specific risks in connection with the price determination and trading of the Securities

In the following, potential investors will find a description of risks related to the price determination and trading of the Securities.

(a) *Market price risks*

The development of the credit standing of the respective Reference Entity and, thus, the development of the value of the Securities during the term is not foreseeable when the Securities are purchased. The principal for the Securities is not protected.

The market for the Securities can be volatile and is subject to influence from numerous factors. The credit standing of the respective Reference Entity can substantially deteriorate during the term of the Securities. Such a deterioration can occur without the occurrence of a Credit Event being directly pending or threatening. This can lead to the following result: The value of the Securities falls below the amount which you paid to purchase the Securities.

If you sell the Securities before they become due, you should be aware of the following: The generated proceeds from the sale can be substantially below the Nominal Amount of the Securities. If the sales proceeds are below the amount you paid for the purchase, you will suffer a loss.

Especially the following circumstances can have an effect on the market price for the Securities. Individual factors in the market can also occur simultaneously:

- the remaining term of the Securities,
- change in the credit standing or the assessment of the credit standing with regard to the Issuer,
- change in the credit standing or the assessment of the credit standing of the respective Reference Entity or the occurrence of a Credit Event or suspicion of a Credit Event, or
- changes in the market interest rate.

Changes in the price of Obligations of the respective Reference Entity can also reduce the value of the Securities. This also applies if an expected change in the price of the Obligations occurs. Changes in the price of Obligations of the Respective Entity and, thus, the Securities can be based on the following, among other reasons: The Issuer engages in hedging transactions or other transactions with regard to the respective Reference Entity.

The market value of the Securities is also dependent on the development of the market prices of other credit derivatives related to the respective Reference Entity. These credit derivatives are also subject to fluctuations in price.

2. Risk Factors

The development of the market price for credit derivatives is also not just dependent on the expected credit standing related to the respective Reference Entity. The development depends, for example, also on the expectation in the market with regard to the probability of a failure of debtors in general. This can have the consequence that the market value of the Securities decreases due to changes in the price in the overall credit derivatives market. This phenomenon can also occur if the expectation for the credit standing with regard to the Reference Entity for the Securities has not changed.

The principal of the Securities is not protected and there is no minimum redemption amount. Thus, you have a substantial risk of loss. Even a total loss of the amount paid for the purchase of the Securities is possible.

(b) *Liquidity risk*

You bear the risk that there is no liquid market for trading the Securities. This means that you might not be able to sell the Securities at your preferred time.

An application can be submitted to admit the Securities to trading on a securities exchange and/or in any other trading system. After the Securities have been admitted to trading, the Securities are listed on the corresponding exchange/trading system (listing). However, in the case of a listing, there is no guarantee that this listing will be maintained permanently. If there is no longer a listing, the purchase and the sale of the Securities is substantially impeded or in fact impossible. Even in the event of a continuing listing, this does not necessarily mean that there will be high sales of the Securities on the relevant exchange. Low sales on an exchange make it more difficult to sell Securities at a favourable price. This is referred to as an illiquid market for the Securities.

Furthermore, even in the case of an existing secondary market it cannot be excluded that you may not be in a position to dispose of the Securities in the case of an unfavourable development (e.g. of the Underlying or of a currency exchange rate), e.g. if such development occurs outside of the trading hours of the Securities.

You should not assume that there will always be a liquid market for the Securities. You should take into account that you will not be able to sell the Securities to any market participant.

(c) *Determination of the prices for the Securities in the secondary market / risks in the pricing*

You bear the risk that you cannot sell the Securities at a specific time or for a specific price.

The Issuer (the "**Market Maker**") regularly determines purchase and selling prices for the Securities ("**Market Making**") under normal market conditions. The Market Maker can also be a company affiliated with the Issuer or another financial institution. The Market Maker, however, does not guarantee that the prices stated by the Market Maker are reasonable. The Market Maker also does not guarantee that prices for the Securities are available at all times during the entire term.

2. Risk Factors

You should note: The Market Maker can also change the methodology used to determine the posted prices in the Market Maker's own discretion at any time. For example, the Market Maker can change its calculation model and/or increase or decrease the range between the purchase and selling prices. In the case of a market disruption or technical problems, the availability of the used electronic trading system can also be restricted or shut down. In the case of extraordinary conditions in the market or extreme fluctuations in price in the securities markets, the Market Maker will normally not post any purchase or selling prices. You accordingly bear the risk that you will not obtain a price for your Securities under certain conditions. This means that you cannot sell your Securities in the market for a reasonable price in every situation.

The issue volume described in the Final Terms does not allow any conclusion on the volume of the Securities actually issued or outstanding at any time. Thus it may not be possible to assert the liquidity of a potential Secondary Market on such basis.

(d) Risks under potential conflicts of interest

The Issuer and its affiliated companies can pursue interests which do not take into account or are contrary to your interests. This can occur in the course of other transactions, business relationships with the respective Reference Entity or the exercise of other functions. Potential conflicts of interest can reduce the value of the Securities.

Comment on this point: To the extent the Issuer is referred to below, this also means the Issuer and its affiliated companies.

(A) Other transactions

The Issuer is active on a daily basis in the international and German securities, currency, credit derivatives and commodities markets. The Issuer can accordingly conclude transactions for the own account or for the account of customers that directly or indirectly relate to the Securities. When concluding these transactions, the Issuer can act as if the Securities had not been issued.

The Issuer can also conclude transactions with regard to the respective Reference Entity. Such transaction can have a negative effect on the value and/or the ability to trade the Securities. The Issuer can pursue economic interests which are contrary to your interests when doing so.

The Issuer can purchase and sell Securities for the own account or for the account of third parties. The Issuer can also issue other Securities. These transactions can reduce the value of the Securities you have acquired. The introduction of other competing products in the market can adversely affect the value of the Securities.

(B) Business relations

The Issuer can have a business relationship with the respective Reference Entity.

2. Risk Factors

This means the following with regard to the Securities: The Issuer can take measures it considers reasonable for the purpose of preserving its own interests under these transactions. When doing so, the Issuer is not required to take into account the effects on the Securities and on you as a Security Holder.

The Issuer can carry out and enter into transactions or participate in transactions which influence the credit standing of the Reference Entity. Such business relationships with the Reference Entity can indirectly negatively influence the probability of the occurrence of a Credit Event and, thus, impair the value of the Securities. This can lead to a conflict of interests on the side of the Issuer.

(C) Issuer's functions

The Issuer functions as the main paying agent with regard to the Securities. The Issuer can also make certain determinations in accordance with the Conditions. The Issuer determines inter alia the occurrence of a Credit Event and the Final Price for the Credit Event Redemption Amount.

The Issuer determines the occurrence of a Credit Event and, under certain circumstance, the Final Price. The Issuer can also choose a price for the Valuation Obligations of the relevant Reference Entity which are adverse for you. You should note that the exercise of these functions can impair the value of the Securities.

Furthermore, the Issuer can participate in ISDA auction proceedings after the occurrence of a Credit Event with regard to the Reference Entity. You should be aware that the participation in ISDA auction proceedings can reduce the Credit Event Redemption Amount and, thus, the value of the Securities.

(D) Information related to the Reference Entity

The Issuer and its affiliates can possess or have access to material information about the respective Reference Entity which is not public. You may not know this information. The Issuer is not required to disclose such information about the respective Reference Entity to you. Therefore, you must rely on publically available information when analysing the credit risk of the Reference Entity. Hence, you may make wrong decisions with respect to the Securities due to missing, incomplete or wrong information regarding the Reference Entity, which may even result in a **total loss** of the capital amount spent.

(E) Pricing by the Issuer

In the course of the Market Making, the Issuer, as the Market Maker, is responsible for setting the prices for the Securities. Market Making means that the Market Maker continuously sets bid and ask prices at which the Issuer is willing to trade the Securities in a certain volume. Market Making can have a material influence on the liquidity and/or the value of the Securities. The prices set by the Market Maker can, under certain circumstances, deviate substantially from the financial mathematical (intrinsic) value of the Securities to the detriment of the Security Holder and nor-

mally do not correspond to the prices which would develop in a liquid market without such Market Making.

2.2.6 Further specific risks in connection with the purchase of the Securities

(a) *Effects of transaction costs*

You bear the risk that transaction costs can substantially reduce any profits or substantially increase any losses.

Costs which are charged to you by the bank where you maintain your securities account when purchasing, selling or redeeming the Securities reduce any profits. Transaction costs can also increase any losses. This also applies for costs which you incur when purchasing or selling the Securities on an exchange. Transaction and consequential costs for the purchase can only be offset by an increased development in the value of the Securities. Transaction costs and costs following the acquisition especially have an effect of reducing the value and the earnings from your investment in the Securities in the case of a small transaction volume.

(b) *Influence of commissions and other fees*

You bear the risk that commissions or other fees substantially reduce the possibilities for earnings with your Securities.

The issue price and the selling price in the secondary market for the Securities can contain the following: issuing premiums, commissions, management fees or other fees.

The Issuer can charge commissions and completely or partially pass them on to third parties (distribution partners or investment advisers). Alternatively, the Issuer can grant a distribution partner or investment adviser a discount on the issue price or the selling price offered in the secondary market.

If the above-mentioned fees are incurred, the mathematical value of your Securities (the so-called fair value) will be different from the issue price or the selling price. The fair value of the Securities is then below the issue price or the selling price. These fees included in the issue price or the selling price are normally higher at the commencement of trading of the Securities. They decrease over the term of the Securities. The fees reduce your earnings.

(c) *Risks of hedging transactions of Security Holders*

You may possibly not be able to hedge your risks arising under the Securities with other transactions.

You cannot rely on being able to conclude transactions which hedge the risks under the Securities (hedging transactions). Hedging transactions cause additional costs. And hedging transactions can, for their part, lead to substantial losses.

(d) Risks with regard to taxes

You bear the risk that the tax treatment of the Securities can change. This can reduce the value of the Securities.

Tax law and practice are subject to changes, possibly with retroactive effect. This can reduce the value of the Securities and/or the market price for the Securities. In particular, the tax treatment of the Securities can change compared to your opinion at the time of purchasing the Securities. You accordingly bear the risk that you might possibly incorrectly evaluate the taxation of the income from purchasing the Securities. However, it is also possible that the taxation of income from the purchase of the Securities changes to your detriment.

(e) Risks of using debt financing

Your risk increases if you have used a loan to finance the purchase of the Securities.

If you finance the purchase of the Securities with a loan, you should be clear about the following: If your expectations with regard to the development of value of the Securities are not fulfilled, you incur a loss not only with regard to the paid purchase price. You must continue to pay interest and repay the loan taken out for the financing. This substantially increases the risk of loss. Prior to purchasing Securities with a loan, you must accordingly examine the following: Can you pay the interest for the loan and repay the loan if you incur losses or a total loss with regard to the Securities?

5. GENERAL INFORMATION ON THE SECURITIES

5.1 Category of investors and minimum units in the offering of Credit Linked Securities

The offering of Credit Linked Securities by the Issuer (hereinafter: the "Securities") to private investors is based on this Base Prospectus. It takes into account the general principles recommended by the German Derivatives Association (*Deutscher Derivate Verband*, "DDV") and by the German Credit Industry (*Deutsche Kreditwirtschaft*, "DK") – other than in relation to Securities with floating rate features.² The Securities offered to private investors are in denominations of at least EUR 10,000. In the case of a foreign currency, the denomination must correspond to the value of EUR 10,000. See on this point the restrictions described in Section "10. Selling Restrictions" in the Base Prospectus.

5.2 Information about the Securities

The Issuer has the following possibilities under this Base Prospectus:

- The Issuer can issue new Securities.
- The Issuer can increase the issuing volume of Securities that have already been issued.
- The Issuer can apply for admission of the Securities to trading on a regulated market or other third country market.

5.2.1 General

(a) *Type of offered securities and/or securities admitted to trading*

The Securities are each bearer Securities under German law within the meaning of § 793 German Civil Code (*Bürgerliches Gesetzbuch*, "**BGB**").

The form and content of the Securities is governed by German law. The same applies to all rights and obligations of the investors and the Issuer. The Securities, as bearer securities, are transferrable in accordance with the provisions in German securities law.

The Securities are structured pursuant to different product types. How the different product types constituting the Securities function is explained in Section "6. Description of the Securities". That Section especially describes how the occurrence of a Credit Event at a Reference Entity influences the value of the Securities. A differentiation is made between six different types of products. Product types 1, 2, and 3 relate to one Reference Entity. Product Types 4, 5 and 6 relate to multiple Reference Entities. You will find further details about the Product Types in Section 6.1.1.

² Grundsätze für die Emission von „bonitätsabhängigen SCHULDVERSCHREIBUNGEN“ zum Vertrieb an Privatkunden.

5. General Information on the Securities

The concrete description and features of the Securities can first be determined shortly prior to publication of the Final Terms. The same applies to all further information about the issues. These aspects will be published in the Final Terms.

They involve, e.g. the following information:

- International Security Identification Number (ISIN),
- German Securities Identification Number (*Wertpapierkennnummer*, "WKN"),
- Issue Date,
- Issuance volume,
- Maturity Date,
- the issuing currency,
- any rating of the Securities, and
- the Reference Entity(ies).

You can find a form of the Final Terms in Section "9 Form of Final Terms".

(b) Form of the Securities / transferability

The Securities are certificated in a bearer global note (the "**Global Note**") without interest coupons.

The Global Note will either be deposited

- with Clearstream Banking AG, Frankfurt, Mergenthalerallee 61, 65760 Eschborn, Federal Republic of Germany, or with
- Clearstream Banking S.A., Luxembourg, 42 Avenue JF Kennedy, L-1855 Luxembourg, and Euroclear Bank SA/NV, 1 Boulevard du Roi Albert II, B-1210 Brussels, Belgium (in each case, the "**Clearing System**").

Securities in definitive form will not be issued. The Final Terms will determine at which Clearing System the Global Note is deposited.

The Securities are transferrable as co-ownership interest in the Global Note pursuant to the relevant regulations of the respective Clearing System.

(c) *Status of the Securities, Ranking in case of a resolution of the Issuer*

The Securities constitute direct and unsecured obligations of the Issuer. The Securities rank *pari passu* with all other unsecured and unsubordinated obligations of the Issuer. Exception: obligations which have a preference or subordination under the law.

The recovery and resolution laws applicable to the Issuer comprising the

- Regulation (EU) No 806/2014 ("**SRM**"),
- the Restructuring and Resolution Act (*Sanierungs- und Abwicklungsgesetz – "SAG"*) implementing the Directive 2014/59/EU of 15 May 2014 ("**BRRD**"),
- the German Banking Act (*Kreditwesengesetz – KWG*) and
- the German credit institution reorganisation act (*Kreditinstitute-Reorganisationsgesetz – KredReorgG*)

provide for regulatory requirements and administrative powers for the restructuring and resolution of a credit institution and their groups ("**Institutions**"). This may adversely affect the market value of the issued debt securities as well as rights in connection with the issued debt securities.

According to the SRM and the SAG, shareholders and creditors, which have purchased financial instrument issued by those Institutions, may participate in an Institution's losses and the costs of the resolution; so-called instruments of creditor participation (*Gläubigerbeteiligung*).

This means, that the Securities of the Issuer, as an Institution, are also subject to the instrument of creditor participation.

The prerequisites for a resolution are met under the SAG, when BaFin, as the relevant resolution authority, makes the following determinations:

- that the Issuer is failing or likely to fail,
- that in order to achieve one or more resolution objectives, exercising a resolution measure is necessary and proportionate,
- that the failure of the Issuer cannot be remedied within the given timeframe with any other measure.

If, according to the determinations of the relevant resolution authority, these prerequisites are met with regard to an Institution, the resolution authority can undertake comprehensive measures, which can be detrimental to creditors (such as the Security Holders). These measures may also be undertaken before the insolvency of the Institution. The resolution authority can, for example,

5. General Information on the Securities

transfer shares in the Institution to a bridge institution, an asset management company or another suitable third party. The resolution authority can also transfer parts or the entirety of the assets of the Institution, including its liabilities. This can compromise the Institution's ability to honour its payment and delivery obligations towards the creditors of the financial instruments it has issued – and therefore towards the Security Holders of the Securities issued by the Issuer.

Furthermore, in accordance with the SAG the resolution authority is entitled to undertake the following measures: The resolution authority can write down the claims of holders of unsecured Securities of the Issuer described in this Base Prospectus partially or completely or convert them into equity (stock or other forms of shares) in the Issuer (so-called bail-in). All these measures must serve the purpose of stabilising the Issuer as an Institution.

The resolution authority can also suspend the payment and delivery obligations of the Issuer as an Institution towards the Security Holders. Furthermore, the resolution authority can suspend the option of the Security Holders to exercise any termination or any similar rights (*Gestaltungsrechte*) according to the Conditions of the Securities. The suspension takes effect until the end of the banking day following the publication of the resolution order. Under certain circumstances, the resolution authority can also amend contractual provisions regarding the obligations of the Institution. The amendment can in particular include the Conditions of the Securities issued by the Issuer. The resolution authority can also order the cancellation or suspension of security trading of the Issuer on a regulated market or the listing.

If a resolution authority takes a measure in accordance with the SAG, the Security Holder is not entitled based on this measure alone, to terminate the Securities or to exercise other contractual rights. This restriction applies as long as the Issuer as an Institution is still performing its main obligations (*Hauptleistungspflichten*) resulting from the Conditions, including its payment and delivery obligations.

For the purposes of a bail-in, the claims of the creditors of the Issuer as an Institution, like the holders of the unsecured Securities of the Issuer described in this Base Prospectus, will be divided into several groups and will participate according to a fixed ranking (the "**Liability Cascade**").

As the first in the Liability Cascade, owners of the Issuer as an Institution (i.e. holders of stock and other shares) must be held liable. **Then** the creditors of Additional Tier 1 instruments or of Tier 2 instruments and creditors of unsecured subordinated liabilities (this includes for example subordinated loans and participation rights) of the Issuer are affected.

The **next category** consists of **unsecured, unsubordinated liabilities** which also includes debt liabilities such as bearer bonds, order bonds (*Orderschuldverschreibungen*), registered bonds and *Schuldscheindarlehen*. Exception: covered deposits or indemnifiable (*entschädigungsfähig*) deposits.

Within this category, there are non-structured debt instruments. In case of insolvency proceedings they get assigned a lower ranking than other unsecured, unsubordinated liabilities. The lower ranking can be based on statutory regulation or an explicit provision by the borrower in the terms. These so-called non-preferred debt instruments rank above the other unsecured, unsubordinated liabilities pursuant to the Liability Cascade.

The Securities described in this Base Prospectus rank below the non-preferred debt instruments pursuant to the Liability Cascade. Accordingly, in the case of a bail-in, you will be impacted only after the holders of these non-preferred debt instruments.

(d) Payments under the Securities

Payment under the Securities is made on the relevant maturity date through the Clearing System specified in the Final Terms. You can find details of the payments in the description of the Securities in Section "6. Description of the Securities".

Any taxes or public levies incurred in connection with payments under the Securities must be borne by you. The Issuer is released from its obligation under the Conditions upon rendering payment to the Clearing System.

(e) Paying Agent

All payments under the Securities will be made by the Principal Paying Agent in accordance with the Conditions. The Principal Paying Agent and any other Paying Agents are specified in the Final Terms.

5.2.2 Further Features

The term of the Securities is fixed. It ends on the Scheduled Maturity Date. This date is set in the relevant Final Terms when the Securities are issued. Exemption:

- A Credit Event occurs with regard to a Reference Entity. In this situation, the Settlement Date can fall before or after the Scheduled Maturity Date. You receive the Credit Event Redemption Amount on the Settlement Date. You can find details in Sections 6.2.5, 6.3.5, 6.4.5, 6.5.6, 6.6.6 and 6.7.6.
- The Requirements for a Payment Deferral are satisfied. In this situation, interest payments can be deferred until the Deferred Interest Payment Date. The redemption can also be deferred until the Deferred Redemption Date. You can find details in Sections 6.2.3, 6.2.6, 6.2.8, 6.3.3, 6.3.6, 6.3.8, 6.4.3, 6.4.6, 6.4.8, 6.5.3, 6.5.7, 6.5.9, 6.6.4, 6.6.7, 6.6.9, 6.7.4, 6.7.7 and 6.7.9.
- The Issuer issues an extraordinary notice of termination for the Securities in accordance with the Conditions (for details, see Section 1.2.3). The Cancellation Amount is paid on

the date after the announcement of the notice of termination designated in the Final Terms.

5.2.3 Description of the rights under the Securities

Your rights under the individual product types for the Securities are described in Section 6. Descriptions of the Securities.

In the case of so-called Call Events, the Issuer is entitled to give an extraordinary notice of termination of the Securities and redeem them with the Cancellation Amount. The Cancellation Amount corresponds to the market value of the Securities plus any interest accrued up to but excluding the date of redemption. The Termination Events are set forth in the respective Conditions. Examples of situations under which the extraordinary rights to give notice of termination can be exercised include the following:

- A Successor does not correspond to the Transaction Type of the original Reference Entity.
- In the case of Product Types 1, 2 or 3, there is more than one Successor with regard to the Reference Entity.
- The prerequisites for Increased Hedging Costs, a Hedging Disruption or a Change in Law exist, to the extent this is provided for the Final Terms.
- In case of a floating Interest Rate, the Reference Rate disappears.

In the case of an extraordinary notice of termination, you completely lose your rights under the Securities. The exception is your claim for payment of the Cancellation Amount. However, there is the risk that the Cancellation Amount is zero (0). In this situation, you incur a total loss of the amount paid by you to purchase the Securities.

Comment on this point: The purchase price paid for the Securities includes here and below all costs related to the purchase.

5.3 Interests of natural and legal persons involved in the issuance/offering of the Securities

Comment on this point: To the extent the Issuer is referred to below, this also means the Issuer and its affiliated companies.

(a) *Other transactions*

The Issuer is active on a daily basis in the international and German securities, currency, credit derivatives and commodities markets. The Issuer can accordingly conclude transactions for the

own account or for the account of customers that directly or indirectly relate to the Securities. When concluding these transactions, the Issuer can act as if the Securities had not been issued.

The Issuer can also conclude transactions with regard to the respective Reference Entity. Such transaction can have a negative effect on the value and/or the ability to trade the Securities. The Issuer can pursue economic interests which are contrary to your interests when doing so.

The Issuer can purchase and sell Securities for the own account or for the account of third parties and issue other Securities.

(b) Business relations

The Issuer can have a business relationship with the respective Reference Entity. Such a business relationship can, for example, be characterized by

- granting credit,
- providing support in financing in the capital market as a consortium bank or financial advisor or in a comparable function,
- custodian activities,
- business activities in connection with the management of risks, or
- consulting and trading activities.

This can reduce the value of the Securities you have acquired.

This means the following with regard to the Securities: The Issuer can take measures it considers reasonable for the purpose of preserving its own interests under these transactions. When doing so, the Issuer is not required to take into account the effects on the Securities and on you as a Security Holder.

The Issuer can carry out and enter into transactions or participate in transactions which influence the credit standing of the Reference Entity. Such business relationships with the Reference Entity can indirectly negatively influence the probability of the occurrence of a Credit Event. This can lead to a conflict of interests on the side of the Issuer.

The Issuer is not issuing the Securities in order to shift risks for its own benefit. This means that no risks from the granting of credit to the Reference Entity are transferred to you when the Securities are issued. The Issuer will conclude hedging transactions when issuing the Securities, in order to hedge against the risks from the issuing of the Securities.

You should accordingly be aware: Obligations of the Issuer under the Securities are independent from the existence or the amount of a credit engagement by the Issuer with the respective Reference Entity. It is especially not necessary that the Issuer suffers a loss upon the occurrence of a

Credit Event at a Reference Entity. Payments of interest and principal under the Securities can be reduced or not take place, even if the Issuer has not incurred any harm.

(c) Issuer's functions

The Issuer functions as the main paying agent with regard to the Securities. The Issuer can also make certain determinations in accordance with the Conditions:

- The Issuer can determine Credit Events.
- The Issuer can calculate the Final Price for the Credit Event Redemption Amount.
- The Issuer can determine Successors in right for the Reference Entity.
- The Issuer can make other calculations or adjustments.

The Issuer determines the occurrence of a Credit Event and, under certain circumstance, the Final Price. The Issuer can also choose a price for the Valuation Obligations of the relevant Reference Entity which are adverse for you.

Furthermore, the Issuer can participate in ISDA auction proceedings after the occurrence of a Credit Event with regard to the Reference Entity. The value of the Reference Entity's Obligations is determined in this process. The Issuer can take actions in its own interest in accordance with the rules of the ISDA. The Issuer does not have to take into account the effects of these actions on the Securities and you as the Security Holder. You should be aware that the participation in ISDA auction proceedings can reduce the Credit Event Redemption Amount and, thus, the value of the Securities.

(d) Information related to the Reference Entity

The Issuer can possess material information about the respective Reference Entity which is not public. You may not know this information. The Issuer is not required to disclose such information about the respective Reference Entity. Therefore, you must rely on publically information when analysing the credit risk of the Reference Entity.

(e) Pricing by the Issuer

The Issuer or its affiliates can act as the Market Maker for the Securities.

The Market Maker is responsible for setting the prices for the Securities. The prices are then not directly determined by supply and demand. Therefore the setting of the price for the Securities differs from exchange trading, where the price relies on supply and demand.

The Issuer and its affiliates may also act as Market Maker for the Underlying.

Market Making can influence the price of the Underlying and thereby the value of the Securities. The prices set by the Market Maker will not always correspond to the prices which would develop in a liquid market. Bid and ask prices quoted by the Market Maker on the secondary market are determined on the basis of the fair value of the Securities. The fair value depends, among other things, on the value of the Underlying.

The Market Maker sets the spread between the bid and ask prices. The bid price is the price at which the Market Maker buys the Securities. The ask price is the price at which the Market Maker sells the Securities. The spread depends both on supply and demand for the Securities and on certain yield considerations. Some costs are deducted when pricing the Securities over the life of the Securities. However, this is not always done evenly over the term. Costs can be deducted in full from the fair value of the Securities at an early stage as determined by Market Maker. The prices quoted by the Market Maker may therefore deviate significantly from the fair value or the economically expected value of the Securities. In addition, the Market Maker may at any time change the method by which it determines the prices quoted. For example, the Market Maker may increase or decrease the spread between bid and ask prices.

5.4 Reasons for the offering of the Securities and the use of the proceeds

The Issuer is free in using the net proceeds from issuing the Securities. The estimated net amount of proceeds and, in case of Securities with a denomination of less than EUR 100.000 or where otherwise applicable, the estimated total expenses of the issue/offer will be published in the relevant Final Terms.

5.5 Information about the Reference Entity

Reference entities can be companies, countries or financial institutions. You will find details about this in Section 6.1.3. Reference Entities must have stocks or bonds listed on a regulated market within the meaning of Art. 4 para. 1 (21) of the Directive 2014/65/EU as of the time the Securities are issued. This means that the Reference Entities are subject to extensive transparency duties under the law.

The Reference Entity(ies) are specified in the relevant Final Terms. Sources for additional information, including information whether or not these information can be obtained free of charge, can also be found in these Final Terms.

The Issuer will not provide any further information about the Reference Entity(ies) after issuing the Securities.

In the case of a Successor, the adjustment rules for replacing the Reference Entity by a Successor set forth in the Conditions apply. You can find details in Section 6.1.4. The definitions and the threshold values for determining a Successor are set forth in the Conditions.

5.6 Conditions and requirements for the offering of the Securities

5.6.1 Conditions, offering statistics, expected timing and required measures for the application

The Securities can be offered to potential investors either with or without a subscription period.

(a) *Offers of the Securities without a subscription period*

If securities are offered without a subscription period, the respective issue date for the Securities is published as the commencement of sales in the Final Terms.

(b) *Offering of Securities with a subscription period*

If Securities are offered with a subscription period, the subscription period for the Securities is published in the Final Terms.

In order to purchase Securities, you must issue a subscription order to be forwarded to the Issuer within the subscription period. If provided for in the Final Terms, the Securities can be continuously and freely offered thereafter.

During the subscription period, the Issuer reserves the right to terminate the subscription or other possibilities for subscription early. The Issuer also reserves the right to reduce the subscriptions you have made. The Issuer also reserves the right to only partially allocate Securities.

The Issuer furthermore reserves the right not to issue the Securities. This especially applies if the demand during the subscription period is too low. In this event, all offers to purchase the Securities (subscriptions by potential purchasers) that have already been submitted become invalid. A corresponding announcement will be published on the website at www.onemarkets.de.

Furthermore, the Issuer can reserve the right in the Final Terms to extend the subscription period. The details concerning the subscription period will be published in the Final Terms. The modalities and the date for public announcement of the results of the offering will also be published there.

5.6.2 Additional information about the offering of the Securities

The specific conditions and requirements for the offering of the Securities will be stated and published in the Final Terms, since they will be fixed shortly before publication of the Final Terms. Examples:

- commencement of sales,
- subscription period,
- minimum or maximum amount in connection with the offering of the Securities.

5.7 Plan for distribution of the Securities and allocation of Securities

5.7.1 Potential investors, categories of investors

The Securities are offered to private clients, institutional investors and/or other qualified investors. The restrictions described in Section 5.1 and in Section "11.1 Selling Restrictions" must be observed.

In the Final Terms, the countries in which the Securities are offered will be published. The potential offering countries for a public offering of the Securities are: Croatia, Grand Duchy of Luxembourg and Poland.

5.7.2 Notification process or the possibility of subscribing

Securities can be offered with or without a subscription period. If the Securities without a subscription period, the notification is not required. In the case of Securities with a subscription period, the Securities allocated to you will be booked to your securities account at your securities account bank. There will be no separate notification in addition to the booking. You will accordingly expressly not be informed about the allocation.

5.7.3 Issue price for the Securities, pricing

(a) *Information about the price at which the Securities are offered (Issue Price)*

If the Securities are offered to you without a subscription period, the following applies: The initial issue price for the Securities is normally published in the Final Terms. The initial offer price is the price at which you are publically offered the Securities for the first time. The selling price of the Securities is subsequently fixed afterwards on an ongoing basis.

If you are offered the Securities during a subscription period, the following applies: The initial issue price fixed by the Issuer applies for all Securities during the subscription period. The initial issue price is published in the Final Terms. It is possible to provide that the Securities will continue to be freely offered for purchase by the Issuer after the subscription period. The Issuer will then set the issue price on an ongoing basis.

The issue price for the Securities is based on internal pricing models of the Issuer. This also applies for bid and ask prices posted by the Issuer during the term. These prices can include, in addition to an issue premium and a placement commission, also an expected margin which you cannot identify. The Issuer will keep this margin. This margin can include costs which the Issuer has incurred or will still incur. For example: costs of the Issuer for the structuring of the Securities, for the Issuer's hedging of risks and for distribution.

A sales commission or other commissions can be charged. This will be set forth in the Final Terms.

(b) Method for setting the price and process for announcing the price

If the Final Terms which must be published for the Securities do not contain the issue price, the following applies: The Final Terms described the method with which the issue price is fixed. The Final Terms also provide information about where the issue price is published.

(c) Other costs which are specifically charged to the subscriber or purchaser

The Issuer will not charge any further costs to you other than the above-mentioned issue prices, subscription prices or selling prices. Direct banks, main banks or the respective securities exchange may charge further costs and taxes. The costs and taxes are to be inquired there.

The Final Terms will provide, to the extent known by the Issuer, those expenses of the Issuer contained in the issue price.

5.7.4 Delivery of the Securities

The Global Note for the Securities will be deposited with the Clearing System on the value date set forth in the respective Final Terms. The delivery will be made in exchange for payment or without payment or under some other delivery process as set forth in the Final Terms. When purchasing the Securities after the issue date, the delivery will be made in accordance with the applicable, local market practices.

Securities in definitive form will not be delivered.

5.7.5 Admission of the Securities to trading and trading rules

An application can be made to admit the Securities under this Base Prospectus to trading on an exchange, a third country market, a multilateral trading system and/or another exchange or another trading system (listing). E.g. the listing of the Securities on the official list of the Luxembourg Stock Exchange and admission to trading of the Securities on the regulated market of the Luxembourg Stock Exchange.

However, the Securities can also be offered without a listing.

5.7.6 Admission to trading

The Issuer may intend to submit an application for listing. In this case, this will be set out in the Final Terms. This also applies for an application for admission to trading on a market and/or trading system in a third country. The Final Terms will state the earliest date on which the Securities will be admitted or are scheduled to be admitted to trading.

The Final Terms will also state all markets on which Securities in the same securities category are already admitted to trading. The Issuer, however, will only provide such information if the Issuer knows about such listings.

Even if the Issuer submits such an application, there is no guarantee that the application will be granted. There is also no guarantee that active trading in the Securities will take place or develop. The Issuer does not assume an obligation to maintain the admission to trading during the term of the Securities.

5.7.7 Name and address of the intermediaries in secondary trading

If the Issuer or a third party appointed by the Issuer acts as the Market Maker under the Final Terms for the Securities, the following applies: The Market Maker will regularly submit bid and ask prices (purchase and selling prices) during the normal trading hours for the Securities under normal market conditions. This takes place for the purpose of providing liquidity in the respective Securities. In this situation, the Market Maker will act in accordance with the relevant rules of the respective trading locations.

If the Issuer retains intermediaries in secondary trading, the names and addresses of these institutions will be set out in the Final Terms. This information will only be given if institutions as intermediaries engage in secondary trading on the basis of a binding commitment. The publication includes a description of the main conditions for the intermediary's commitment.

5.7.8 Publications after completed issuance of the Securities

The Issuer will not publish any information about the Securities after issuing the Securities. The Conditions provide for the publication of a notification in certain situations. This is the situation, for example, upon a succession when the Successor Notice is published. In these situations, the publication will take place on the website set forth in the Final Terms or a corresponding successor site. You can find the corresponding rules in § 12 of the Conditions.

The Issuer will publish significant new factors, material mistakes or material inaccuracies with regard to the information contained in the Base Prospectus. The publication will be made in a supplement to this Base Prospectus pursuant to Article 23 of the PR.

6. DESCRIPTION OF THE SECURITIES

The Securities issued or offered under this Base Prospectus are described in Sections 6.1 to 6.8.

6.1 General information about the Securities

6.1.1 Product Types

The Securities are issued with a fixed interest rate or with a step-up interest rate or a floating Interest Rate linked to a Reference Rate. The Securities refer to one or more Reference Entities.

There are six product variations for the Securities:

- Product Type 1: Securities which refer to a single company as the Reference Entity.
- Product Type 2: Securities which refer to a single country as the Reference Entity.
- Product Type 3: Securities which refer to a single financial institution as the Reference Entity.
- Product Type 4: Securities which refer to multiple companies as the Reference Entities.
- Product Type 5: Securities which refer to multiple countries as the Reference Entities.
- Product Type 6: Securities which refer to multiple financial institutions as the Reference Entities.

The following Sections explain exactly how the Securities function.

6.1.2 Loss upon occurrence of a Credit Event

The Securities will be redeemed at the Nominal Amount and bear interest. However, this is only the case if no Credit Event has occurred with regard to the respective Reference Entity.

If a Credit Event occurs, you receive the following payments as a Security Holder:

- Under Product Types 1, 2 and 3, the Nominal Amount will not be redeemed. Instead, you will receive the Credit Event Redemption Amount. This is normally substantially lower than the Nominal Amount. The accrual of interest will cease.

6. Description of the Securities

Example:

Nominal Amount: EUR 10,000. Redemption and interest payments of the Securities depends on the credit standing of the Reference Entity.

Assumption: A Credit Event occurs at the Reference Entity. ISDA auction proceedings are conducted.

The Credit Event Redemption Amount is fixed on the basis of the Auction Final Price for the Obligations of the Reference Entity.

Auction Final Price: 8%.

Credit Event Redemption Amount: EUR 800 (8% of EUR 10,000).

The Credit Event Redemption Amount (EUR 800) is paid to you as soon as the Credit Event Redemption Amount has been determined.

The interest payments on the Interest Payment Dates are no longer made after the occurrence of the Credit Event. If the Credit Event occurs prior to the first Interest Payment Date, you do not receive any interest for the Securities.

- In the case of Product Types 4, 5 and 6, the Reduced Nominal Amount as well as the Credit Event Redemption Amount of the Weighted Amount for the Reference Entity affected by a Credit Event is redeemed. The accrual of interest is reduced or ceases.

Example:

Nominal Amount: EUR 10,000. Redemption and Interest Payments on the Securities depend on the credit standing of four Reference Entities. The Weighted Amount for each Reference Entity is then EUR 2,500.

Assumption: A Credit Event occurs at a Reference Entity. ISDA auction proceedings are conducted.

The Reduced Nominal Amount is first determined: EUR 10,000 minus the Weighted Amount for the Reference Entity affected by the Credit Event (EUR 2,500). The Reduced Nominal Amount is EUR 7,500.

The Credit Event Redemption Amount with regard to the Weighted Amount for the affected Reference Entity is then determined. The basis for this is the Auction Final Price.

Auction Final Price: 8%.

Credit Event Redemption Amount: EUR 200 (8% of EUR 2,500).

The Credit Event Redemption Amount (EUR 200) is paid to you as soon as the Credit Event Redemption Amount has been determined. You receive the Reduced Nominal Amount (EUR 7,500) on the Scheduled Maturity Date.

6. Description of the Securities

The interest payments on the Interest Payment Days after the occurrence of the Credit Event are determined then only on the basis of the Reduced Nominal Amount (EUR 7,500). They are accordingly reduced by 25%.

The Credit Event Redemption Amount can also be further reduced by deduction of a Swap Unwind Amount of the Issuer. The deduction of the Swap Unwind Amount can lead to a total loss of the amount paid for the purchase, although the Securities have a positive Credit Event Redemption Amount.

By purchasing the Securities, you assume additional risks in addition to the risks related to the ability of the Issuer to make payments. These risks result from the fact that a Credit Event can occur with regard to the Reference Entity(ies).

If that situation occurs, you receive an amount which is normally substantially lower than the Nominal Amount. Interest payments on Interest Payment Dates which fall after the occurrence of a Credit Event can also be lost. Under certain circumstances, you may even incur a total loss if the Credit Event Redemption Amount is zero (0).

The Securities provide for interest payments that are above the market interest rate as consideration for assuming this risk. The interest payments, namely, include a risk-based interest premium (risk premium) with regard to the Reference Entity(ies).

6.1.3 Reference Entities

A single Reference Entity will be specified in the Final Terms for Product Types 1, 2 and 3. Multiple Reference Entities will be specified for Product Types 4, 5 and 6. These Reference Entities are:

- in the case of Product Type 1, a company
- in the case of Product Type 2, a country, and
- in the case of Product Type 3, a financial institution.
- in the case of Product Type 4, multiple companies
- in the case of Product Type 5, multiple countries,
- in the case of Product Type 6, multiple financial institutions.

In the case of Product Types 4, 5 and 6, the weightings given to the individual Reference Entities are equal. Therefore, mathematically a Weighted Amount corresponding to the equally weighted portion of the Nominal Amount is attributed to each Reference Entity.

Example:

Nominal Amount: EUR 10,000.

Assumption: four Reference Entities

Weighted Amount for each Reference Entity: EUR 2,500.

6. Description of the Securities

A transaction type will be attributed in the Final Terms to each Reference Entity based on its type (company, country or financial institution) or its region of origin. For example: "European corporate", "North American corporate", "Western European sovereign", "Emerging European & Middle Eastern sovereign", "European financial corporate", "Australian financial corporate". Depending on the transaction type, the Final Terms will provide that certain provisions in the Conditions are applicable or not applicable.

Reference Entities can be replaced under the respective Final Terms upon the occurrence of a succession by one or more Successors. This can also lead to an adjustment of their weighting and the Weighted Amounts attributable to the Reference Entity(ies). You will find details about succession in Section 6.1.4.

The Issuer will assure the following when offering Securities to private investors: Companies, financial institutions or countries will be used as Reference Entities which satisfy the following criteria:

- official rating from the rating agencies Standard & Poor's or Fitch Ratings in the categories "AAA" to "BBB", or
- official rating by the rating agency Moody's in the categories "AAA" to "BBB3".

These criteria must be satisfied on the first day of the public offer of the respective Securities. It is sufficient if one of the designated rating agencies has classified the Reference Entity accordingly.

The Issuer can also orient itself on the criteria of the European Central Bank for the "Eurosysteem credit assessment framework ("ECAAF")".

If there is no official rating from a rating agency recognized by the European Central Bank, the Issuer will itself evaluate the Reference Entity(ies). The Issuer will then examine whether the credit standing of the respective Reference Entity corresponds to a rating in the above designated categories. The Issuer will apply comparable standards that are also applied by the rating agencies. The examination of the respective Reference Entity by the Issuer will be made through the own credit research. In the case of multiple Reference Entities, all Reference Entities must satisfy these criteria.

6.1.4 Successors

A Succession which is relevant for the Securities with regard to a Reference Entity can occur between the Issue Date and the Final Determination Date. A replacement of the Reference Entity by a Successor takes effect upon publication of a corresponding Succession Notice by the Issuer.

(a) *Securities with one Reference Entity (Product Types 1, 2 and 3)*

In the case of Securities with one Reference Entity, the Issuer can replace the Reference Entity with one or more Successors in the case of succession. The respective Final Terms contained provisions about selecting the Successor(s). If the Issuer publishes a Credit Event Notice prior to the occurrence of succession, no Successor will be determined.

6. Description of the Securities

If the Issuer determines more than one Successor for the Reference Entity, the Securities relate proportionately to each of the Successors.

Example:

Nominal Amount: EUR 10,000.

Assumption: The Reference Entity is replaced by two Successors. Thus, EUR 5,000 are allocated to each Successor.

If a Credit Event occurs at one Successor, the amount which bears interest is reduced to EUR 5,000. You receive the Credit Event Redemption Amount on the Settlement Date. This Credit Event Redemption Amount is determined for the relevant Successor with regard to its portion in the Nominal Amount (EUR 5,000). You also receive an amount of EUR 5,000 on the Scheduled Maturity Date.

Special grounds for an early termination also exist in this situation. The Issuer is entitled to give extraordinary notice of termination of the Securities for the Cancellation Amount. If the Issuer does not issue an extraordinary notice of termination, a Credit Event can occur for each successor Reference Entity.

(b) *Securities with multiple Reference Entities (Product Types 4, 5 and 6)*

In the case of Securities with multiple Reference Entities, the Issuer can replace the Reference Entity affected by a succession with one or more Successors. The respective Final Terms contain provisions about selecting the Successor(s).

A Reference Entity can also be a Successor of another Reference Entity if the prerequisites for selecting this Reference Entity as a Successor are satisfied.

In the case of replacement of a Reference Entity by only one Successor, the Weighted Amount for that Successor corresponds to the Weighted Amount of the replaced Reference Entity.

In the case of replacement of a Reference Entity by multiple Successors, the following applies: The Weighted Amount for each Successor corresponds to the Weighted Amount of the Reference Entity divided by the number of Successors.

Example:

Nominal Amount: EUR 10,000.

Assumption: From among four Reference Entities, one Reference Entity is replaced by two Successors.

The Weighted Amount of the three original Reference Entities continues to be EUR 2,500 each. The Weighted Amount for the two Successors is in each case EUR 1,250.

If a Successor is already a Reference Entity, the following applies: The Weighted Amount of this Reference Entity is increased, compared to the other Reference Entities, by this additional Weighted Amount.

Example:

Nominal Amount: EUR 10,000.

Assumption: There are four Reference Entities A, B, C and D. The Reference Entity A takes over the Reference Entity D.

A is, thus, the Successor to D. The Weighted Amount of A is increased to EUR 5,000. The Weighted Amounts of the Reference Entities B and C continues to be EUR 2,500.

No Successor is determined for a Reference Entity for which the Issuer has published a Credit Event Notice prior to the occurrence of succession.

A Reference Entity for which the Issuer has published a Credit Event Notice can become the Successor of another Reference Entity. This possibility exists if the Issuer has still not published a Credit Event Notice for the "changed out" Reference Entity.

6.1.5 Credit Events

Credit Events describe the occurrence or the threatening occurrence of various economically adverse circumstances from the point of view of the creditors of the respective Reference Entity. Credit Events are accordingly an expression of a material negative development in the credit standing of the Reference Entity.

However, a Credit Event can only be considered if the Issuer has learned about the occurrence of a Credit Event at a Reference Entity. The Issuer must have obtained this knowledge on the basis of publicly available information. All requirements for the occurrence of a Credit Event must be satisfied by the affected Reference Entity(ies). You will find the details for these requirements in Sections 6.2.7, 6.3.7, 6.4.7, 6.5.8, 6.6.8 and 6.7.8.

Comment on this point: If the descriptions of the Securities refer to a Credit Event at one Reference Entity, the following applies: Only those Credit Events are meant for which all Requirements for the Occurrence of a Credit Event described in the Conditions are satisfied. This applies especially if the Credit Event triggers a reduction or deferral of the payments of interest and/or redemption of the Securities.

The Final Terms can, depending on the Transaction Type of the Reference Entity, provide for one or more of the following Credit Events:

- Bankruptcy,
- Failure to Pay,
- Restructuring,
- Repudiation/Moratorium,
- Potential Obligation Acceleration,

6. Description of the Securities

- Obligation Acceleration,
- Governmental Intervention.

This means that the Securities, in addition to the credit standing of the Issuer, above all depend on the credit standing of the Reference Entity. You receive the payments contemplated in the Conditions in the intended amount if no Credit Event has occurred. Upon the occurrence of a Credit Event, you incur a partial or complete loss with regard to interest payments and redemption.

Various Credit Events are differentiated.

- (i) **Credit Event Bankruptcy:** The Credit Event Bankruptcy can occur at companies or financial institutions. The Credit Event exists, for example, if insolvency proceedings or comparable proceedings have been initiated with regard to the Reference Entity. The Credit Event Bankruptcy can also occur in the case of liquidation or inability of the Reference Entity to meet its ongoing payment obligations or over-indebtedness.
- (ii) **Credit Event Failure to Pay:** The Credit Event Failure to Pay can occur in all types of Reference Entities.

A Credit Event Failure to Pay occurs, for example, if the Reference Entity has not paid an Obligation or has not done so on time. However, certain threshold values must be taken into account for this purpose. The Failure to Pay must accordingly exist with regard to an amount having a specific volume (US Dollars 1 million). The Failure to Pay smaller amounts does not lead to the occurrence of the Credit Event Failure to Pay.

A Credit Event Failure to Pay can also occur due to a redenomination of a currency as a consequence of actions taken by a public authority. This applies in the following situation: The redenomination of the currency leads to a reduction in the interest payments, payments of principal or other payments for Obligations of the Reference Entity.

- (iii) **Credit Event Restructuring:** The Credit Event Restructuring can occur in all types of Reference Entities.

The Credit Event occurs, for example, in the following situations:

- The interest rate or the amount of principal of one or more Obligations of the Reference Entity are reduced or their due date is extended.
- The payments for one or more Obligations of the Reference Entity are deferred.
- The ranking of one or more Obligations of the Reference Entity are adversely changed, or there is a redenomination of a currency.

A prerequisite for one of the above-described Restructurings is that the credit standing or the financial situation of the relevant Reference Entity deteriorates.

The restructuring must be made in a form which is binding for all creditors of the respective Obligation. In all situations, the threshold values described in the Final Terms with regard to the relevant Obligation must be taken into account.

6. Description of the Securities

A redenomination from Euro to another currency does not constitute a Restructuring under the following conditions:

- At the time of the currency redenomination, there is a freely available standard market conversion rate between the Euro and the other currency, and:
- Payments of interest, principal or other payments for Obligations of the Reference Entity are not reduced upon redenomination at this freely available standard market conversion rate.

- (iv) **Credit Event Repudiation/Moratorium:** The Credit Event Repudiation/Moratorium can occur for countries and certain companies.

This Credit Event occurs, for example, in the following situations:

- A Reference Entity or a public authority completely or partially disputes the existence of an Obligation. A Reference Entity or a public authority does not acknowledge an Obligation or rejects the Obligation or disputes its validity.
- A Reference Entity or a public authority declares or in fact or legally takes one of the following measures with regard to an Obligation: a moratorium, a standstill of payments, an extension of payments or a deferral of payments.

A prerequisite for the occurrence of this Credit Event is also that an Obligation is not paid at all or not paid within the stated time frame. This also applies if a restructuring of the Obligation takes place.

In all situations, the threshold values described in the Final Terms with regard to the relevant Obligation must be taken into account.

- (v) **Potential Obligation Acceleration:** The Credit Event Potential Obligation Acceleration can occur in all types of Reference Entities.

It occurs, for example, if one or more Obligations of a Reference Entity could be terminated or accelerated. Reason: non-performance of the Obligation or another breach of contract.

- (vi) **Credit Event Obligation Acceleration:** The Credit Event Obligation Acceleration can occur in all types of Reference Entities.

A Credit Event Obligation Acceleration occurs, for example, in the following situations:

One or more Obligations of a Reference Entity are accelerated. Reason: There is a breach of contract by the Reference Entity, or grounds for termination contained in the Conditions or a similar event occurs.

In all cases, the threshold values described in the Final Terms with regard to the affected Obligation must be taken into account.

- (vii) **Credit Event Governmental Intervention:** The Credit Event Governmental Intervention can occur in the case of financial institutions.

6. Description of the Securities

There is a Governmental Intervention, for example, if the interest rate or the amount of principal is reduced for an unsubordinated Obligation of the Reference Entity. Governmental Intervention also exists if the due date is extended, payments are deferred or the ranking of the unsubordinated Obligation is adversely changed.

The Governmental Intervention occurs by means of a measure or announcement by a Governmental Authority which is binding for the Reference Entity. This can also occur on the basis of a provision in the law which involves the recovery or resolution of the Reference Entity (or a comparable legal provision).

Governmental Intervention exists, for example, also in the following situations: Claims of creditors under an unsubordinated Obligation are expropriated, transferred or terminated or are subject to a mandatory exchange.

It is irrelevant in this regard, whether the contracts about the relevant Obligations expressly provide for such Governmental Intervention. Therefore, you should pay attention to the following with regard to the application of this Credit Event in the case of a Reference Entity:

The applicable law governing recoveries and resolutions for a financial institution can authorise substantial impact and intervention in the Obligations of a financial institution. Measures up to and including a reduction of the debt are conceivable. These measures can already be taken in advance of insolvency. Such measures can especially be carried out if the financial institution threatens to fail or if there is reason to fear the cancellation of the banking license.

In the case of Securities which refer to **financial institutions**, the following must especially be considered: **They depend to a high degree on the content and scope of the applicable national legislation on recoveries and resolutions.**

A Credit Event which is relevant for the Securities must occur within the Observation Period set out in the Final Terms. In special situations, the Credit Event can also occur after the end of the Observation Period. This is the case if a notice of a potentially occurring Credit Event has been issued.

Furthermore, the Issuer must publish a Credit Event in the so-called Credit Event Notice within the Observation Period. In special situations, the Issuer can publish this notice also at the latest within one year after the end of the Observation Period.

You will find the further Requirements for the Occurrence of a Credit Event in Sections 6.2.7, 6.3.7, 6.4.7, 6.5.8, 6.6.8 and 6.7.8.

6.1.6 Deferral of payments

The Issuer can defer payments on the Securities. The Requirements for a Payment Deferral must be satisfied for this purpose.

6. Description of the Securities

The provision has the following background: In certain situations, the Issuer needs time in order to learn whether a Credit Event exists. The Issuer can especially wait to see what resolution the ISDA Determination Committee adopts. The ISDA Determination Committee examines the issue of whether a circumstance exists at the Reference Entity which can constitute a Credit Event.

In the case of the applicability of the Credit Event Repudiation/Moratorium, a deferral within the time periods set forth in the Conditions is permissible. This applies under two prerequisites: The Occurrence of this Credit Event threatens due to a corresponding announcement. The determinative, outstanding payment Obligation of the relevant Reference Entity, however, is not yet due and could still be fulfilled.

In the case of the Credit Event Failure to Pay, the Final Terms can provide that a grace period will be fully taken into account: A payment deferral occurs if a Credit Event threatens due to a corresponding payment which has not been made. The determinative, outstanding payment obligation of the Reference Entity is due, but could not yet be fulfilled.

The payment deferral can be for up to one year and five Banking Days. You will find details about this in the Sections 6.2.3, 6.2.6, 6.2.8, 6.3.3, 6.3.6, 6.3.8, 6.4.3, 6.4.6, 6.4.8, 6.5.3, 6.5.7, 6.5.9, 6.6.4, 6.6.7, 6.6.9, 6.7.4, 6.7.7 and 6.7.9.

6.2 Product Type 1: Features of the Securities which refer to a single company

6.2.1 Interest during the term when a Credit Event has not occurred

You receive payments of interest on the Securities on the Interest Payment Dates. The prerequisite for the interest payments is that no Credit Event has occurred with regard to the Reference Entity.

(a) Fixed interest Securities

The fixed interest Securities bear interest during the entire term at a fixed Interest Rate. The Interest Rate is set out in the Final Terms. It relates to the Nominal Amount.

The Interest Amount is paid to you in arrears on the Interest Payment Date(s). A specific Banking Day Convention will be observed in this regard. It determines when the Interest Amount is paid to you if the Interest Payment Date is not a Banking Day. The respectively applicable Banking Day Convention will be set forth in the Final Terms. The Banking Day Convention can have the result that an adjustment of the Interest Amount is made if the payment of interest is moved. The Banking Day Convention, however, can also have the result that no adjustment of the Interest Amount is made, although the payment of interest is moved.

(b) Securities with step-up interest

The Securities with step-up interest bear interest during the entire term at an interest rate which is fixed for each Interest Period. The Interest Rate for an Interest Period can increase, fall or remain the same compared to the previous Interest Rate. The applicable Interest Rate for each Interest Period will be set out in the Final Terms. It refers to the Nominal Amount.

6. Description of the Securities

The Interest Amount is paid to you in arrears on the Interest Payment Date(s). A specific Banking Day Convention will be observed in this regard. It determines when the Interest Amount is paid to you if the Interest Payment Date is not a Banking Day. The respectively applicable Banking Day Convention will be set forth in the Final Terms. The Banking Day Convention can have the result that an adjustment of the Interest Amount is made if the payment of interest is moved. The Banking Day Convention, however, can also have the result that no adjustment of the Interest Amount is made, although the payment of interest is moved.

(c) *Securities with floating interest linked to a Reference Rate*

The Interest Rate for each Interest Period is specified depending on the respective Reference Rate.

- For Securities with a floating Interest Rate, the interest for the relevant Interest Period is equal to the Reference Rate on the relevant Interest Determination Date. The Final Terms can provide for a fixed Interest Rate for one or more specific Interest Periods.
- For Securities with an Interest Rate Difference, the interest for the respective Interest Period is equal to the difference between the Reference Rate (1) and the Reference Rate (2) on the relevant Interest Determination Date. The Final Terms can provide for a fixed Interest Rate for one or more specific Interest Periods.

The Reference Rate may either be the EURIBOR® or the LIBOR as displayed on a specific Screen Page. It may be specified that for the calculation of the Interest Rate a Premium is added to or a Discount is deducted from the Reference Rate. In addition or alternatively, it may be specified that the Reference Rate is multiplied by a Factor. A Maximum Interest Rate or a Minimum Interest Rate may be specified for all or specific Interest Periods.

The Final Terms specify where Information on the Reference Rate may be obtained, including information on where electronic information on past and future developments of the Reference Rate and its volatility may be found and if such Information is available free of charge or not.

The Reference Rates EURIBOR® and LIBOR (as specified in the applicable Final Terms) are respectively provided by the European Money Markets Institute ("**EMMI**") and the ICE Benchmark Administration Limited ("**ICE**"). For the purposes of Regulation (EU) No. 2016/1011 of the European Parliament and of the Council of 8 June 2016 (the "**Benchmark Regulation**"), each of EMMI and ICE are included in ESMA's register of administrators under Article 36 of the Benchmark Regulation as at the date of this Base Prospectus.

If, during the term of the Securities, the Reference Rate is not provided or may no longer be used (for example for regulatory reasons) or the Reference Rate changes significantly, the Reference Rate shall be replaced by the Calculation Agent by a reference rate that is economically appropriate. The Calculation Agent determines the Replacement Reference Rate in its reasonable discretion (§ 315 et seq. BGB).

6.2.2 Interest after the occurrence of a Credit Event

If a Credit Event occurs at a Reference Entity, the interest accrual ceases early, or there is not even any interest. The Final Terms can provide that the interest accrual ceases on the Interest Payment Date which precedes the corresponding Credit Event Effective Date. The Securities then no longer bear interest for the time between the previous Interest Payment Date and the Settlement Date.

If no Interest Payment Date precedes the Credit Event Notice, the Securities will not bear any interest in this situation.

The Final Terms can provide, in the alternative, that the interest accrual ceases on the corresponding Credit Event Effective Date. The Securities will then bear interest from the commencement of interest or the last Interest Payment Date until the corresponding Credit Event Effective Date. The payment of the Interest Amount is made on the Settlement Date.

6.2.3 Deferred payment of Interest Amounts

If the Requirements for a Payment Deferral exist, the Issuer can pay the Interest Amount that becomes due on the relevant Interest Payment Date. Deferred interest payments are made at the latest on the Deferred Interest Payment Date or on the Deferred Redemption Date. The Issuer is not required to pay additional interest to you for the period of the deferral.

6.2.4 Redemption upon maturity when a Credit Event does not occur

You receive the Nominal Amount on the Scheduled Maturity Date. The prerequisite is that no Credit Event has occurred with regard to the Reference Entity.

6.2.5 Redemption after the occurrence of a Credit Event

If a Credit Event occurs at the Reference Entity, the Issuer does not have to redeem the Nominal Amount to you. Instead, you receive the Credit Event Redemption Amount on the Settlement Date.

6.2.6 Deferred redemption at the Nominal Amount

If the Requirements for a Payment Deferral exist, the Issuer can defer the redemption of the Nominal Amount. The deferred redemption of the Nominal Amount is then made at the latest on the Deferred Redemption Date. The Issuer is not required to pay to you additional interest or other amounts for the period of the deferral.

6.2.7 Requirements for the Occurrence of a Credit Event

The Requirements for the Occurrence of a Credit Event are fulfilled in the following situations:

- (1) A Credit Event occurs within the Observation Period. The Issuer also issues a Credit Event Notice with regard to this Credit Event within the Observation Period. Or

6. Description of the Securities

- (2) in addition, if the basic situation (2) does not exist with regard to the timing:
- (a) A Credit Event occurs within the Observation Period. The Issuer also publishes a Credit Event Notice within one year after the Credit Event Resolution Request Date. Such a Credit Event Notice can also be issued after the Observation Period. Or:
 - (b) In the event that the Final Terms provide for the Credit Event Repudiation/Moratorium for the Reference Entity, the following additionally applies:

A Potential Repudiation/Moratorium occurs within the Observation Period. The Issuer announces this in a Potential Repudiation/Moratorium Notice. The Credit Event then occurs within one year after this notice. The Issuer announces this in a Credit Event Notice with regard to this Credit Event within this year. Such a Credit Event can occur and such a Credit Event Notice can be issued also after the Observation Period.
 - (c) In the event that the Final Terms provide that a Grace Period will be fully taken into account in the case of a Credit Event Failure to Pay, the following additionally applies:

A Potential Failure to Pay occurs within the Observation Period. The Issuer announces this in a Potential Failure to Pay Notice. The Credit Event occurs within one year after this notice. The Issuer announces this in a Credit Event Notice with regard to this Credit Event within this year. Such a Credit Event can occur and such a Credit Event Notice can also be issued after the Observation Period.

The Credit Event Resolution Request Date is the date on which such a request is submitted to the ISDA. In accordance with this request, the ISDA Determination Committee is supposed to resolve whether facts exist which can constitute a Credit Event within the meaning of the Securities.

A Potential Repudiation/Moratorium Notice exists under the following prerequisites: The Issuer publishes the occurrence and the date of the occurrence of a Potential Repudiation/Moratorium. This notice must refer to a Potential Repudiation/Moratorium which has occurred within the Observation Period.

A Potential Failure to Pay Notice exists under the following prerequisites: The Issuer publishes the occurrence and the date of the occurrence of a Potential Failure to Pay. This notice must refer to a Potential Failure to Pay which occurs within the Observation Period.

The Credit Event Effective Date is the earlier of the two following points in time:

- (i) the date which immediately precedes the Credit Event Resolution Request Date (to the extent there is such a date), or
- (ii) the date which immediately precedes the date of the Credit Event Notice.

6.2.8 Requirements for a Payment Deferral

It can take a long time until the Issuer has determined a Credit Event. Therefore, the Issuer can defer payments on the Securities. The reason for the deferral: At the point in time of payment, it is not clear whether the Requirements for the Occurrence of a Credit Event are fulfilled.

The Requirements for a Payment Deferral exist in the following situations:

- (1) Credit Event Resolution Request Date occurs within the Observation Period. Or:
- (2) In the event that the Final Terms provide for a Credit Event Repudiation/Moratorium for the Reference Entity: The Issuer issues a Potential Repudiation/Moratorium Notice within the Observation Period. Or:
- (3) In the event that the Final Terms provide that a Grace Period will be fully taken into account in the case of a Credit Event Failure to Pay: The Issuer issues a Potential Failure to Pay a Notice within the Observation Period.

The payment deferral is permissible for a period of up to one year. The period begins with the Credit Event Resolution Request Date. In the alternative, it can also begin with the Potential Repudiation/Moratorium Notice or a Potential Failure to Pay Notice.

If no Credit Event Notice is issued within this year, the Issuer will pay the deferred payments at the latest on the Deferred Interest Payment Date or the Deferred Redemption Date.

The Deferred Interest Payment Date or the Deferred Redemption Date is the date which falls one year and five Banking Days

- after the Credit Event Resolution Request Date, or
- after the Potential Repudiation/Moratorium Notice, or
- after the Potential Failure to Pay Notice.

6.5.1 Weighted Amounts

In the case of Securities with multiple Reference Entities, a mathematical portion of the Nominal Amount of the Note is attributed to each Reference Entity. The amount of the portion corresponds to the weighting of the Reference Entity (the "**Weighted Amount**"). The weighting of the Reference Entities is the same. The respective Weighted Amount is the relevant portion of the Nominal Amount which can be affected by a Credit Event at the respective Reference Entity.

Example:

Nominal Amount: EUR 10,000.

Number of Reference Entities: 4.

Weighted Amount for each Reference Entity: EUR 2,500.

If a Credit Event occurs at one or more Reference Entity(ies), the interest payments and redemption are subsequently based on the Reduced Nominal Amount.

The Reduced Nominal Amount is determined as follows: Nominal Amount minus the sum of the Weighted Amounts of those Reference Entities for which a Credit Event has occurred.

Example:

Nominal Amount: EUR 10,000.

Number of Reference Entities: 4.

Credit Event occurs at one Reference Entity.

Reduced Nominal Amount: 7,500.

You should pay attention that a Credit Event can occur with regard to all Reference Entities in this Product Type. This then leads to continuing reductions or even to a complete elimination of interest. Furthermore, the Reduced Nominal Amount is continuously reduced. It can even decrease to zero (0). This is the case if a Credit Event occurs at all Reference Entities. The further details of how these Securities function are described below.

6.5.2 Interest during the term when a Credit Event has not occurred

You receive payments of interest on the Securities on the Interest Payment Dates. The prerequisite for the interest payments is that no Credit Event has occurred with regard to one or more Reference Entities.

(a) Fixed interest Securities

The fixed interest Securities bear interest during the entire term at a fixed Interest Rate. The Interest Rate is set out in the Final Terms. It relates to the Nominal Amount.

The Interest Amount is paid to you in arrears on the Interest Payment Date(s). A specific Banking Day Convention will be observed in this regard. It determines when the Interest Amount is paid to you if the Interest Payment Date is not a Banking Day. The respectively applicable Banking Day Convention will be set forth in the Final Terms. The Banking Day Convention can have the result that an adjustment of the Interest Amount is made if the payment of interest is moved. The Banking Day Convention, however, can also have the result that no adjustment of the Interest Amount is made, although the payment of interest is moved.

(b) Securities with step-up interest

The Securities with step-up interest bear interest during the entire term at an interest rate which is fixed for each Interest Period. The Interest Rate for an Interest Period can increase, fall or remain the same compared to the previous Interest Rate. The applicable Interest Rate for each Interest Period will be set out in the Final Terms. It refers to the Nominal Amount.

The Interest Amount is paid to you in arrears on the Interest Payment Date(s). A specific Banking Day Convention will be observed in this regard. It determines when the Interest Amount is paid to you if the Interest Payment Date is not a Banking Day. The respectively applicable Banking Day Convention will be set forth in the Final Terms. The Banking Day Convention can have the result that an adjustment of the Interest Amount is made if the payment of interest is moved. The Banking Day Convention, however, can also have the result that no adjustment of the Interest Amount is made, although the payment of interest is moved.

(c) Securities with floating interest linked to a Reference Rate

The Interest Rate for each Interest Period is specified depending on the respective Reference Rate.

- For Securities with a floating Interest Rate, the interest for the relevant Interest Period is equal to the Reference Rate on the relevant Interest Determination Date. The Final Terms can provide for a fixed Interest Rate for one or more specific Interest Periods.
- For Securities with an Interest Rate Difference, the interest for the respective Interest Period is equal to the difference between the Reference Rate (1) and the Reference Rate (2) on the relevant Interest Determination Date. The Final Terms can provide for a fixed Interest Rate for one or more specific Interest Periods.

The Reference Rate may either be the EURIBOR® or the LIBOR as displayed on a specific Screen Page. It may be specified that for the calculation of the Interest Rate a Premium is added to or a Discount is deducted from the Reference Rate. In addition or alternatively, it may be specified that the Reference Rate is multiplied by a Factor. A Maximum Interest Rate or a Minimum Interest Rate may be specified for all or specific Interest Periods.

6. Description of the Securities

The Final Terms specify where Information on the Reference Rate may be obtained, including information on where electronic information on past and future developments of the Reference Rate and its volatility may be found and if such Information is available free of charge or not.

The Reference Rates EURIBOR® and LIBOR (as specified in the applicable Final Terms) are respectively provided by the European Money Markets Institute ("EMMI") and the ICE Benchmark Administration Limited ("ICE"). For the purposes of Regulation (EU) No. 2016/1011 of the European Parliament and of the Council of 8 June 2016 (the "**Benchmark Regulation**"), each of EMMI and ICE are included in ESMA's register of administrators under Article 36 of the Benchmark Regulation as at the date of this Base Prospectus.

If, during the term of the Securities, the Reference Rate is not provided or may no longer be used (for example for regulatory reasons) or the Reference Rate changes significantly, the Reference Rate shall be replaced by the Calculation Agent by a reference rate that is economically appropriate. The Calculation Agent determines the Replacement Reference Rate in its reasonable discretion (§ 315 et seq. BGB).

6.5.3 Interest after the occurrence of a Credit Event

If a Credit Event occurs at one or more Reference Entities, the interest accrual on the Securities is subsequently based on the Reduced Nominal Amount. The Final Terms can provide that the interest accrual on the Reduced Nominal Amount commences on the Interest Payment Date which precedes the corresponding Credit Event Effective Date. If there is no previous Interest Payment Date, the interest on the Reduced Nominal Amount starts to run when the interest commences. The payment of the Interest Amount for the Reduced Nominal Amount is made for the first time on the Interest Payment Date which follows the corresponding Credit Event Effective Date.

In the alternative, the Final Terms can provide that the interest accrual on the Reduced Nominal Amount will commence on the corresponding Credit Effective Date. In this event, the Interest Amount attributable to the Weighted Amount of the relevant Reference Entity is paid on the Settlement Date. The payment of the Interest Amount for the Reduced Nominal Amount is made on the next Interest Payment Date.

If a Credit Event has occurred at all Reference Entities, the Reduced Nominal Amount is zero (0). The interest accrual on the Securities then ceases on the preceding Interest Payment Date or no interest accrue at all. In the alternative, the Final Terms provide that the interest accrual ceases on the date of publication of the last Credit Event Notice.

Example:

Nominal Amount: EUR 10,000.

Interest Rate: 3%.

Reference Entities A, B, C and D.

Credit Event occurs at Reference Entity D.

Reduced Nominal Amount: EUR 7,500 (effective at the beginning of the Interest Period).

Interest Amount after the occurrence of the Interest Event: EUR 225 (3% on EUR 7,500).

6.5.4 Deferred payment of Interest Amounts

If the Requirements for a Payment Deferral exist with regard to one or more Reference Entities, future Interest Payments can be deferred. The deferral relates to the entire Interest Amount.

Deferred interest payments are made at the latest on the Deferred Interest Payment Date or on the Deferred Redemption Date. The Issuer is not required to pay additional interest to you for the period of the deferral.

If it turns out after a payment deferral that a Credit Event has actually occurred, the interest on the Securities is then finally owed only on the then applicable Reduced Nominal Amount (see Section 6.5.3.). This means that you no longer receive the portion of the interest attributable to the Weighted Amount of the affected Reference Entity, depending on the applicable accrual of interest on a Credit Event, or only receive the interest up to the date of publication of the Credit Event Notice.

6.5.5 Redemption upon maturity when a Credit Event does not occur

You receive the Nominal Amount on the Scheduled Maturity Date. The prerequisite is that no Credit Event has occurred with regard to one of the Reference Entities.

6.5.6 Redemption after the occurrence of a Credit Event

If a Credit Event occurs at one or more Reference Entities, the Issuer does not have to redeem the Nominal Amount to you. Instead, you receive the following payments: You receive the Reduced Nominal Amount on the Scheduled Maturity Date. The Credit Event Redemption Amount is paid for each Reference Entity affected by a Credit Event on the respective Settlement Date. The Credit Event Redemption Amount for the affected Reference Entity is determined on the basis of that Reference Entity's Weighted Amount. The respective Settlement Date can fall before or after the Scheduled Maturity Date.

Example:

Nominal Amount: EUR 10,000.

Reference Entities A, B, C and D.

Credit Event occurs at Reference Entities C and D.

Weighted Amount of C: EUR 2,500.

Weighted Amount of D: EUR 2,500.

Reduced Nominal Amount: EUR 5,000.

Auction Final Price for C: 8%.

Auction Final Price for D: 5%.

Credit Event Redemption Amount based on the Weighted Amount of C: EUR 200.

Credit Event Redemption Amount based on the Weighted Amount of D: EUR 125.

You accordingly receive EUR 5,325 instead of EUR 10,000.

If a Credit Event occurs with regard to all Reference Entities, the Reduced Nominal Amount is zero (0). You then only receive the respective Credit Event Redemption Amount with regard to each Reference Entity.

6.5.7 Deferred Redemption

If the Requirements for a Payment Deferral exist at one or more Reference Entities, the Issuer can defer the redemption. The deferral is based on the total Nominal Amount or the Reduced Nominal Amount. The Issuer can also defer the interest payment (see Section 6.5.4).

The Issuer is not required to pay to you additional interest or other amounts for the period of the deferral.

6.5.8 Requirements for the Occurrence of a Credit Event

The Requirements for the Occurrence of a Credit Event are fulfilled with regard to one Reference Entity in the following situations:

- (1) A Credit Event occurs within the Observation Period with regard to one or more Reference Entities. The Issuer also issues a Credit Event Notice with regard to the respective Credit Event within the Observation Period. Or
- (2) in addition, if the basic situation (2) does not exist with regard to the timing:

6. Description of the Securities

(a) A Credit Event occurs with regard to one or more Reference Entities within the Observation Period. The Issuer also publishes a Credit Event Notice within one year after the Credit Event Resolution Request Date. Such a Credit Event Notice can also be issued after the Observation Period. Or:

(b) If the Final Terms provide for the Credit Event Repudiation/Moratorium for the Reference Entity(ies), the following additionally applies:

A Potential Repudiation/Moratorium occurs at one or more Reference Entities within the Observation Period. The Issuer announces this in a Potential Repudiation/Moratorium Notice. The Credit Event then occurs within one year after this notice. The Issuer announces this in a Credit Event Notice with regard to the Credit Event within this year. Such a Credit Event can occur and such a Credit Event Notice can be issued also after the Observation Period.

(c) In the event that the Final Terms provide that a Grace Period will be fully taken into account in the case of a Credit Event Failure to Pay, the following additionally applies:

A Potential Failure to Pay occurs within the Observation Period. The Issuer announces this in a Potential Failure to Pay Notice. The Credit Event occurs within one year after this notice. The Issuer announces this in a Credit Event Notice with regard to this Credit Event within this year. Such a Credit Event can occur and such a Credit Event Notice can also be issued after the Observation Period.

The Credit Event Resolution Request Date is the date on which such a request is submitted to the ISDA. In accordance with this request, the ISDA Determination Committee is supposed to resolve whether facts exist which can constitute a Credit Event within the meaning of the Securities.

A Potential Repudiation/Moratorium Notice exists under the following prerequisites: The Issuer publishes the occurrence and the date of the occurrence of a Potential Repudiation/Moratorium. The Notice of a Potential Repudiation/Moratorium must refer to a Potential Repudiation/Moratorium which has occurred within the Observation Period.

A Potential Failure to Pay Notice exists under the following prerequisites: The Issuer publishes the occurrence and the date of the occurrence of a Potential Failure to Pay. This notice must refer to a Potential Failure to Pay which occurs within the Observation Period.

The Credit Event Effective Date is the earlier of the two following points in time:

- (i) the date which immediately precedes the Credit Event Resolution Request Date (to the extent there is such a date), or
- (ii) the date which immediately precedes the date of the Credit Event Notice.

6.5.9 Requirements for a Payment Deferral

It can take a long time until the Issuer has determined a Credit Event with regard to one or more Reference Entities. Therefore, the Issuer can defer payments on the Securities. The reason for the deferral: At the point in time of payment, it is not clear whether the Requirements for the Occurrence of a Credit Event are fulfilled.

The Requirements for a Payment Deferral exist in the following situations with regard to one or more Reference Entities:

- (1) Credit Event Resolution Request Date with regard to one or more Reference Entities occurs within the Observation Period. Or:
- (2) In the event that the Final Terms provide for a Credit Event Repudiation/Moratorium for the Reference Entity(ies): The Issuer issues a Potential Repudiation/Moratorium Notice with regard to one or more Reference Entities within the Observation Period. Or:
- (3) In the event that the Final Terms provide that a Grace Period will be fully taken into account in the case of a Credit Event Failure to Pay: The Issuer issues a Potential Failure to Pay Notice within the Observation Period.

The payment deferral is permissible for a period of up to one year. The period begins with the Credit Event Resolution Request Date. In the alternative, it can also begin with the Potential Repudiation/Moratorium Notice or a Potential Failure to Pay Notice.

If no Credit Event Notice is issued within this year, the Issuer will pay the deferred payments at the latest on the respective Deferred Interest Payment Date or the Deferred Redemption Date.

The Deferred Interest Payment Date or the Deferred Redemption Date for the relevant Reference Entity is the date which falls one year and five Banking Days

- after the Credit Event Resolution Request Date, or
- after the Potential Repudiation/Moratorium Notice or
- after the Potential Failure to Pay Notice.

6.6 Product Type 5: Features of the Securities which refer to multiple countries as the Reference Entities

6.6.1 Weighted Amounts

See on this aspect the description for Product Type 4 at point 6.5.1.

6.6.2 Interest during the term when a Credit Event has not occurred

You receive payments of interest on the Securities on the Interest Payment Dates. The prerequisite for the interest payments is that no Credit Event has occurred with regard to one or more Reference Entities.

(a) Fixed interest Securities

The fixed interest Securities bear interest during the entire term at a fixed Interest Rate. The Interest Rate is set out in the Final Terms. It relates to the Nominal Amount.

The Interest Amount is paid to you in arrears on the Interest Payment Date(s). A specific Banking Day Convention will be observed in this regard. It determines when the Interest Amount is paid to you if the Interest Payment Date is not a Banking Day. The respectively applicable Banking Day Convention will be set forth in the Final Terms. The Banking Day Convention can have the result that an adjustment of the Interest Amount is made if the payment of interest is moved. The Banking Day Convention, however, can also have the result that no adjustment of the Interest Amount is made, although the payment of interest is moved.

(b) Securities with step-up interest

The Securities with step-up interest bear interest during the entire term at an interest rate which is fixed for each Interest Period. The Interest Rate for an Interest Period can increase, fall or remain the same compared to the previous Interest Rate. The applicable Interest Rate for each Interest Period will be set out in the Final Terms. It refers to the Nominal Amount.

The Interest Amount is paid to you in arrears on the Interest Payment Date(s). A specific Banking Day Convention will be observed in this regard. It determines when the Interest Amount is paid to you if the Interest Payment Date is not a Banking Day. The respectively applicable Banking Day Convention will be set forth in the Final Terms. The Banking Day Convention can have the result that an adjustment of the Interest Amount is made if the payment of interest is moved. The Banking Day Convention, however, can also have the result that no adjustment of the Interest Amount is made, although the payment of interest is moved.

(c) Securities with floating interest linked to a Reference Rate

The Interest Rate for each Interest Period is specified depending on the respective Reference Rate.

- For Securities with a floating Interest Rate, the interest for the relevant Interest Period is equal to the Reference Rate on the relevant Interest Determination Date. The Final Terms can provide for a fixed Interest Rate for one or more specific Interest Periods.
- For Securities with an Interest Rate Difference, the interest for the respective Interest Period is equal to the difference between the Reference Rate (1) and the Reference Rate (2) on the relevant Interest Determination Date. The Final Terms can provide for a fixed Interest Rate for one or more specific Interest Periods.

The Reference Rate may either be the EURIBOR® or the LIBOR as displayed on a specific Screen Page. It may be specified that for the calculation of the Interest Rate a Premium is added to or a Discount is deducted from the Reference Rate. In addition or alternatively, it may be specified that the Reference Rate is multiplied by a Factor. A Maximum Interest Rate or a Minimum Interest Rate may be specified for all or specific Interest Periods.

6. Description of the Securities

The Final Terms specify where Information on the Reference Rate may be obtained, including information on where electronic information on past and future developments of the Reference Rate and its volatility may be found and if such Information is available free of charge or not.

The Reference Rates EURIBOR® and LIBOR (as specified in the applicable Final Terms) are respectively provided by the European Money Markets Institute ("EMMI") and the ICE Benchmark Administration Limited ("ICE"). For the purposes of Regulation (EU) No. 2016/1011 of the European Parliament and of the Council of 8 June 2016 (the "**Benchmark Regulation**"), each of EMMI and ICE are included in ESMA's register of administrators under Article 36 of the Benchmark Regulation as at the date of this Base Prospectus.

If, during the term of the Securities, the Reference Rate is not provided or may no longer be used (for example for regulatory reasons) or the Reference Rate changes significantly, the Reference Rate shall be replaced by the Calculation Agent by a reference rate that is economically appropriate. The Calculation Agent determines the Replacement Reference Rate in its reasonable discretion (§ 315 et seq. BGB).

6.6.3 Interest after the occurrence of a Credit Event

If a Credit Event occurs at one or more Reference Entities, the interest accrual on the Securities is subsequently based on the Reduced Nominal Amount. The Final Terms can provide that the interest accrual on the Reduced Nominal Amount commences on the Interest Payment Date which precedes the corresponding Credit Event Effective Date. If there is no previous Interest Payment Date, the interest on the Reduced Nominal Amount starts to run when the interest commences. The payment of the Interest Amount for the Reduced Nominal Amount is made for the first time on the Interest Payment Date which follows the corresponding Credit Event Effective Date.

In the alternative, the Final Terms can provide that the interest accrual on the Reduced Nominal Amount will commence on the corresponding Credit Effective Date. In this event, the Interest Amount attributable to the Weighted Amount of the relevant Reference Entity is paid on the Settlement Date. The payment of the Interest Amount for the Reduced Nominal Amount is made on the next Interest Payment Date.

If a Credit Event has occurred at all Reference Entities, the Reduced Nominal Amount is zero (0). The interest accrual on the Securities then ceases on the preceding Interest Payment Date or no interest accrue at all. In the alternative, the Final Terms provide that the interest accrual ceases on the date of publication of the last Credit Event Notice.

Example:

Nominal Amount: EUR 10,000.

Interest Rate: 3%.

Reference Entities A, B, C and D.

Credit Event occurs at Reference Entity D.

Reduced Nominal Amount: EUR 7,500 (effective at the beginning of the Interest Period).

Interest Amount after the occurrence of the Interest Event: EUR 225 (3% on EUR 7,500).

6.6.4 Deferred payment of Interest Amounts

If the Requirements for a Payment Deferral exist with regard to one or more Reference Entities, future Interest Payments can be deferred. The deferral relates to the entire Interest Amount.

Deferred interest payments are made at the latest on the Deferred Interest Payment Date or on the Deferred Redemption Date. The Issuer is not required to pay additional interest to you for the period of the deferral.

If it turns out after a payment deferral that a Credit Event has actually occurred, the interest on the Securities is then finally owed only on the then applicable Reduced Nominal Amount (see Section 6.5.3.). This means that you no longer receive the portion of the interest attributable to the Weighted Amount of the affected Reference Entity, depending on the applicable accrual of interest on a Credit Event, or only receive the interest up to the date of publication of the Credit Event Notice.

6.6.5 Redemption upon maturity when a Credit Event does not occur

You receive the Nominal Amount on the Scheduled Maturity Date. The prerequisite is that no Credit Event has occurred with regard to one of the Reference Entities.

6.6.6 Redemption after the occurrence of a Credit Event

If a Credit Event occurs at one or more Reference Entities, the Issuer does not have to redeem the Nominal Amount to you. Instead, you receive the following payments: You receive the Reduced Nominal Amount on the Scheduled Maturity Date. The Credit Event Redemption Amount is paid for each Reference Entity affected by a Credit Event on the respective Settlement Date. The Credit Event Redemption Amount for the affected Reference Entity is determined on the basis of that Reference Entity's Weighted Amount. The respective Settlement Date can fall before or after the Scheduled Maturity Date.

Example:

Nominal Amount: EUR 10,000.

Reference Entities A, B, C and D.

Credit Event occurs at Reference Entities C and D.

Weighted Amount of C: EUR 2,500.

Weighted Amount of D: EUR 2,500.

Reduced Nominal Amount: EUR 5,000.

Auction Final Price for C: 8%.

Auction Final Price for D: 5%.

Credit Event Redemption Amount based on the Weighted Amount of C: EUR 200.

Credit Event Redemption Amount based on the Weighted Amount of D: EUR 125.

You accordingly receive EUR 5,325 instead of EUR 10,000.

If a Credit Event occurs with regard to all Reference Entities, the Reduced Nominal Amount is zero (0). You then only receive the respective Credit Event Redemption Amount with regard to each Reference Entity.

6.6.7 Deferred Redemption

If the Requirements for a Payment Deferral exist at one or more Reference Entities, the Issuer can defer the redemption. The deferral is based on the total Nominal Amount or the Reduced Nominal Amount. The Issuer can also defer the interest payment (see Section 6.5.4).

The Issuer is not required to pay to you additional interest or other amounts for the period of the deferral.

6.6.8 Requirements for the Occurrence of a Credit Event

The Requirements for the Occurrence of a Credit Event are fulfilled with regard to one Reference Entity in the following situations:

- (1) A Credit Event occurs within the Observation Period with regard to one or more Reference Entities. The Issuer also issues a Credit Event Notice with regard to the respective Credit Event within the Observation Period. Or
- (2) in addition, if the basic situation (2) does not exist with regard to the timing:

6. Description of the Securities

- (a) A Credit Event occurs with regard to one or more Reference Entities within the Observation Period. The Issuer also publishes a Credit Event Notice within one year after the Credit Event Resolution Request Date. Such a Credit Event Notice can also be issued after the Observation Period. Or:
- (b) A Potential Repudiation/Moratorium occurs at one or more Reference Entities within the Observation Period. The Issuer announces this in a Potential Repudiation/Moratorium Notice. The Credit Event then occurs within one year after this notice. The Issuer announces this in a Credit Event Notice with regard to the Credit Event within this year. Such a Credit Event can occur and such a Credit Event Notice can be issued also after the Observation Period.
- (c) In the event that the Final Terms provide that a Grace Period will be fully taken into account in the case of a Credit Event Failure to Pay, the following additionally applies:

A Potential Failure to Pay occurs within the Observation Period. The Issuer announces this in a Potential Failure to Pay Notice. The Credit Event occurs within one year after this notice. The Issuer announces this in a Credit Event Notice with regard to this Credit Event within this year. Such a Credit Event can occur and such a Credit Event Notice can also be issued after the Observation Period.

The Credit Event Resolution Request Date is the date on which such a request is submitted to the ISDA. In accordance with this request, the ISDA Determination Committee is supposed to resolve whether facts exist which can constitute a Credit Event within the meaning of the Securities.

A Potential Repudiation/Moratorium Notice exists under the following prerequisites: The Issuer publishes the occurrence and the date of the occurrence of a Potential Repudiation/Moratorium. The Notice of a Potential Repudiation/Moratorium must refer to a Potential Repudiation/Moratorium which has occurred within the Observation Period.

A Potential Failure to Pay Notice exists under the following prerequisites: The Issuer publishes the occurrence and the date of the occurrence of a Potential Failure to Pay. This notice must refer to a Potential Failure to Pay which occurs within the Observation Period.

The Credit Event Effective Date is the earlier of the two following points in time:

- (i) the date which immediately precedes the Credit Event Resolution Request Date (to the extent there is such a date), or
- (ii) the date which immediately precedes the date of the Credit Event Notice.

6.6.9 Requirements for a Payment Deferral

It can take a long time until the Issuer has determined a Credit Event with regard to one or more Reference Entities. Therefore, the Issuer can defer payments on the Securities. The reason for the deferral: At the point in time of payment, it is not clear whether the Requirements for the Occurrence of a Credit Event are fulfilled.

The Requirements for a Payment Deferral exist in the following situations with regard to one or more Reference Entities:

- (1) Credit Event Resolution Request Date with regard to one or more Reference Entities occurs within the Observation Period. Or:
- (2) The Issuer issues a Potential Repudiation/Moratorium Notice with regard to one or more Reference Entities within the Observation Period. Or:
- (3) In the event that the Final Terms provide that a Grace Period will be fully taken into account in the case of a Credit Event Failure to Pay: The Issuer issues a Potential Failure to Pay Notice within the Observation Period.

The payment deferral is permissible for a period of up to one year. The period begins with the Credit Event Resolution Request Date. In the alternative, it can also begin with the Potential Repudiation/Moratorium Notice or a Potential Failure to Pay Notice.

If no Credit Event Notice is issued within this year, the Issuer will pay the deferred payments at the latest on the respective Deferred Interest Payment Date or the Deferred Redemption Date.

The Deferred Interest Payment Date or the Deferred Redemption Date for the relevant Reference Entity is the date which falls one year and five Banking Days

- after the Credit Event Resolution Request Date, or
- after the Potential Repudiation/Moratorium Notice or
- after the Potential Failure to Pay Notice.

(c) Securities with floating interest linked to a Reference Rate

The Interest Rate for each Interest Period is specified depending on the respective Reference Rate.

- For Securities with a floating Interest Rate, the interest for the relevant Interest Period is equal to the Reference Rate on the relevant Interest Determination Date. The Final Terms can provide for a fixed Interest Rate for one or more specific Interest Periods.

6. Description of the Securities

The Final Terms specify where Information on the Reference Rate may be obtained, including information on where electronic information on past and future developments of the Reference Rate and its volatility may be found and if such Information is available free of charge or not.

The Reference Rates EURIBOR® and LIBOR (as specified in the applicable Final Terms) are respectively provided by the European Money Markets Institute ("EMMI") and the ICE Benchmark Administration Limited ("ICE"). For the purposes of Regulation (EU) No. 2016/1011 of the European Parliament and of the Council of 8 June 2016 (the "**Benchmark Regulation**"), each of EMMI and ICE are included in ESMA's register of administrators under Article 36 of the Benchmark Regulation as at the date of this Base Prospectus.

The payment of the Interest Amount for the Reduced Nominal Amount is made on the next Interest Payment Date.

If a Credit Event has occurred at all Reference Entities, the Reduced Nominal Amount is zero (0). The interest accrual on the Securities then ceases on the preceding Interest Payment Date or no interest accrue at all. In the alternative, the Final Terms provide that the interest accrual ceases on the date of publication of the last Credit Event Notice.

Example:

Nominal Amount: EUR 10,000.

Interest Rate: 3%.

Reference Entities A, B, C and D.

Credit Event occurs at Reference Entity D.

Reduced Nominal Amount: EUR 7,500 (effective at the beginning of the Interest Period).

Interest Amount after the occurrence of the Interest Event: EUR 225 (3% on EUR 7,500).

6.7.4 Deferred payment of Interest Amounts

If the Requirements for a Payment Deferral exist with regard to one or more Reference Entities, future Interest Payments can be deferred. The deferral relates to the entire Interest Amount.

Deferred interest payments are made at the latest on the Deferred Interest Payment Date or on the Deferred Redemption Date. The Issuer is not required to pay additional interest to you for the period of the deferral.

If it turns out after a payment deferral that a Credit Event has actually occurred, the interest on the Securities is then finally owed only on the then applicable Reduced Nominal Amount (see Section 6.5.3.). This means that you no longer receive the portion of the interest attributable to the Weighted Amount of the affected Reference Entity, depending on the applicable accrual of interest on a Credit Event, or only receive the interest up to the date of publication of the Credit Event Notice.

6.7.5 Redemption upon maturity when a Credit Event does not occur

You receive the Nominal Amount on the Scheduled Maturity Date. The prerequisite is that no Credit Event has occurred with regard to one of the Reference Entities.

6.7.6 Redemption after the occurrence of a Credit Event

If a Credit Event occurs at one or more Reference Entities, the Issuer does not have to redeem the Nominal Amount to you. Instead, you receive the following payments: You receive the Reduced Nominal Amount on the Scheduled Maturity Date. The Credit Event Redemption Amount is paid for each Reference Entity affected by a Credit Event on the respective Settlement Date. The Credit Event Redemption Amount for the affected Reference Entity is determined on the basis of that Reference Entity's Weighted Amount. The respective Settlement Date can fall before or after the Scheduled Maturity Date.

Example:

Nominal Amount: EUR 10,000.

Reference Entities A, B, C and D.

Credit Event occurs at Reference Entities C and D.

Weighted Amount of C: EUR 2,500.

Weighted Amount of D: EUR 2,500.

Reduced Nominal Amount: EUR 5,000.

Auction Final Price for C: 8%.

Auction Final Price for D: 5%.

Credit Event Redemption Amount based on the Weighted Amount of C: EUR 200.

Credit Event Redemption Amount based on the Weighted Amount of D: EUR 125.

You accordingly receive EUR 5,325 instead of EUR 10,000.

If a Credit Event occurs with regard to all Reference Entities, the Reduced Nominal Amount is zero (0). You then only receive the respective Credit Event Redemption Amount with regard to each Reference Entity.

6.7.7 Deferred Redemption

If the Requirements for a Payment Deferral exist at one or more Reference Entities, the Issuer can defer the redemption. The deferral is based on the total Nominal Amount or the Reduced Nominal Amount. The Issuer can also defer the interest payment (see Section 6.5.4).

The Issuer is not required to pay to you additional interest or other amounts for the period of the deferral.

6.7.8 Requirements for the Occurrence of a Credit Event

The Requirements for the Occurrence of a Credit Event are fulfilled with regard to one Reference Entity in the following situations:

- (1) A Credit Event occurs within the Observation Period with regard to one or more Reference Entities. The Issuer also issues a Credit Event Notice with regard to the respective Credit Event within the Observation Period. Or
- (2) A Credit Event occurs with regard to one or more Reference Entities within the Observation Period. The Issuer also publishes a Credit Event Notice within one year after the Credit

6. Description of the Securities

Event Resolution Request Date. Such a Credit Event Notice can also be issued after the Observation Period.

The Credit Event Resolution Request Date is the date on which such a request is submitted to the ISDA. In accordance with this request, the ISDA Determination Committee is supposed to resolve whether facts exist which can constitute a Credit Event within the meaning of the Securities.

The Credit Event Effective Date is the earlier of the two following points in time:

- (i) the date which immediately precedes the Credit Event Resolution Request Date (to the extent there is such a date), or
- (ii) the date which immediately precedes the date of the Credit Event Notice.

6.7.9 Requirements for a Payment Deferral

It can take a long time until the Issuer has determined a Credit Event with regard to one or more Reference Entities. Therefore, the Issuer can defer payments on the Securities. The reason for the deferral: At the point in time of payment, it is not clear whether the Requirements for the Occurrence of a Credit Event are fulfilled.

The Requirements for a Payment Deferral exist if a Credit Event Resolution Request Date with regard to one or more Reference Entities occurs within the Observation Period.

The payment deferral is permissible for a period of up to one year. The period begins with the Credit Event Resolution Request Date.

If no Credit Event Notice is issued within this year, the Issuer will pay the deferred payments at the latest on the respective Deferred Interest Payment Date or the Deferred Redemption Date.

The Deferred Interest Payment Date or the Deferred Redemption Date for the relevant Reference Entity is the date which falls one year and five Banking Days after the Credit Event Resolution Request Date.

6.8 Further information about the relevant obligations, ISDA and the determination of the Credit Event Redemption Amount

6.8.1 Obligations and Valuation Obligations

Which Obligations of a Reference Entity play a role in determining a Credit Event is set forth in the Final Terms.

Obligations can be:

- (i) payment obligations of the Reference Entity under all forms of borrowed money,
- (ii) payment obligations of the Reference Entity from loans and bonds that have been issued,

6. Description of the Securities

(iii) payment obligations of the Reference Entity exclusively under issued bonds.

The term "Obligation" also includes guarantees of the Reference Entity which are assumed for the above described categories of Obligations.

According to the Conditions, the Credit Event Redemption Amount of a Note can be determined on the basis of the market value of a Valuation Obligation of the Reference Entity. This process is applied if no ISDA auction proceedings are conducted and, therefore, no Auction Final Price is determined for the Reference Entity.

In these situations, the Issuer proceeds as follows: The Issuer selects in its discretion an obligation of the relevant Reference Entity. It is used as a Valuation Obligation. This obligation must satisfy the special criteria for Valuation Obligations set forth in the Conditions. If multiple obligations satisfy these criteria, that obligation of the relevant Reference Entity is the Valuation Obligation which has the lowest price.

In the case of financial institutions, the Final Terms may specify the following status in relation to the Reference Obligation: Senior or Senior non-preferred. Senior non-preferred is an Obligation that ranks in case of bankruptcy below other unsecured senior liabilities of the financial institution. This means the following: The Credit Event Restructuring or Governmental Intervention only occurs if Obligations of the applicable status are affected; any obligation that is subordinated to this status is excluded.

Example:

- The applicable Reference Obligation status of a series of Securities is: Senior.
- A Governmental Intervention occurs in respect of a Senior non-preferred debt instrument.
- This means no Credit Event occurs in respect to such Series of Securities.

Further, if any of the Credit Events occurs, the Final Price will be determined based on the applicable status of the ISDA auction or the Valuation Obligation, as applicable.

6.8.2 ISDA conditions and ISDA auction proceedings

The Conditions of Credit Linked Securities are based on standard for certain financial instruments. These are financial instruments which depend on the occurrence of a credit event at one or more Reference Entities ("**Credit Derivatives**"). These standard terms and conditions are referred to as the "**ISDA Credit Derivatives Definitions**". They were published by the International Swaps and Derivatives Association, Inc. ("**ISDA**") in the year 2014 (the "**ISDA Terms**").

ISDA is a private trading organization. It represents its members in the derivatives market. Members are large institutions as well as privately held and state-owned companies worldwide which trade with derivative financial products referenced to specific underlyings. ISDA has developed the ISDA Terms in concurrence with the members and others participants in the market.

6. Description of the Securities

The ISDA Terms are subject to English law or the law of the State of New York. The ISDA Terms are not published for everyone on the website of ISDA. They can only be obtained in the English language for a charge.

The uniform application of the ISDA Terms is supported by announcements and protocols agreed between ISDA and the market participants (the "**ISDA Statements**"). The ISDA Terms are also applied in resolutions by the "**ISDA Determination Committee**". The members of this body are traders and purchasers of Credit Derivatives. The ISDA Determination Committee serves the purpose of making decisions in connection with the ISDA Terms uniformly for the worldwide credit derivatives market.

Upon the occurrence of a Credit Event with regard to a Reference Entity, ISDA can proceed as follows when applying the ISDA Terms. ISDA conducts an auction which relates to the relevant Reference Entity and its Obligations. The ISDA Determination Committee selects for this purpose Obligations of the Reference Entity. In the course of the auction, market participants submit offer and selling prices with regard to these selected Obligations of the Reference Entity. Selected Obligations can be e.g. certain bonds of the Reference Entity. The parameters of the auction proceedings are determined by the ISDA Determination Committee (so-called auction settlement terms). The Auction Final Price determined in the ISDA auction in accordance with the ISDA Terms is the basis for the settlement of Credit Derivatives which are subject to the ISDA Terms.

6.8.3 Influence of ISDA Resolutions on the Securities

Resolutions of the ISDA Determination Committee have an effect on the Securities when the following prerequisites are satisfied:

- The ISDA resolutions are issued within the periods of time set forth in more detail in the Final Terms.
- The Issuer takes into account the ISDA resolutions when exercising its rights in accordance with the Final Terms.

Examples:

- Publication by ISDA about the occurrence of Credit Event with regard to a Reference Entity with simultaneous publication of the point in time when this occurred.
- Conduct of an ISDA auction with regard to a Reference Entity and determination of an Auction Final Price.

According to the Conditions, the Issuer must make certain determinations in connection with the Credit Event in the Issuer's reasonable discretion (§ 315 BGB). The Issuer takes into account the ISDA Statements and the resolutions of the ISDA Determination Committee when exercising discretion. It is possible that a statement or resolution of the ISDA Determination Committee is not appropriate for the economic substance of the Securities. The reason for this can be deviations

of the Conditions from the ISDA Terms. In this situation, the statement or resolution of the ISDA Determination Committee is not applied. Instead, a result applies which is appropriate for the commercial substance of the Securities. The Issuer determines what is appropriate for the commercial substance of the Securities in the Issuer's reasonable discretion (§ 315 BGB).

Resolutions of the ISDA Determination Committee are published on the website <http://dc.isda.org/credit-default-swaps-management/> or www.isda.org/credit or <http://dc.isda.org/> or a page which replaces them.

6.8.4 Determination of the Final Price which is relevant for the Credit Event Redemption Amount

(a) Use of the Auction Final Price

The Final Price relevant for the Credit Event Redemption Amount normally corresponds to the Auction Final Price determined in the ISDA auction proceedings. Exception: ISDA does not announce any ISDA auction proceedings within the periods of time set forth in the ISDA Terms. ISDA does not conduct any auction within these periods. The Auction Final Price can be well below 100 % of the nominal amount of the outstanding Obligations of the Reference Entity. The Auction Price can even be zero (0) in an extreme situation.

ISDA can carry out multiple ISDA auctions with regard to a Reference Entity which is not a country. This is the situation if ISDA publishes the occurrence of a Credit Event "Restructuring". The ISDA auction process then relates to different maturity categories for the Obligations of the Reference Entity. If ISDA publishes multiple Auction Final Prices in the case of Credit Event Restructuring, the lowest price is the Final Price for purposes of the Securities. If only one ISDA auction takes place, the Auction Final Price generated in this auction is the Final Price. This applies without regard to the maturity category to which the auction relates.

(b) Valuation by the Issuer

If the prerequisites for applying an Auction Final Price for determining the Final Price are not given in accordance with the Conditions, the Final Price is determined as follows: The Issuer determines the market value of the Valuation Obligation of the Reference Entity selected by the Issuer on the Recovery Valuation Date in the Issuer's reasonable discretion (§ 315 BGB). This market value can be well below 100 % of the nominal value of the Valuation Obligation. It can even be zero (0) in an extreme situation.

(c) Deduction of the Swap Unwind Amount

The Credit Event Redemption Amount can also be reduced by deduction of a Swap Unwind Amount by the Issuer. This is determined by the Issuer in its reasonable discretion (§ 315 BGB).

(d) *Special aspects in the case of countries as Reference Entities*

In the case of countries as Reference Entities, the Conditions provide that also other assets can be valued for the purpose of calculating the Final Price. These assets can especially include assets which do not constitute Obligations of the Reference Entity. For example: Assets which replace Obligations of the Reference Entity following a Restructuring as a result of conversion or an exchange. This also applies if the Credit Event designated in the Credit Event Notice is a different Credit Event (for example, a Failure to Pay). The value of these assets can be substantially below the value of other Obligations of the Reference Entity. The value can even be zero (0) in an extreme situation.

(e) *Special aspects for financial institutions as Reference Entities*

The Conditions contain the possibility in the case of Reference Entities which are financial institutions that also other assets can be valued in order to determine the Final Price. These can especially be assets which do not constitute Obligations of the Reference Entity. These can be assets which replace Obligations after a Governmental Intervention as a result of conversion or an exchange.

This also applies if a standard reference obligation of the Reference Entity published by ISDA is the subject of a Restructuring. These standard reference obligations or the assets replacing them can then also be valued. This also applies if the Credit Event mentioned in the Credit Event Notice is a different Credit Event (for example, a Failure to Pay). The value of these assets can be substantially below the value of other Obligations of the Reference Entity. The value can even be zero (0) in an extreme situation.

If and to the extent that binding provisions of effective law or stock exchange provisions provide for other forms of publication, such publications must be made in addition and as provided for.

Other publications with regard to the Securities are published on the Website of the Issuer (or any successor website).

- (2) In addition, the Issuer may deliver all notices concerning the Securities to the Clearing System for communication by the Clearing System to the Security Holders. with § 6. Following such rescission by the Issuer, the Security Holder can instruct his depository bank to submit a duly completed redemption declaration to the Principal Paying Agent on a form available there and by giving all information and declarations required by the form (the "**Redemption Declaration**") and demand the refunding of the Acquisition Price against transfer of the Securities to the account of the Principal Paying Agent with the Clearing System. The Security Holders will be informed of such an offer as well as the amended provisions together with the declaration of rescission in accordance with § 12. Such an offer is deemed to be accepted by the Security Holder (with the effect that the consequences of the rescission do not become effective) if the Security Holder does not within four weeks after the offer becoming effective pursuant to § 12 demand the repayment of the Acquisition Price by submitting a duly completed Redemption Declaration via his depository bank to the Principal Paying Agent and the transfer of the Securities to the account of Principal Paying Agent with the Clearing System in accordance with paragraph (2) above. The Issuer will refer to this effect in the notice.

(4) ***Acquisition Price.***

As used in paragraphs (2) and (3) above, the "**Acquisition Price**" is the actual acquisition price paid by each Security Holder (as stated and confirmed in the Redemption Declaration) or the weighted arithmetic mean of the trading prices of the Securities, as determined by the Issuer in its reasonable discretion (§ 315 BGB), on the Banking Day preceding the declaration of rescission pursuant to paragraph (2) above, respectively, depending on which of these amounts is the higher one.

(5) ***Incomplete or inconsistent provisions.***

The Issuer is entitled to correct or amend incomplete or inconsistent provisions in these Conditions in its reasonable discretion (§ 315 BGB). Only corrections and amendments that are reasonable for the Security Holders taking into account the interests of the Issuer and that in particular do not materially impair the legal and financial situation of the Security Holders will be permitted. The Security Holders will be informed of such corrections and supplementations pursuant to § 12.

(6) ***Adherence to corrected Conditions.***

If the Security Holder was aware of typing or calculation errors or similar errors in these Conditions when purchasing the Securities, the Issuer is entitled to adhere to the Conditions amended accordingly irrespective of paragraphs (2) to (5) above.

- (ii) if there is a Steps Plan, the Issuer shall, for purposes of the determination of a Successor make the appropriate adjustments required to take account of any Obligations of the Reference Entity which are Bonds [or Loans] that are issued, incurred, redeemed, repurchased or cancelled from, and including the legally effective date of the first Succession to, and including, the Succession Date.

If an exchange has occurred, the determination as to whether one of the events described under (i) to (v) above has occurred will be based on a comparison of the terms of the Bond immediately prior to such exchange and the terms of the resulting obligations immediately following such exchange.

The occurrence of, agreement to or announcement of any of the events described in (i) to (v) above shall not constitute a Restructuring:

- (x) if the event occurs due to an administrative adjustment, accounting adjustment or tax adjustment or other technical adjustment occurring in the ordinary course of business; or
- (y) where such event does not directly or indirectly result from a deterioration in the creditworthiness or financial condition of the Reference Entity, provided that in respect of (v) only, no such deterioration in the creditworthiness or financial condition of the Reference Entity is required where the redenomination is from Euros into another currency and occurs as a result of action taken by a Governmental Authority of a member state of the European Union which is of general application in the jurisdiction of such Governmental Authority;

In the case of a Qualifying Guarantee and an Underlying Obligation, references to the Reference Entity in the definition of "Restructuring" shall be deemed to refer to the Underlying Obligor and the reference to the Reference Entity in (y) shall continue to refer to the Reference Entity.]

"Settlement Date" means,

"Succession Event" means an annexation, unification, secession, partition, dissolution, consolidation, reconstitution or other similar event.

- (i) if one entity succeeds, either directly or as a provider of a Relevant Guarantee, to seventy-five per cent or more of the Relevant Obligations of the Reference Entity, that entity will be the sole Successor;
- (ii) if only one entity succeeds, either directly or as a provider of a Relevant Guarantee, to more than twenty-five per cent (but less than seventy-five per cent) of the Relevant Obligations of the Reference Entity, and not more than twenty-five per cent of the Relevant Obligations of the Reference Entity remain with the Reference Entity, the entity that succeeds to more than twenty-five per cent of the Relevant Obligations will be the sole Successor;

erence Entity, and not more than twenty-five per cent of the Relevant Obligations of the Reference Entity remain with the Reference Entity, each entity that succeeds to more than twenty-five per cent of the Relevant Obligations will each be a Successor. [Alternatively, the Issuer may terminate the Securities pursuant to § 6];

- (iv) if more than one entity each succeeds, either directly or as a provider of a Relevant Guarantee, to more than twenty-five per cent of the Relevant Obligations of the Reference Entity, and not more than twenty-five per cent of the Relevant Obligations of the Reference Entity remain with the Reference Entity, each of those entities and the Reference Entity will each be a Successor. [Alternatively, the Issuer may terminate the Securities pursuant to § 6];
- (v) if one or more entities succeed, either directly or as a provider of a Relevant Guarantee, to a portion of the Relevant Obligations of the Reference Entity, but no entity succeeds to more than twenty-five per cent of the Relevant Obligations of the Reference Entity and the Reference Entity continues to exist, there will be no Successor and the Reference Entity will not be changed in any way as a result of such Succession;
- (vi) if one or more entities succeed, either directly or as a provider of a Relevant Guarantee, to a portion of the Relevant Obligations of the Reference Entity, but no entity succeeds to more than twenty-five per cent of the Relevant Obligations of the Reference Entity and the Reference Entity ceases to exist, the entity which succeeds to the greatest percentage of Relevant Obligations will be the Successor (provided that if two or more entities succeed to an equal percentage of Relevant Obligations, each entity will be a Successor).

If the Issuer gives a Credit Event Notice before a Succession Date, no Successor will be determined.

If more than one Successor is identified as a Reference Entity by the Issuer, the following applies:

(y) each such Successor is, from the relevant date, a Reference Entity for the purposes of the Securities with a weighted amount equal to the ratio of the Nominal Amount and the number of Successors as specified in the Successor Notice (the "**Weighted Amount**");

(z) in relation to each of these Reference Entities, a Credit Event may occur. The Conditions shall be applied and interpreted accordingly. In particular, the following principles apply:

- (1) the provisions regarding interest payments and redemption of the Securities in case a Credit Event does not occur pursuant to § 2(1) and § 3(1) and the provi-

sions regarding deferred redemption pursuant to § 2(3) and § 3(3) remain applicable;

- (2) the provisions regarding interest payments in case a Credit Event occurs pursuant to § 2(2) in conjunction with § 5 apply in each case to a Reference Entity affected by a Credit Event and its Weighted Amount and can accordingly be applied multiple times with respect to the Reference Entities. Thus, in case of a Credit Event the Securities do not cease to bear interest. Rather, as of the time specified in § 2(2), the provisions regarding interest payment pursuant to § 2(1) refer to the Nominal Amount less the Weighted Amount of the relevant Reference Entity affected by the Credit Event ("**Reduced Nominal Amount**");
- (3) the provisions regarding redemption of the Securities after the occurrence of a Credit Event pursuant to § 3(2) in conjunction with § 5 apply in each case to a Reference Entity affected by a Credit Event and its Weighted Amount and can accordingly be applied multiple times with respect to the Reference Entities. In addition, the Reduced Nominal Amount will be redeemed on the Scheduled Maturity Date;
- (4) with respect to each of these Reference Entities, a Succession may again occur with one or more Reference Entities. Its Weighted Amount will be divided according to the number of Successors; and
- (5) in respect of a Reference Entity in relation to which the Issuer has published a Credit Event Notice prior to the occurrence of a Succession no Successor will be determined. However, a Reference Entity in relation to which the Issuer has published a Credit Event Notice may become Successor of another Reference Entity in relation to which the Issuer did not publish a Credit Event Notice. In this case, a new Credit Event may occur with respect to the Successor.]

"**Successor Notice**" means an irrevocable notice from the Issuer to the Security Holder pursuant to § 12 in a timely manner after the Issuer becomes aware of the Publicly Available Successor Information that describes

Following such rescission by the Issuer, the Security Holder can instruct his depository bank to submit a duly completed redemption declaration to the Principal Paying Agent on a form available there and by giving all information and declarations required by the form (the "**Redemption Declaration**") and demand the refunding of the Acquisition Price against transfer of the Securities to the account of the Principal Paying Agent with the Clearing System. The Issuer will until at the latest 30 calendar days after receipt of the Redemption Declaration or the Securities by the Principal Paying Agent (whatever is the later date) make the Acquisition Price available to the Principal Paying Agent, which will transfer it to the account listed in the Redemption Declaration. [Alternatively, the Issuer may terminate the Securities pursuant to § 6];

7. Terms and Conditions Product Type 3

- (iv) if more than one entity each succeeds, either directly or as a provider of a Relevant Guarantee, to more than twenty-five per cent of the Relevant Obligations of the Reference Entity, and not more than twenty-five per cent of the Relevant Obligations of the Reference Entity remain with the Reference Entity, each of those entities and the Reference Entity will each be a Successor. [Alternatively, the Issuer may terminate the Securities pursuant to § 6];
- (v) if one or more entities succeed, either directly or as a provider of a Relevant Guarantee, to a portion of the Relevant Obligations of the Reference Entity, but no entity succeeds to more than twenty-five per cent of the Relevant Obligations of the Reference Entity and the Reference Entity continues to exist, there will be no Successor and the Reference Entity will not be changed in any way as a result of such Succession;
- (vi) if one or more entities succeed, either directly or as a provider of a Relevant Guarantee, to a portion of the Relevant Obligations of the Reference Entity, but no entity succeeds to more than twenty-five per cent of the Relevant Obligations of the Reference Entity and the Reference Entity ceases to exist, the entity which succeeds to the greatest percentage of Relevant Obligations will be the Successor (provided that if two or more entities succeed to an equal percentage of Relevant Obligations, each entity will be a Successor);
- (vii) if one entity assumes all of the obligations (including at least one Relevant Obligation) of the Reference Entity, and at the time of the determination either (A) the Reference Entity has ceased to exist, or (B) the Reference Entity is in the process of being dissolved (howsoever described) and the Reference Entity has not issued or incurred any Borrowed Money obligation at any time since the legally effective date of the assumption, such entity will be the sole Successor.

If the Issuer gives a Credit Event Notice before a Succession Date, no Successor will be determined.

If more than one Successor is identified as a Reference Entity by the Issuer, the following applies:

(y) each such Successor is, from the relevant date, a Reference Entity for the purposes of the Securities with a weighted amount equal to the ratio of the Nominal Amount and the number of Successors as specified in the Successor Notice (the "**Weighted Amount**");

(z) in relation to each of these Reference Entities, a Credit Event may occur. The Conditions shall be applied and interpreted accordingly. In particular, the following principles apply:

7. Terms and Conditions Product Type 3

- (1) the provisions regarding interest payments and redemption of the Securities in case a Credit Event does not occur pursuant to § 2(1) and § 3(1) and the provisions regarding deferred redemption pursuant to § 2(3) and § 3(3) remain applicable;
- (2) the provisions regarding interest payments in case a Credit Event occurs pursuant to § 2(2) in conjunction with § 5 apply in each case to a Reference Entity affected by a Credit Event and its Weighted Amount and can accordingly be applied multiple times with respect to the Reference Entities. Thus, in case of a Credit Event the Securities do not cease to bear interest. Rather, as of the time specified in § 2(2), the provisions regarding interest payment pursuant to § 2(1) refer to the Nominal Amount less the Weighted Amount of the relevant Reference Entity affected by the Credit Event ("**Reduced Nominal Amount**");
- (3) the provisions regarding redemption of the Securities after the occurrence of a Credit Event pursuant to § 3(2) in conjunction with § 5 apply in each case to a Reference Entity affected by a Credit Event and its Weighted Amount and can accordingly be applied multiple times with respect to the Reference Entities. In addition, the Reduced Nominal Amount will be redeemed on the Scheduled Maturity Date;
- (4) with respect to each of these Reference Entities, a Succession may again occur with one or more Reference Entities. Its Weighted Amount will be divided according to the number of Successors; and
- (5) in respect of a Reference Entity in relation to which the Issuer has published a Credit Event Notice prior to the occurrence of a Succession no Successor will be determined. However, a Reference Entity in relation to which the Issuer has published a Credit Event Notice may become Successor of another Reference Entity in relation to which the Issuer did not publish a Credit Event Notice. In this case, a new Credit Event may occur with respect to the Successor.]

"**Successor Notice**" means an irrevocable notice from the Issuer to the Security Holder pursuant to § 12 in a timely manner after the Issuer becomes aware of the Publicly Available Successor Information that describes

- (i) the existence of a Successor,
- (ii) the occurrence of a Succession Date within the period beginning on, and including, the Issue Date and ending on, and including, the Final Determination Date;
- (iii) the facts relevant for the determination that a Succession has occurred; and
- (iv) the Publicly Available Successor Information.

7. Terms and Conditions Product Type 3

"**Valuation Obligation**" means

- (i) at the choice of the Issuer a [Bond] [or] [Loan] of the Reference Entity that on the Recovery Valuation Date meets the following criteria:
 - (1) an Obligation payable in, the lawful currency of [Canada, Japan, Switzerland, the United Kingdom and the United States of America and the Euro] [●] or any successor currency to any of the aforementioned currencies;
 - [(2) an Obligation, that [insert applicable additional criteria];]
 - [(3)] [an Obligation, whose remaining term does not exceed 30 years as of the Recovery Valuation Date;]

 - [(5)] [in the case of a Restructuring or Governmental Intervention (even if the Credit Event Notice designates another previously occurring Credit Event) an Obligation that did not arise on or after the Restructuring date.]].

If more than one or more Obligations meet the aforementioned criteria as of that time, the Obligation having the lowest price will be the relevant Obligation; or

- (ii) at the choice of the Issuer, in the event of a Governmental Intervention, even if the Credit Event Notice designates another previously occurring Credit Event;

⁵ A specific Transaction Type will be assigned to each Reference Entity based on its region of origin. E.g.: European financial institution or Australian financial institution.

7. Terms and Conditions
Product Type 3

- (1) any obligation of the Reference Entity which (x) existed immediately prior to such Governmental Intervention, (y) was the subject of such Governmental Intervention and (z) fall within the criteria set out in paragraph (i) in each case immediately preceding the date on which the Governmental Intervention was legally effective; or
 - (2) such equity, amounts of cash, securities, fees (including any "early bird" or other consent fee) rights and/or other assets (each an "**Asset Package**") in the proportion received or obtained by a relevant creditor by way of exchange as conversion of an Obligation pursuant to Section (ii)(1) (which may include said Obligation). If the relevant holder is offered a choice of assets or a choice of combinations of assets, the largest Asset Package with respect to the amount of principal or, if the respective asset is not expressed as an amount of principal, the largest Asset Package with respect to its value, shall be selected. If nothing is offered to the relevant creditor and the relevant creditor received nothing, the value of the Asset Package shall be zero.; or
- (iii) at the choice of the Issuer, in the event of the occurrence of a Restructuring, which is not also a Governmental Intervention (even if the Credit Event Notice designates another previously occurring Credit Event),

(2) ***Typing and calculation errors.***

Obvious typing and calculation errors or similar obvious errors in these Conditions entitle the Issuer to rescission vis-à-vis the Security Holders. The rescission must be declared without undue delay upon obtaining knowledge of such cause for rescission in accordance with § 6. Following such rescission by the Issuer, the Security Holder can instruct his depository bank to submit a duly completed redemption declaration to the Principal Paying Agent on a form available there and by giving all information and declarations required by the form (the "**Redemption Declaration**") and demand the refunding of the Acquisition Price against transfer of the Securities to the account of the Principal Paying Agent with the Clearing System. The Issuer will until at the latest 30 calendar days after receipt of the Redemption Declaration or the Securities by the Principal Paying Agent (whatever is the later date) make the Acquisition Price available to the Principal Paying Agent, which will transfer it to the account listed in the Redemption Declaration. the declaration of rescission in accordance with § 12. Such an offer is deemed to be accepted by the Security Holder (with the effect that the consequences of the rescission do not become effective) if the Security Holder does not within four weeks after the offer becoming effective pursuant to § 12 demand the repayment of the Acquisition Price by submitting a duly completed Redemption Declaration via his depository bank to the Principal Paying Agent and the transfer of the Securities to the account of Principal Paying Agent with the Clearing System in accordance with paragraph (2) above. The Issuer is entitled to correct or amend incomplete or inconsistent provisions in these Conditions in its reasonable discretion (§ 315 BGB). Only corrections and amendments that are reasonable for the Security Holders taking into account the interests of the Issuer and that in particular do not materially impair the legal and financial situation of the Security Holders will be permitted. The Security Holders will be informed of such corrections and supplementations pursuant to § 12.

(6) ***Adherence to corrected Conditions.***

(2) *Typing and calculation errors.*

Obvious typing and calculation errors or similar obvious errors in these Conditions entitle the Issuer to rescission vis-à-vis the Security Holders. The rescission must be declared without undue delay upon obtaining knowledge of such cause for rescission in accordance with § 6. Following such rescission by the Issuer, the Security Holder can instruct his depository bank to submit a duly completed redemption declaration to the Principal Paying Agent on a form available there and by giving all information and declarations required by the form (the "**Redemption Declaration**") and demand the refunding of the Acquisition Price against transfer of the Securities to the account of the Principal Paying Agent with the Clearing System. The Issuer will until at the latest 30 calendar days after receipt of the Redemption Declaration or the Securities by the Principal Paying Agent (whatever is the later date) make the Acquisition Price available to the Principal Paying Agent, which will transfer it to the account listed in the Redemption Declaration. With the payment of the Acquisition Price all rights deriving from the submitted Securities cease to exist.

The Security Holders will be informed of such an offer as well as the amended provisions together with the declaration of rescission in accordance with § 12. Such an offer is deemed to be accepted by the Security Holder (with the effect that the consequences of the rescission do not become effective) if the Security Holder does not within four weeks after the offer becoming effective pursuant to § 12 demand the repayment of the Acquisition Price by submitting a duly completed Redemption Declaration via his depository bank to the Principal Paying Agent and the transfer of the Securities to the account of Principal Paying Agent with the Clearing System in accordance with paragraph (2) above. The Issuer will refer to this effect in the notice.

(4) ***Acquisition Price.***

As used in paragraphs (2) and (3) above, the "**Acquisition Price**" is the actual acquisition price paid by each Security Holder (as stated and confirmed in the Redemption Declaration) or the weighted arithmetic mean of the trading prices of the Securities, as determined by the Issuer in its reasonable discretion (§ 315 BGB), on the Banking Day preceding the declaration of rescission pursuant to paragraph (2) above, respectively, depending on which of these amounts is the higher one.

(5) ***Incomplete or inconsistent provisions.***

The Issuer is entitled to correct or amend incomplete or inconsistent provisions in these Conditions in its reasonable discretion (§ 315 BGB). Only corrections and amendments that are reasonable for the Security Holders taking into account the interests of the Issuer and that in particular do not materially impair the legal and financial situation of the Security Holders will be permitted. The Security Holders will be informed of such corrections and supplementations pursuant to § 12.

(6) ***Adherence to corrected Conditions.***

If the Security Holder was aware of typing or calculation errors or similar errors in these Conditions when purchasing the Securities, the Issuer is entitled to adhere to the Conditions amended accordingly irrespective of paragraphs (2) to (5) above.

²⁰ Moody's defines "A" as follows: "Obligations rated A are considered upper-medium-grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa through Caa. The modifier "1" indicates that the obligation ranks in the higher end of its generic rating category; the modifier "2" indicates a mid-range ranking; and the modifier "3" indicates a ranking in the lower end of that generic rating category."

²¹ Moody's defines "P-1" as follows: "Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations."

²² A stable outlook from Moody's indicates a low likelihood of a rating change over the medium term.

²³ S&P defines "BBB" as follows: An obligor rated "BBB" has adequate capacity to meet its financial commitments. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments. Ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

²⁴ S&P defines "A-2" as follows: An obligor rated "A-2" has satisfactory capacity to meet its financial commitments. However, it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in the highest rating category.

²⁵ A "negative" outlook from S&P means that a rating may be lowered.

²⁶ Fitch defines "BBB" as follows: "BBB" ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity. The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories.

²⁷ Fitch defines "F2" as follows: Good intrinsic capacity for timely payment of financial commitments.

²⁸ A negative rating outlook from Fitch signals a negative trend on the rating scale.

No action has been or will be taken in any jurisdiction by the Issuer that would permit a public offering of the Securities, or possession or distribution of any offering material in relation thereto, in any country or jurisdiction where action for that purpose is required other than the approval of the Base Prospectus by the BaFin and a notification to the countries set forth in the Final Terms under "Terms and conditions of the offer".

Securities under this Base Prospectus may only be offered to private clients in Germany based on the standards for the issue of credit linked notes to private clients ("*Grundsätze für die Emission von "bonitätsabhängigen Schuldverschreibungen" zum Vertrieb an Privatkunden*") recommended by the German Derivatives Association (*Deutscher Derivate Verband, DDV*) and German Banking Industry Committee (*Deutsche Kreditwirtschaft, DK*).

The distribution of this Base Prospectus and the offering of Securities may be subject to statutory restrictions in certain jurisdictions. This may in particular affect the offer, sale, possession and/or distribution of Securities as well as the distribution, publication or possession of the Base Prospectus. Persons having access to the Securities and/or the Base Prospectus are required to obtain information on and comply with such restrictions on their own responsibility.

No offers, sales or deliveries of any Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and will not impose any obligation on the Issuer other than the approval and notification(s) mentioned above.
