Amendments to the Base Prospectus

The Base Prospectus is amended and supplemented as follows:

1. **Amendments to the section entitled Risk Factors**

The information in the section entitled "Risk Factors" is amended and supplemented by inserting the following new risk factors immediately after risk factor 5.7 (*The regulation and reform of certain*

published rates, indices and other values or "benchmarks" may adversely affect the value of and return on Securities linked to such values or benchmarks) on pages 87 to 88 of the Original Base Prospectus:

"5.8. U.K. Regulators will no longer persuade or compel banks to submit rates for calculation of LIBOR after 2021; the interest rate benchmarks could be discontinued"

On 27 July 2017, the Chief Executive of the FCA, which regulates LIBOR, announced that the FCA will no longer persuade or compel banks to submit rates for the calculation of LIBOR (which includes USD LIBOR) after 2021. Such announcement indicates that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021. Notwithstanding the foregoing, it appears highly likely that LIBOR will be discontinued or modified by 2021. It is not possible to predict the effect that this announcement or any such discontinuance will have on USD LIBOR (of the applicable tenor) on Securities which are directly or indirectly linked to USD LIBOR rates (of the applicable tenor).

If the Calculation Agent determines that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to USD LIBOR (of the applicable tenor), then a Benchmark Replacement will be selected by the Calculation Agent in accordance with the provisions of the USD LIBOR Fallbacks Schedule (the "**Benchmark Transition Provisions**"). The selection of a Benchmark Replacement, and any decisions, determinations or elections made by the Calculation Agent in connection with implementing a Benchmark Replacement with respect to the Securities in accordance with the Benchmark Transition Provisions, could result in adverse consequences to the interest rate, which could adversely affect the return on, value of and market for the Securities. Further, there is no assurance that the characteristics of any Benchmark Replacement will be similar to USD LIBOR (of the applicable tenor), or that any Benchmark Replacement will produce the economic equivalent of USD LIBOR (of the applicable tenor).

5.9 Risks associated with SOFR

Under the Benchmark Transition Provisions of the Securities, if a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to USD LIBOR (of the applicable tenor), then the rate of interest on the Securities will be determined based on SOFR.

On 22 June 2017, the Alternative Reference Rates Committee ("**ARRC**"), convened by the Board of Governors of the Federal Reserve System and the Federal Reserve Bank of New York, identified SOFR, a broad U.S. treasuries repurchase financing rate to be published by the Federal Reserve Bank of New York, as the rate that, in the consensus view of the ARRC, represented best practice for use in certain new U.S. dollar derivatives and other financial contracts. SOFR is a broad measure of the cost of borrowing cash overnight collateralized by U.S. treasury securities and has been published by the Federal Reserve Bank of New York since April 2018. The Federal Reserve Bank of New York has also begun publishing historical indicative Secured Overnight Financing Rates going back to 2014. Investors should not rely on any historical changes or trends in SOFR as an indicator of future changes in SOFR.

The composition and characteristics of SOFR are not the same as those of USD LIBOR and SOFR is fundamentally different from USD LIBOR for two key reasons. First, SOFR is a secured rate, while USD LIBOR is an unsecured rate. Second, SOFR is an overnight rate, while USD LIBOR is a forward-looking rate that represents interbank funding over different maturities (e.g., three months). As a result, there can be no assurance that SOFR (including a term SOFR or compounded SOFR) will perform in the same way as USD LIBOR would have at any time, including, without limitation, as a result of changes in interest and yield rates in the market, market volatility or global or regional economic, financial, political, regulatory, judicial or other events.

Because SOFR is published by the Federal Reserve Bank of New York based on data received from other

sources, we have no control over its methods of calculation, publication schedule, rate revision practices or availability of SOFR at any time without notice. There can be no guarantee, particularly given its relatively recent introduction, that SOFR will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of investors in the Securities. If the manner in which SOFR is calculated is changed, that change may result in a reduction of the amount of interest payable on the Securities and the trading prices of the Securities. In addition, the Federal Reserve Bank of New York may withdraw, modify or amend published SOFR data in its sole discretion and without notice. The interest rate for any day will not be adjusted for any modifications or amendments to SOFR data that the Federal Reserve Bank of New York may publish after the interest rate for that day has been determined.

Since SOFR is a relatively new reference rate, the Securities may not have an established trading market if a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to USD LIBOR (of the applicable tenor), and an established trading market may never develop or may not be very liquid. Market terms for floating-rate debt securities linked to SOFR, such as the spread over the base rate reflected in interest rate provisions or the manner of compounding the base rate, may evolve over time, and trading prices of the applicable Securities may be lower than those of later-issued SOFR-based debt securities as a result. Similarly, if SOFR does not prove to be widely used in securities like the Securities, the trading price of the Securities may be lower than those of Securities linked to reference rates that are more widely used. Investors in the Securities may not be able to sell the Securities at all or may not be able to sell the Securities at prices that will provide them with a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk."

2. **Amendments to the section entitled "Documents Incorporated By Reference"**

The information in the section entitled "Documents Incorporated by Reference" of the Base Prospectus is amended and supplemented by deleting the sub-section 4 entitled "The Goldman Sachs Group, Inc." on pages 116 to 119 of the Base Prospectus and replacing it with the following:

- (a) General Instrument Condition 2 (*Definitions and Interpretation*) on pages 142 to 167 of the Original Base Prospectus shall be amended and supplemented by inserting the following definitions in alphabetical order:

""**Benchmark Transition Provisions**" means the provisions set out in the USD LIBOR Fallbacks Schedule."

- (b) General Instrument Condition 12(h) (*Original Primary Rate Event*) on pages 187 to 188 of the Original Base Prospectus shall be deleted in its entirety and replaced with the following:

- (h) *Original Primary Rate Event*: Save for where the Benchmark Transition Provisions apply, the Calculation Agent determines, in its discretion and acting in good faith and in a commercially reasonable manner, that an Original Primary Rate Event has occurred in respect of an Original Primary Rate which may adversely affect the interests of the Holders (including but not limited to the fact that such Original Primary Rate, as the case may be, is no longer relevant to and does not reflect the original economic objective and rationale of the Instruments):

- (i) the Calculation Agent shall attempt to identify a Replacement Primary Rate, as the case may be;
- (ii) the Calculation Agent shall attempt to determine the Adjustment Spread;
- (iii) if the Calculation Agent identifies a Replacement Primary Rate pursuant to paragraph (i) above and determines an Adjustment Spread pursuant to paragraph (ii) above, then:

- (A) the terms of the Instruments shall, without the consent of the Holders, be amended so that each reference to "**Reference Rate**" or "**ISDA Rate**", as the case may be, shall be replaced by a reference to "Replacement Primary Rate plus the Adjustment Spread" (provided that the result of the Replacement Primary Rate plus the

Adjustment Spread plus or minus (as indicated in the relevant Final Terms) the Margin, may not be less than zero) with effect from the Adjustment Date;

- (C) the Calculation Agent shall deliver a notice to the Holders as soon as practicable in accordance with General Instrument Condition 22 which shall specify any Replacement Primary Rate, Adjustment Spread, Adjustment Date and the specific terms of any Replacement Primary Rate Amendments and such notice shall be irrevocable. Any Replacement Primary Rate, Adjustment Spread and Replacement Primary Rate Amendments will be binding on the Issuer, the Agents and the Holders; and

Neither the Calculation Agent nor the Issuer shall not have any duty to monitor, enquire or satisfy itself as to whether any Original Primary Rate Event has occurred.

If the definition, methodology or formula for an Original Primary Rate, or other means of calculating such Original Primary Rate, is changed or modified (irrespective of the materiality of any such change or changes), then references to that Original Primary Rate shall be to the Original Primary Rate as changed and modified."

5. **Inclusion of a new the section entitled "USD LIBOR Fallback Schedule"**

The following new section entitled "USD LIBOR Fallbacks Schedule" shall be inserted immediately after the section entitled "General Terms and Conditions of the Notes" of the Base Prospectus:

"USD LIBOR FALLBACKS SCHEDULE

The provisions of this USD LIBOR Fallbacks Schedule forms part of and must be read and construed in conjunction with the "General Note Conditions" and the "General Instrument Conditions", as applicable.

- (a) If the Calculation Agent determines that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred prior to the Reference Time in respect of any determination of the Benchmark Rate on any date, the Benchmark Replacement will replace the then-current Benchmark Rate for all purposes relating to the Securities in respect of such determination on such date and all determinations on all subsequent dates. In connection with the implementation of a Benchmark Replacement, the Calculation Agent will have the right to make Benchmark Replacement Conforming Changes from time to time. For the avoidance of doubt, the provisions

of General Instrument Condition 12(h) (*Original Primary Rate Event*) and General Note Condition 8(h) (*Original Primary Rate Event*), as applicable, shall not apply in respect of such Benchmark Rate upon the occurrence of a Benchmark Transition Event.

- (b) Any determination, decision or election that may be made by the Calculation Agent pursuant to this USD LIBOR Fallbacks Schedule, including any determination with respect to a tenor, rate or adjustment or of the occurrence or non-occurrence of an event, circumstance or date and any decision to take or refrain from taking any action or any selection, will be conclusive and binding absent manifest error, may be made in the Calculation Agent's sole discretion, and, notwithstanding anything to the contrary in the General Note Conditions and the General Instrument Conditions relating to a Security, shall become effective without consent from the Holders of the Securities or any other party.
- (c) For the purposes of this USD LIBOR Fallbacks Schedule only, unless the context otherwise requires, the following terms shall have the respective meanings set out below:

"Benchmark Rate" means, initially, USD LIBOR (of the applicable tenor); provided that if a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to USD LIBOR (of the applicable tenor) or the then-current Benchmark Rate, then "Benchmark Rate" means the applicable Benchmark Replacement.

"Benchmark Replacement" means the Interpolated Benchmark; provided that if the Calculation Agent cannot determine the Interpolated Benchmark as of the Benchmark Replacement Date, then "Benchmark Replacement" means the first alternative set forth in the order below that can be determined by the Calculation Agent as of the Benchmark Replacement Date:

- (A) the sum of: (a) Term SOFR and (b) the Benchmark Replacement Adjustment;
- (B) the sum of: (a) Compounded SOFR and (b) the Benchmark Replacement Adjustment;
- (C) the sum of: (a) the alternate rate of interest that has been selected or recommended by the Relevant Governmental Body as the replacement for the then-current Benchmark Rate for the applicable Corresponding Tenor and (b) the Benchmark Replacement Adjustment;
- (D) the sum of: (a) the ISDA Fallback Rate and (b) the Benchmark Replacement Adjustment;
- (E) provided that if (i) the Benchmark Replacement cannot be determined in accordance with clause (C) or (D) above as of the Benchmark Replacement Date or (ii) the Calculation Agent shall have determined that the ISDA Fallback Rate determined in accordance with clause (D) above is not an industry-accepted rate of interest as a replacement for the then-current Benchmark Rate for U.S. dollar denominated floating rate Securities at such time, then the Benchmark Replacement shall be the sum of: (a) the alternate rate of interest that has been selected by the Calculation Agent as the replacement for the then current Benchmark Rate for the applicable Corresponding Tenor giving due consideration to any industry accepted rate of interest as a replacement for the then-current Benchmark Rate for U.S. dollar denominated floating rate fixed income Securities at such time and (b) the Benchmark Replacement Adjustment.

"Benchmark Replacement Adjustment" means the first alternative set forth in the order below that can be determined by the Calculation Agent as of the Benchmark Replacement Date:

- (A) the spread adjustment, or method for calculating or determining such spread adjustment, (which may be a positive or negative value or zero) that has been selected or recommended by the Relevant Governmental Body for the applicable Unadjusted Benchmark Replacement;

- (B) if the applicable Unadjusted Benchmark Replacement is equivalent to the ISDA Fallback Rate, then the ISDA Fallback Adjustment;
- (C) the spread adjustment (which may be a positive or negative value or zero) that has been selected by the Calculation Agent giving due consideration to any industry-accepted spread adjustment, or method for calculating or determining such spread adjustment, for the replacement of the then-current Benchmark Rate with the applicable Unadjusted Benchmark Replacement for U.S. dollar-denominated floating rate fixed income Securities at such time.

"Benchmark Replacement Conforming Changes" means, with respect to any Benchmark Replacement, any technical, administrative or operational changes (including changes to the definition of "Interest Period", "Interest Determination Date" or other applicable periods or dates, as the case may be, timing and frequency of determining rates, and making payments of interest, rounding of amounts or tenors and other administrative matters) that the Calculation Agent decides may be appropriate to reflect the adoption of such Benchmark Replacement in a manner substantially consistent with market practice (or, if the Calculation Agent decides that adoption of any portion of such market practice is not administratively feasible or if the Calculation Agent determines that no market practice for use of the Benchmark Replacement exists, in such other manner as the Calculation Agent determines is reasonably necessary).

"Benchmark Replacement Date" means the earliest to occur of the following events with respect to the then-current Benchmark Rate:

- (A) in the case of clause (A) or (B) of the definition of "Benchmark Transition Event", the later of (a) the date of the public statement or publication of information referenced therein and (b) the date on which the administrator of the Benchmark Rate permanently or indefinitely ceases to provide the Benchmark Rate; or
- (B) in the case of clause (C) of the definition of "Benchmark Transition Event", the date of the public statement or publication of information referenced therein.

For the avoidance of doubt, if the event giving rise to the Benchmark Replacement Date occurs on the same day as, but earlier than, the Reference Time in respect of any determination, the Benchmark Replacement Date will be deemed to have occurred prior to the Reference Time for such determination.

"Benchmark Transition Event" means the occurrence of one or more of the following events with respect to the then-current Benchmark Rate:

- (A) a public statement or publication of information by or on behalf of the administrator of the Benchmark Rate announcing that such administrator has ceased or will cease to provide the Benchmark Rate, permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark Rate;
- (B) a public statement or publication of information by the regulatory supervisor for the administrator of the Benchmark Rate, the central bank for the currency of the Benchmark Rate, an insolvency official with jurisdiction over the administrator for the Benchmark Rate, a resolution authority with jurisdiction over the administrator for the Benchmark Rate or a court or an entity with similar insolvency or resolution authority over the administrator for the Benchmark Rate, which states that the administrator of the Benchmark Rate has ceased or will cease to provide the Benchmark Rate permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark Rate; or

- (A) the rate, or methodology for this rate, and conventions for this rate selected or recommended by the Relevant Governmental Body for determining Compounded SOFR; provided that:
- (B) if, and to the extent that, the Calculation Agent determines that Compounded SOFR cannot be determined in accordance with clause (A) above, then the rate, or methodology for this rate, and conventions for this rate that have been selected by the Calculation Agent giving due consideration to any industry-accepted market practice for U.S. dollar denominated floating rate fixed income Securities at such time.

For the avoidance of doubt, the calculation of Compounded SOFR shall exclude the Benchmark Replacement Adjustment and the applicable margin of basis points.

"**ISDA Fallback Adjustment**" means the spread adjustment (which may be a positive or negative value or zero) that would apply for derivatives transactions referencing the 2006 ISDA Definitions to be determined upon the occurrence of an index cessation event with respect to the Benchmark Rate for the applicable tenor.

"**ISDA Fallback Rate**" means the rate that would apply for derivatives transactions referencing the 2006 ISDA Definitions to be effective upon the occurrence of an index cessation date with respect to the Benchmark Rate for the applicable tenor excluding the applicable ISDA Fallback Adjustment.

"**Reference Time**" with respect to any determination of the Benchmark Rate means (1) if the Benchmark Rate is USD LIBOR (of the applicable tenor), 11:00 a.m. (London time) on the Interest Determination Date, and (2) if the Benchmark Rate is not USD LIBOR (of the applicable tenor), the time determined by the Calculation Agent in accordance with the Benchmark Replacement Conforming Changes.
