1. Management Report

1.1 Introduction

This report includes the 2019 Financial Statements of Deutsche Post Finance B.V. (“The Company”). The Company is part of Deutsche Post DHL Group (“The Group”).

1.2 Incorporation

The Company is a private company with limited liability (besloten vennootschap met beperkte aansprakelijkheid) and was incorporated in The Netherlands, Rotterdam on 13 April, 1999. It is governed by the laws of The Netherlands. The Company is now listed in the Commercial Register of the Dutch Chamber of Commerce under number 24292643. Its official seat is in Maastricht, The Netherlands, its business address is Pierre de Coubertinweg 7N, 6225 XT Maastricht, The Netherlands, telephone number +31 (43) 3564000.

The Company is a privately held company and is not subject to public corporate governance standards. The Company is not required to have an audit committee under the laws of The Netherlands due to an exemption under article 3 of the Decree implementing (i) Directive 2014/56/EU amending Directive 2006/43/EC on statutory audits of annual accounts and consolidated accounts and (ii) Regulation (EU) 537/2014 on specific requirements regarding statutory audits of public-interest entities and amending the Decree implementing Directive 2006/43/EC on statutory audits of annual accounts and consolidated accounts (Besluit instelling auditcommissie). It does not have an audit committee.

The Legal Entity Identifier (LEI) of The Company is 52990063W8KQHQM4M43.

1.3 Organizational Structure

The Company is owned 100% by Deutsche Post International B.V. Deutsche Post International B.V. has its official seat in Amsterdam and its business address at Pierre de Coubertinweg 7N, 6225 XT Maastricht, The Netherlands. The Company is owned 100% by Deutsche Post Beteiligungen Holding GmbH, which is, in turn 100% owned by Deutsche Post AG in Bonn, Germany. The Company has no subsidiaries, joint ventures or associates.

1.4 Share Capital

As of 31 December 2019, the authorized share capital of the Company amounted to EUR 90.000 and consists of 180 ordinary shares each of EUR 500. The issued share capital amounts to EUR 18.500 and consists of 37 ordinary shares with a nominal value of EUR 500 each, which are fully paid.

1.5 Business overview, Purpose and Objects

The Company engages in several activities in the field of finance. The Company serves as a vehicle for the financing activities of Deutsche Post DHL Group including the issuance of bonds. The principal activity of the Company consists of raising capital in order to lend funds to Deutsche Post DHL Group companies. According to article 2 of the articles of association the objects of Deutsche Post Finance B.V. are:

1.
 - a. to issue, purchase and sell bonds, debt instruments, shares, profit sharing certificates, options and other securities of any form or, to otherwise enter into loan transactions as debtor, including, the borrowing and lending of moneys of and to general partnership or a limited partnership of which the company is a general partner;
 - b. to provide credit, to lend moneys and to guarantee loans or to otherwise provide security for obligations to pay;
 - c. apart from the above to perform financial transactions of whatsoever nature;
 - d. to participate in, to perform managing activities for and to supervise other companies or businesses;
 - e. to acquire, transfer, to perform custody services and operation of assets of whatsoever nature.
2. To perform other activities that in any way can be considered to be in line with the activities mentioned above, are a result of those activities or are in any way instrumental to those activities.

1.6 Management Board

The Management Board currently consists of two members:

Mr. Roland W. Buss

Mr. Timo L.F. van Druten.

1.7 Main business developments

The world economy lost significant momentum in 2019. In the industrial countries, average GDP growth declined to 2,3%. Growth in the emerging markets slowed slightly to 4,6%. Total global economic output was up by 3,7%, somewhat less than in the previous year.

The eurozone economy lost momentum in 2019, with the effects being felt most strongly in the EU countries with the highest export levels. Eurozone demand also slowed towards the end of the year as the uncertain business environment prompted companies to scale back or postpone investments. The decrease in foreign trade was the main factor in the decline in GDP growth to 1,2% in the Eurozone (previous year: 1,9%).

The deteriorating economic outlook led the European Central Bank (ECB) to initiate another change of course in monetary policy. The ECB decided to resume net asset purchases at a monthly pace of EUR 20 billion effective as of 1 November 2019. The main refinancing operations rate was left at 0,00%, and the deposit facility rate was lowered to -0,50%. The US Federal Reserve likewise announced a turnaround in monetary policy in 2019. In light of the highly uncertain outlook, the Fed lowered the target rate by a total of three-quarters of a percentage point to 1,75% in three steps. The euro remained weak against the dollar in 2019. The nominal effective exchange rate for the euro is nonetheless well above the long term average for a basket of currencies, due in particular to the euro's appreciation against sterling and the Chinese renminbi.

The first half of 2019 saw a sharp increase in risk premiums on Eurozone bond markets, due in part to the political situation in Italy and the uncertainty surrounding Brexit. Yields on ten-year German government bonds slipped into negative terrain for the first time ever to end the year at -0,15% (previous year: 0,25%). Yields on ten-year US government bonds also fell in 2019 but

remained well into positive territory. Ten-year US government bonds were yielding 1,92% at the end of the year (previous year: 2,68%).

In the reporting period, the Company did not perform any activities on the capital markets.

As the Company did not perform any activities on the capital markets in 2019, its balance sheet total being EUR 550.932.822 as per 31 December 2019 nearly stayed constant in comparison to year end 2018 with a total of EUR 555.236.880.

The Company's revenue for 2019 amounts to EUR 6.311.232 and the result after taxation for 2019 amounts to a profit of EUR 633.915. Excluding the net gain from hedge ineffectiveness, totaling EUR 186.942 and the movement for expected credit losses under IFRS 9 of EUR 17.479, the 2019 minimum margin result amounts to a profit of EUR 429.494 [EUR 429.446 in 2018] and is in line with the management's expectations.

The Company, being a funding vehicle for the Group, raises finance and on-lends monies to companies within the Group by way of intra-group loans. Typically, the terms of such intra-group loans match the payment obligations of the Company under the bonds issued by it to fund such loans. In the event that a company fails to make a payment under an intra-group loan, the Company may not be able to meet its payment obligations under bonds issued by it and its creditors would have to rely on guarantees issued by Deutsche Post AG.

Hence payment of principal of and interest on bonds issued by the Company ultimately depend on Deutsche Post AG. This means that risks in respect of the Company substantially correspond with those in respect of the Group. Reference here is made to the Group's Annual Report 2019.

Moreover, due to the nature of its business, the Company might be adversely affected by changes in interest rates or foreign exchange rates. Interest risks as well as currency risks are hedged according to the guidelines of the Group by the Group's Central Treasury. Instruments and policies used for hedging are described in the notes to the Financial Statements. The Company's attitude towards risk is an adverse one. Hence, hedges are put in place in order to avoid interest and currency risks.

The cash and liquidity of the Group's globally operating subsidiaries is managed centrally on headquarters level. A major part of the Group's external revenue is consolidated in cash pools and used to balance internal liquidity needs. The Group's intragroup revenue is also pooled and managed in an In-House-Bank-System provided by Deutsche Post AG. As the Company is linked to this Bank-System, liquidity is provided by Deutsche Post AG.

1.8. Management Board policy with respect to risks

The activities of the Company result in financial risks such as interest rate risk, liquidity risk and credit risk.

The interest rates and the maturity dates of the Company's funding match with the interest rates and maturity dates of the loans provided by the Company. Hence the Company does not face an interest rate risk.

As the Group ensures a sufficient supply of cash for Group companies participating in the cash pool, the Company, being part of the cash pool, faces no liquidity risk. As per end of December 2019 the Company had cash pool receivables of EUR 17.716.731.

The Management Board of the Company monitors the credit risk on a regular basis by analyzing the default risk of every borrower. Loans provided to Dutch borrowers are backed by a 403-

verklaring, i.e. secured by Deutsche Post AG. If due to the analysis of the default risk of its borrowers, the Company would need support, the Management of the Company would ask Deutsche Post AG for this.

The bond issued by the Company is guaranteed by Deutsche Post AG, hence from an investor's point of view the risk of Deutsche Post AG is the relevant risk.

For further details of the financial risk management of the Company, it is referred to note (16) of the notes to these financial statements and to the Annual Report 2019 of the Group.

1.9 Future business developments

The performance of the global economy this year will be heavily impacted by the effects of the coronavirus. In its economic forecast dated 2 March 2020, the OECD expects global expansion to amount to only 2,4% in a best-case scenario. A broader spread of the disease in the Asia Pacific region and the industrialized countries would have an even more pronounced effect on the global economy, according to the OECD.

As the Company is one of the most important financing vehicles of the Group, the financial position, especially the liquidity situation and the planned capital expenditures of the Group, very much affect the business development of the Company.

The Group anticipates a reduction in its cash position in the first half of 2020 as a result of the annual pension-related prepayment due to the Bundesanstalt für Post und Telekommunikation (German federal post and telecommunications agency). The dividend payment for financial year 2019 is, subject to the impact of COVID-19, pushed to a later date this year. In addition, the payments not covered by borrowed funds to renew the intercontinental Express aircraft fleet will reduce liquidity. The Group's operating liquidity situation is expected to improve again towards the end of the year, subject to the impact of COVID-19, due to the customary upturn in business in the second half of the year. In 2020, the Group plans to increase capital expenditure (excluding leases) to around EUR 2,6 billion in support of its strategic objectives and further growth.

Key control parameters for liquidity management of the Group are the centrally available liquidity reserves. As at the reporting date, the Group had cash and cash equivalents in the amount of EUR 2,9 billion (previous year: EUR 3,0 billion) at its disposal. The Group also has a syndicated credit facility in a total volume of EUR 2 billion serving as a long-term liquidity reserve at favourable market conditions. Moreover, the Group enjoys open access to the capital markets on account of its good ratings within the transport and logistics sector and is well positioned to secure capital requirements.

In summary the Group's liquidity remains solid and a change in the Group's credit rating is not expected.

The management of the Company does not expect any impact of the corona virus crisis on the ability of the Company to serve its obligations. In addition, the ultimate shareholder of the Company, Deutsche Post AG, also being the guarantor of the bonds issued by the Company, maintains a solid financial position. Cash, cash equivalents, an undrawn syndicated loan facility amounting to EUR 2 billion, undrawn bilateral bank credit lines summing up to EUR 1,9 billion provide sufficient headroom to Deutsche Post AG to fulfill any obligations from the guarantee provided to the bondholders.

For further detailed information on the Group's expected financial position in 2020 reference is made to the Deutsche Post DHL Group Annual Report 2019.

Deutsche Post Finance B.V. has a majority of assets in terms of Long-term loans receivable from Deutsche Post DHL Group companies. The Company's financial position is based on interest inflow and repayments of loans by these companies.

Looking ahead, our current expectation is that the company is limitedly affected by the coronavirus. The expectation is that, despite the macroeconomic conditions in the world, the organization will be limitedly affected in the foreseeable future. On a longer term, depending on how the COVID-19 crisis evolves, the impact on the business of the Deutsche Post DHL Group companies is more uncertain, and with that it is too early to estimate the impact on the interest inflow and repayments of loans by these companies.

The directly available cash pool receivables with EUR 17.716.731 are sufficient to cover the yearly interest outflow for the coming year.

The outstanding bond with a total notional volume of EUR 500 million matures in 2022. The ultimate shareholder of the Company, Deutsche Post AG, also being the guarantor of the bonds issued by the Company, maintains a solid financial position. Cash, cash equivalents, an undrawn syndicated loan facility amounting to EUR 2 billion, undrawn bilateral bank credit lines summing up to EUR 1,9 billion provide sufficient headroom to Deutsche Post AG to fulfil any obligations from the guarantee provided to the bondholders.

Whilst uncertain, we do not believe, however, that the impact of the COVID-19 virus would have a material adverse effect on our financial condition or liquidity.

The management of the Company is not aware of any plans to raise funds from the capital markets in 2020. Deutsche Post AG together with the Company intends to update its Debt Issuance Programme in the first half of 2020. Deutsche Post Finance B.V. will persist as Group finance company and any possible future proceeds of debt issues will be lent within the Group.

1.10 Diversity

In the context of article 2:391 paragraph 7 DCC we declare that during issuance of the Financial Statements, the Company does not comply with the requirement that at least 30% of the seats in the management board have to be held by the female gender. This is not a deliberate choice, but a consequence of the fact that only limited changes have been taken place in the management board.

1.11 Responsibility Statement

To the best of our knowledge, and in accordance with the applicable reporting principles, the Financial Statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company, and the management report of the Company includes a fair review of the development and performance of the business and the position of the Company, together with a description of the principal opportunities and risks associated with the expected development of the Company.

Maastricht, 21 April 2020

The Management Board:

.....
Roland W. Buss

.....
Timo L.F. van Druten

Cash pool balance at 31 December	(20)	17.716.731	9.691.713

All cash flows are considered to be operating cash flows. Reference is made to note 7.

The notes are an integral part of the Company's Financial Statements.

2.5 Notes to the Financial Statements

(1) *General overview*

Deutsche Post Finance B.V. (hereafter “The Company”), having its statutory seat in Maastricht, was incorporated in the Netherlands, Rotterdam on 13 April 1999 and is now listed in the Commercial Register of the Chamber of Commerce in Maastricht under number 24.29.26.43. The Company is owned 100% by Deutsche Post International B.V. in Maastricht, the Netherlands. The ultimate shareholder is Deutsche Post AG in Bonn, Germany.

The principal activity of the Company consists of raising capital in order to lend funds to Deutsche Post DHL Group companies. The Debt Issuance Programme is mentioned in Note 16.

Items included in the Financial Statements are measured using the currency of the primary environment in which Deutsche Post Finance B.V. operates (“the functional currency”). The Financial Statements are presented in Euro, which is the Company’s presentation currency and functional currency.

The Company has no subsidiaries, joint ventures or associates. The Company itself is a part of the Group and the financial results of the Company are incorporated into the IFRS Consolidated Financial Statements of the Group.

The date of approval of these Financial Statements by the Management Board is 21 April 2020.

(2) *Going concern*

The financial statements have been prepared on a going concern basis. Over the year ending on 31 December 2019 the Company had a profit of EUR 633.915 and a positive net cash flow of EUR 8.025.018. The financial situation of the Company is healthy.

The global COVID-19 outbreak also impacts Deutsche Post DHL Group business operations. COVID-19 circumstances create uncertainty about long term outlook as measures taken might change, the disease might spread further, economic crisis may deepen, which could all have an impact on the Deutsche Post DHL Group.

Deutsche Post Finance B.V. has a majority of assets in terms of Long-term loans receivable from Deutsche Post DHL Group companies. The Company’s financial position is based on interest inflow and repayments of loans by these companies.

Looking ahead, our current expectation is that the Company is limitedly affected by the coronavirus. The expectation is that, despite the macroeconomic conditions in the world, the organization will be limitedly affected in the foreseeable future. On a longer term, depending on how the COVID-19 crisis evolves, the impact on the business of the Deutsche Post DHL Group companies is more uncertain, and with that it is too early to estimate the impact on the interest inflow and repayments of loans by these companies.

The directly available cash pool receivables with EUR 17.716.731 are sufficient to cover the yearly interest outflow for the coming year.

The outstanding bond with a total notional volume of EUR 500 million matures in 2022. The ultimate shareholder of the Company, Deutsche Post AG, also being the guarantor of the bonds issued by the Company, maintains a solid financial position. Cash, cash equivalents, an undrawn syndicated loan facility amounting to EUR 2 billion, undrawn bilateral bank credit lines summing

up to EUR 1,9 billion provide sufficient headroom to Deutsche Post AG to fulfil any obligations from the guarantee provided to the bondholders.

Whilst uncertain, we do not believe, however, that the impact of the COVID-19 virus would have a material adverse effect on our financial condition or liquidity.

(3) *Basis of accounting*

The Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and also comply with the financial reporting requirements included in section 9 of Book 2 of the Dutch Civil Code. The Financial Statements have been prepared under the historical cost convention, as modified by the revaluation of all derivative contracts.

The preparation of Financial Statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the Financial Statements, are disclosed in note 5.

The Company has decided to apply the principles of hedge accounting in accordance with IAS 39 from January 2018 until further notice.

(4) *New developments in international accounting under IFRS*

The following Standards, changes to Standards and Interpretations have been applied for the first time in these financial statements:

	Required to be applied for financial years beginning on or after	Significance
Amendments to IFRS 9 Financial Instruments: Early Repayment Arrangements with Negative Compensation (Issue date: 12 October 2017)	1 January 2019	Irrelevant
Amendments to IAS 28 Investments in associates: Long-term investments in associated companies and joint ventures are within the scope of IFRS 9	1 January 2019	Irrelevant
IFRIC 23 Uncertainty Regarding Income Tax Treatment (Issue date: 7 June 2017)	1 January 2019	Irrelevant
Annual improvements of IFRS (cycle 2015 - 2017)	1 January 2019	Irrelevant
Amendment to IAS 19 Employee benefits: Plan adjustment, curtailment and settlement	1 January 2019	Irrelevant

	Required to be applied for financial years beginning on or after	Significance
IFRS 16 Leases (Issue date: 13 January 2016)	1 January 2019	Irrelevant

New accounting pronouncements adopted by the EU but only required to be applied in future periods (the Company did not early adopt these).

The following Standards, changes to Standards and Interpretations have already been endorsed by the European Union. However, they will only be required to be applied in the future.

The IASB has issued a revised framework that will be used in the future in the development of new standards and interpretations. In particular, the definitions of assets and liabilities and guidelines on measurement and derecognition, presentation and disclosures have been revised. As a result, no technical changes are currently being made to existing standards. The amendments merely update the references to the framework concept in existing standards. The framework itself is not the subject of the endorsement process. There are no changes to the accounting.

	Required to be applied for financial years beginning on or after	Significance
Amendments to IAS 1 and IAS 8 - Definition of materiality	1 January 2020	No changes
Amendments to IFRS 9, IAS 39 and IFRS 7 Interest Rate Benchmark Reform: Hedge accounting can continue to exist or be designated regardless of the expected replacement of various reference interest rates.*	1 January 2020	No changes

* The reform has no impact on the hedge accounting since it is based on the Euribor

New accounting pronouncements not yet adopted by the EU.

The IASB and the IFRIC issued further Standards and Interpretations in financial year 2019 and in previous years whose application is not yet mandatory for financial year 2019. The application of these IFRS is dependent on their adoption by the EU.

	Required to be applied for financial years beginning on or after	Significance
IFRS 17 Insurance contracts	1 January 2021	Irrelevant
Amendments to IFRS 3 Business Combinations: Definition of a Business Operation	1 January 2020	Irrelevant

	Required to be applied for financial years beginning on or after	Significance
Amendment to IAS 1 Presentation of Financial Statements: Consequences of an extension right on the classification of financial liabilities as current or non-current	1 January 2022	Irrelevant

(5) Critical accounting estimates and judgments

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continuously evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Impairment losses on loans

Loans issued by the company are revalued at each balance sheet date. The borrowers' creditworthiness is monitored on an ongoing basis. Information published by rating agencies on the capital market is used to assess the creditworthiness of debtors and to calculate a potential future loss. A short-cut method is used to determine the expected credit loss on low credit risk intercompany loans: It assumes that the default probability for the intercompany loans is that of the lowest investment grade. The respective one-year global default rate as published by Standard & Poor's was 0,17% at the end of 2019 (2018: 0,17%).

(b) Fair value of the derivative

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques (level 2 of the IFRS 13 fair value hierarchy). These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates.

With regard to the existing interest rate swap with Deutsche Post AG the fair value was calculated with a discounted cash flow method and the applicable market Euro swap rate at the end of 2019 was -0,27% (2018: -0,01%).

Changes in assumptions about these factors could affect reported fair value of financial instruments.

(6) Related party transactions

Deutsche Post Finance B.V. is involved in various related party transactions. For more details we refer to these Financial Statements.

(7) Cash flow statement

The statement of cash flows analyses changes in cash and cash equivalents during a period. According to IAS 7.18 the company presents its cash flows on the basis of the direct method in the annual financial statements. The direct method presents the specific cash flows associated with items that affect cash flow. Major classes of gross cash receipts and gross cash payments on behalf of Deutsche Post Finance B.V. are disclosed.

The cash flows that are presented in this cash flow statement represent the receipts and payments made on behalf of Deutsche Post Finance B.V. resulting from the cash pool agreement between the Company and Deutsche Post AG. They are presented in the cash flow statement even though

Deutsche Post Finance B.V. itself has no cash, but a cash pool balance with Deutsche Post AG. The cash pool balances are disclosed under “Cash pool receivables” in the balance sheet (note 20).

The principal activity of the Company consists of raising capital in order to lend funds to Deutsche Post DHL Group companies. Therefore all activities, relating to interest received and paid are classified as operating activities. All transactions and balances of the Company within the in-house bank of the Group are classified as changes in working capital (changes in receivables and payables).

The Company has not paid any dividends during 2019 (this was also the case last year).

(8) Foreign currencies

Transactions in currencies other than Euro are recorded at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing on the balance sheet date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are recognized in the income statement except when deferred in equity as qualifying cash flow hedges. At the balance sheet date the Company does not have any foreign currency transactions.

(9) Financial assets

Financial instruments are contractual obligations that give rise to a financial asset of one entity and a financial liability or equity instrument in another entity. These include both primary and derivative financial instruments. Primary financial instruments include in particular all receivables, financial liabilities, securities, loans and accrued interest.

Financial assets have been classified into the following measurement categories according to IFRS 9:

- Debt instruments measured at amortized cost,
- Financial assets at fair value through profit or loss (FVTPL)

The classification of debt instruments depends on the Company’s business model for managing financial assets and contractual cash flows. The Company’s management has assessed which business models apply to the held by them financial assets. Based on the defined business model and the contractual cash flow characteristics it has classified its financial instruments into the appropriate IFRS 9 categories. Debt instruments in the Company are generally recognized at amortized cost.

Interest income from these financial assets is reported under financial income using the effective interest method.

The derivative is classified as “Financial assets at fair value through profit or loss (FVTPL)”.

Category: Debt instruments measured at amortized cost

Financial instruments classified as debt instrument measured at amortized cost, are initially measured at fair value and subsequently measured at amortized cost using the effective interest method. They are non-derivative financial assets with fixed or determinable payments that are assigned to the business model “Hold to collect”. The instruments fulfil the SPPI Test (Solely Payments of Principal and Interest Test). Credit losses calculated using the general approach of

IFRS 9 are charged to the income statement. They are considered to have a low credit risk. Debt instruments that are not listed on the capital markets are considered to have a low credit risk if the risk of non-performance is low and the debtor is able at all times (prospective estimate: will be able) to meet its contractual payment obligations in the short term.

Category: Financial assets at fair value through profit or loss

Derivatives have been classified as “Financial assets at fair value through profit or loss”. Initial recognition and subsequent measurement are disclosed under note 13 “Derivative financial instruments and hedge accounting”.

All financial assets are recognized on the balance sheet, when the Company becomes a party to the contract by using trade date accounting. They are included in the current assets except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets.

Impairment

The Company has assessed the expected credit losses related to its debt instruments on a forward-looking basis. The applicable impairment method depends on whether there is a significant increase in credit risk. It is referred to note 5(a).

The fair values of the loans have been calculated by applying the discounted cash flow method. It is also referred to note 5(a).

Financial assets are derecognized when the rights to receive cash flows from the assets have expired or when the assets have been settled.

(10) Cash pool receivables and payables

The Company participates in the cash pooling of the Group. The cash pool balances at the balance sheet date are shown as cash pool receivables or cash pool payables to related parties (and not shown as cash and cash equivalents).

Cash pool receivables are part of the financial instruments and classified as “Debt instruments measured at amortized cost” (note 9).

Fair values are considered to approximately match the carrying amounts of short-term receivables.

(11) Financial liabilities

Financial liabilities must be classified in “Financial liabilities at fair value through profit or loss” and in “Other liabilities”. Financial liabilities must be derecognized on the balance sheet, when the Company becomes a party to the contract at fair value on inception. They are included in the current liabilities except for maturities greater than 12 months after the balance sheet date. These are classified as non-current liabilities.

Derivative financial liabilities are classified as “Financial liabilities at fair value through profit or loss”. Initial recognition and subsequent measurement are disclosed under note 13 “Derivative financial instruments and hedge accounting”.

The remaining liabilities are classified as “Other liabilities”. They are subsequently carried at amortized cost by applying the effective interest method.

The fair value of the bond is derived from the published market price.

Financial liabilities under fair value hedge accounting are including an adjustment for the fair value of the risk being hedged.

Financial liabilities are derecognized when the obligation to settle the liabilities has expired or has been settled.

(12) *Offsetting financial instruments*

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Currently, there are no assets or liabilities which are offset.

(13) *Derivative financial instruments and hedge accounting*

All derivative financial instruments are recognized at fair value on the date a derivative contract is entered into and subsequently re-measured at fair value. The method of recognising the resulting gain or loss depends on whether the instrument is designated as a hedging instrument.

To avoid variations in the net profit resulting from changes in the fair value of derivative financial instruments, hedge accounting is applied where possible. This concerns the interest swap.

If hedge accounting is applied, the net profit or loss from both the derivative and the related hedged item are simultaneously recognized in income. Depending on the hedged item and the risk to be hedged, the Company uses fair value hedge accounting or cash flow hedge accounting. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognized in the income statement as they arise. Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of host contracts and the host contracts are not carried at fair value with unrealized gains or losses reported in the income statement.

The Group documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

Fair value hedges

For an effective hedge of an exposure to changes in the fair value, the hedged item is adjusted for changes in fair value attributable to the risk being hedged with the corresponding entry in profit or loss. Gains or losses from re-measuring the derivative are also recognized in profit or loss. Accordingly, changes in the fair value of both the derivatives and the hedged item are simultaneously recognized in income or expense.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortized to profit and loss over the period to maturity.

As of 31 December 2019 no cash flow hedge was designated, there was only one fair value hedge (similar situation as in 2018).

(14) *Interest income and expense*

According to the IFRS 9 (general approach) the interest income and expense for financial assets in stage 1 and stage 2 are calculated on the gross carrying amount. For financial assets in stage 3, the company will continue to recognize lifetime Expected Credit Loss (ECL), as in stage 2, but they will now recognize interest income on a net basis. This means that interest income will be calculated based on the gross carrying amount of the financial asset less ECL.

(15) *Principles for the determination of the result*

Interest income and interest expense are accounted for during the period to which these belong. For interest expenses, the Company takes the transaction fees, if applicable, into account.

(16) *Financial risk management*

The principal activity of the Company consists of raising debt capital through bond issuances in order to lend those funds to Deutsche Post DHL Group companies. The capital managed by the Company is defined as the nominal amount of outstanding bonds issued by the Company, i.e. currently EUR 500 million. It is fixed until the existing bond needs to be redeemed or new bonds are being issued. In view of the Group's long-term capital requirements, the Group established a Debt Issuance Programme with a volume of up to EUR 8 billion. The Company is a possible issuer under the programme which offers the Company the possibility to issue bonds in customized tranches up to a stipulated total amount and enables it to react flexibly to changing market conditions. Deutsche Post AG together with the Company intends to update the programme in the first half of 2020.

The activities of the Company result in financial risks that may arise from changes in exchange rates and interest rates. Both risks are hedged according to the Group's guidelines by the Group's Central Treasury.

Internal guidelines govern the universe of actions, responsibilities and controls necessary for using derivatives. Suitable risk management software is used to record, assess and process hedging transactions. It is also used to regularly assess the effectiveness of the hedging relationships. The Group only enters into hedging transactions with prime-rated banks. Each bank is assigned a counterparty limit, the use of which is regularly monitored.

The Group's Board of Management receives regular internal information on the existing financial risks and the hedging instruments deployed to limit them.

The fair values of the derivatives used may be subject to substantial fluctuations depending on changes in exchange rates and interest rates. These fluctuations in fair value are not to be viewed in isolation from the underlying transactions that are hedged. Derivatives and hedged transactions form a unity with regard to their offsetting value development.

Interest rate risk and interest rate management

Interest rate risk arises from changes in market interest rates for financial assets and financial liabilities. To quantify the risk profile, according to the Group's guidelines, all interest-bearing

receivables and liabilities are recorded, interest rate analyses are regularly prepared, and the potential effects on the net interest income are examined.

The Group uses interest rate derivatives, such as interest rate swaps, to reduce financing costs and optimally manage and limit interest rate risks by adjusting the ratio of fixed to variable interest agreements.

At 31 December 2019 a fixed rate bond with a total notional volume of EUR 500 million was outstanding, maturing in 2022.

The bond maturing in 2022 has been transformed into a floating rate liability with a fixed to float receiver interest rate swap. For this interest rate swap fair value hedge accounting is applied. The EUR 500 million have been used to finance floating rate EUR loans to Deutsche Post DHL Group companies maturing in 2022.

IFRS 7 requires a company to disclose a sensitivity analysis, showing how profit and loss and equity are affected by hypothetical changes in interest rates at the reporting date. For the sensitivity analysis concerning the impact on profit and loss all primary variable rate financial instruments and the floating rate leg of the interest rate swap has been taken into consideration.

If the market interest rates as at 31 December 2019 would have been 100 basis points higher, the net financial income would have increased by EUR 18.113 (2018: EUR 89.113). A 100 basis points decrease leads to the opposite effect (net financial income decreases by EUR 18.113).

The company did not have any outstanding cash flow hedging transactions on its balance sheet at the end of 2019 and at the end of 2018, therefore it was not necessary to calculate the equity impact of a hypothetical change in interest rates.

Foreign exchange risk

The Company did not have any foreign currency transactions in its balance sheet at the end of 2019 and at the end of 2018.

Liquidity risk

The Group ensures a sufficient supply of cash for Group companies at all times via a largely centralized liquidity management system. The Company is one of the most important financing entities within the Group. Therefore the Company issued bonds which are fully guaranteed by Deutsche Post AG.

The following picture shows the maturity structure of primary financial liabilities:

Maturity structure – undiscounted cash flows non-derivative financial instruments

31-12-2019

EUR (million)	less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	4 to 5 years	more than 5 years
Bonds *	(15)	(15)	(515)	0	0	0
Loans payable	0	0	0	0	0	0
	(15)	(15)	(515)	0	0	0

* interests are included

31-12-2018

EUR (million)	less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	4 to 5 years	more than 5 years
Bonds *	(15)	(15)	(15)	(515)	0	0
Loans payable	0	0	0	0	0	0
	(15)	(15)	(15)	(515)	0	0

* interests are included

Derivative financial instruments entail both rights and obligations. The contractual agreement defines whether these rights and obligations can be offset against each other, thus leading to a net settlement, or whether both parties to the contract will have to fully fulfil their obligations (gross settlement). The maturity structure of payments under derivative financial instruments is as follows:

Maturity structure – undiscounted cash flows derivative financial instruments

31-12-2019

EUR (million)	less than 1 year	1 to 2 years	2 to 3 years	3 to 4 years	4 to 5 years	more than 5 years
Derivative assets						
Cash inflows	15	15	15	0	0	0
Cash outflows	(5)	(5)	(3)	0	0	0

Cash inflows	15	15	15	15	0	0
Cash outflows	(6)	(5)	(7)	(4)	0	0
Derivative liabilities						
Cash inflows	0	0	0	0	0	0
Cash outflows	0	0	0	0	0	0

Credit risk

In accordance with the impairment model of IFRS 9 “Expected Credit Loss”, financial assets must generally be assessed for an expected credit loss. Expected credit loss (ECL) as defined by IFRS 9 is the probability-weighted estimate of credit losses over the expected life of a financial instrument. Default is the difference between the cash flows due to the Company under the contract and the cash flows expected by the Company. As the expected credit losses take into account the amount and timing of the payments, a credit loss arises even if the Company expects that it will be paid in full but later than the contractual due date.

The ECL is measured at the individual position level, in exceptional cases at the collective portfolio level (grouped exposures based on common credit risk characteristics). IFRS 9 provides a three-stage model, the “general approach”, to determine the credit loss.

According to the three-stage model, debt instruments measured at amortized cost are allocated to stage 1 at initial recognition. The expected loss corresponds to the value that can arise from possible default events within the next twelve months (12-month expected loss) after the balance sheet date. If there has been a significant increase in the counterparty credit risk since initial recognition, the financial asset is transferred from stage 1 to stage 2. Among other things, the default risk is significantly increased if the debtor no longer meets its payment obligations in the short term or if an actual or expected deterioration in the debtor’s business results becomes apparent. The default risk is then measured on the basis of the probability of default (PD) over the entire remaining term (lifetime PD). The impairment corresponds to the value that can arise from possible default events during the remaining term of the financial asset. A transfer from stage 1 to stage 2 must take place at the latest when the contractual payments are more than 30 days overdue. If there is objective evidence that a financial asset is impaired. It must be transferred to stage 3. Which is the case if the payments are more than 90 days past due, it is assumed that the debtor is experiencing significant financial difficulties and that there is objective evidence of a loan default.

In general, the Company only grants intra Group loans. The Company has made assessments of the credit risk of its counterparties on January 1, 2019 and December 31, 2019. Based on these assessments all borrowers have the strong capacity to meet their contractual cash flow obligations in the near term. Therefore all loans were classified as low credit risk loans and the credit loss allowance was limited to the ECL within twelve months after the balance sheet date (stage 1). Furthermore, the management has decided to use a short-cut to calculate the actual ECL, which assumes that the one-year default probability for the loans is that of the lowest investment grade

BBB as published by Standard & Poor's and that no amount would be recovered in the event of a default. The respective calculations resulted in amounts, which were considered to be immaterial by the management, in total EUR 853.129 (2018: EUR 870.608) as shown under note 17.

The cash pool balance receivable measured at amortized cost is subject to the credit risk of the head of the cash pool, which is Deutsche Post AG. The management assesses the default risk as low. Due to the materiality of the risk, no risk provisions were made.

In the financial year, the cash flows of the debt instruments were neither modified nor model changes made to derive risk parameters. As a result, the input parameters were not revalued. Loans and receivables measured at amortized cost were recognized at stage 1 at the balance sheet date. At the balance sheet date, there were no indications of significant deterioration of creditworthiness.

During the year there was no reclassification within the stages.

All derivative assets are concluded with Deutsche Post AG.

(17) Long-term loans receivable from affiliates

Movements during the financial year were as follows:

	2019	2018
	EUR	EUR
Opening balance at 1 January	508.040.682	482.911.290
IFRS 9 first time adoption	n.a.	(877.316)
Opening balance at 1 January after IFRS 9 adoption	n.a.	482.033.974
New loans	51.000.000	30.000.000
Redemptions	(58.100.000)	(4.000.000)
Release of the ECL provision (adjustment at 31 December)	17.479	6.708
Balance at 31 December	500.958.161	508.040.682

Long-term loans receivable at year end amounted to the following balances:

	31-12-2019	31-12-2018
	EUR	EUR
Deutsche Post DHL Group related parties	501.811.290	508.911.290
IFRS 9 expected credit loss	(853.129)	(870.608)
	500.958.161	508.040.682

The maturity of the long-term loans receivable is as follows:

	31-12-2019	31-12-2018
	EUR	EUR
2022	500.958.161	508.040.682

Between June 2012 and December 2019 new loans for an amount totalling EUR 501.811.290 were granted to other Deutsche Post DHL Group related parties. All these loans mature in 2022.

None of the long-term loans receivable have matured or are past due.
None of the long-term loans receivable are impaired.

The nominal interest rates at the balance sheet date were as follows:

	31-12-2019	31-12-2018
EUR	1,16%	1,27%

The carrying amounts without expected credit loss and fair value of the long-term loans receivable at year end were:

Carrying amounts		Fair values	
31-12-2019	31-12-2018	31-12-2019	31-12-2018
EUR	EUR	EUR	EUR
501.811.290	508.911.290	518.207.331	531.067.022

The fair values are based on contractual cash flows discounted using a rate based on the applicable market rate at the end of 2019 of -0,27% (2018: -0,01%).

The carrying amounts without expected credit loss of the Company's long-term loans receivable at year end were denominated in the following currencies:

	31-12-2019	31-12-2018
	EUR	EUR
EUR	501.811.290	508.911.290

The Company has the following fixed rate/floating rate long-term loans (notional amounts):

	31-12-2019	31-12-2018
	EUR	EUR
Floating rate loans	501.811.290	508.911.290

(18) Non-current derivatives

The following table shows the fair value of the derivative applied by the Company:

	31-12-2019	31-12-2018
	EUR	EUR
Interest rate swap (positive value)	32.193.195	37.433.124

The fair value of the interest rate hedging instrument was calculated on the basis of discounted expected future cash flows, using a discounted cash flow model using observable market input.

	31-12-2019	31-12-2018
	EUR	EUR
Interest rate swap (notional amount)	500.000.000	500.000.000

Fair value hedge

An interest rate swap with a volume of EUR 500.000.000 was concluded in 2012 to hedge the fair value risk of the nominal amount of the fixed interest Euro-denominated bond maturing on 27 June 2022. The positive fair value of this fixed to floating interest rate swap amounts to EUR 32.193.195 [2018: EUR 37.433.124].

(19) Short-term receivables from affiliates

Short-term receivables represent interest receivables.

	31-12-2019	31-12-2018
	EUR	EUR
Interest receivable from Deutsche Post DHL Group companies	64.735	71.361

(20) Cash pool receivables

Cash pool receivables represent cash pool balances of Deutsche Post Finance B.V. and are related to the cash pool agreement between the Company and Deutsche Post AG.

	31-12-2019	31-12-2018
	EUR	EUR
Cash pool receivables	17.716.731	9.691.713

(21) Shareholder's equity

Share capital

The authorized share capital of the Company as at 31 December 2019 amounts to EUR 90.000 and consists of 180 ordinary shares each of EUR 500. The issued share capital amounts to EUR 18.500 and consists of 37 ordinary shares with a nominal value of EUR 500 each, which is fully paid.

Capital reserve

On 23 May 2002 the shareholder paid a capital contribution amounting to EUR 2.925.697. On the same date the shareholder approved offsetting the negative retained earnings as at 31 December 2001, amounting to EUR 925.697, against the capital reserve.

Proposal for the appropriation of net result 2019

	31-12-2019
	EUR
Profit for the year	633.915

The Management Board proposes to transfer the profit for the year 2019 to the retained earnings.

(22) Bond – long-term

On 25 June, 2012 the Company issued a EUR 500.000.000, 2,95% bond of 2012/2022 with an issue price of 99,471% (Bond 2022). Bond 2022 is listed at the Luxembourg Stock Exchange.

The bond issued by the Company is fully guaranteed by Deutsche Post AG.
The below two tables show nominal amounts.

Bond	31-12-2019	31-12-2018
	EUR	EUR
Bond 2022	500.000.000	500.000.000

	31-12-2019	31-12-2018
	EUR	EUR
The maturity of the bond as reported at year end is:		
1 – 5 years, nominal value	500.000.000	500.000.000

The carrying amount of the amortized costs of the bond (before the fair value adjustments relating to hedging) is as follows:

Bond	31-12-2019	31-12-2018
	EUR	EUR
Bond 2022	498.708.815	498.219.057

The carrying amount of the bond (after fair value adjustment relating to hedging) is as follows:

Bond	31-12-2019	31-12-2018
	EUR	EUR
Bond 2022	523.668.429	528.590.505

The fair value of the bond is as follows:

Bond	31-12-2019	31-12-2018
	EUR	EUR
Bond 2022	537.900.000	546.100.000

The effective interest rates, taking into account the effect of the interest rate swap is as follows:

Bond	31-12-2019	31-12-2018
Bond 2022	0,9948%	1,0963%

(23) Accrued interest

	31-12-2019	31-12-2018
	EUR	EUR
Accrued interest payable to bondholders	7.536.203	7.556.850
Accrued charges for guarantee provision	255.464	256.164
	7.791.667	7.813.014

The guarantee provision relates to the guarantee issued by Deutsche Post AG (guarantor) in favour of the investors in the 2012/2022 bond issued by the Company (warrantee).

(24) Other current liabilities and accruals

The breakdown of accruals and deferred income is as follows:

	31-12-2019	31-12-2018
	EUR	EUR
Other accruals	19.214	13.764

All balances stated above fall due within 1 year.

(25) Interest income

The interest income arises from settled and unsettled balances with related parties, which the Company shows as receivables. The interest income from affiliated companies can be specified as follows:

	2019	2018
	EUR	EUR
Interest income on loans to Deutsche Post DHL Group companies in Europe	6.311.232	6.338.364
	6.311.232	6.338.364

(26) Interest expenses

Interest expenses due on bonds can be specified as follows:

	2019	2018
	EUR	EUR
Interest expenses (fixed) Bond 2022	(14.729.353)	(14.750.000)
Interest income from interest rate swaps related to Bond 2022	9.942.311	9.932.180
Amortization of the bond discount and issue costs and release of upfront compensation payment (deferred income)	(489.758)	(475.208)
Guarantee fees	(499.300)	(500.000)
	(5.776.100)	(5.793.028)

(27) Other gains and losses

	2019	2018
	EUR	EUR
Losses from fair valuation of interest rate swaps	(5.411.834)	(2.786.604)
Gains from hedge ineffectiveness	186.942	14.361
Credit result IFRS 9	17.479	6.708
Gains from valuation of bonds (interest related)	5.411.834	2.786.604
	204.421	21.069

(28) Other operating expenses

	2019	2018
	EUR	EUR
Legal, consulting and audit fees	(46.146)	(60.700)
Other administrative expenses	(59.492)	(55.190)
	(105.638)	(115.890)

For the independent auditor's fees refer to note 34.

(29) Income tax expense

The Company is part of the fiscal unity formed with Deutsche Post International B.V. and its affiliated companies in the Netherlands. Current and deferred income tax assets and liabilities of the Company have been included and recognized in the accounts of Deutsche Post International B.V. as head of the fiscal unity. Reference is made to note 33.

(30) *Additional disclosure on the financial instruments*

Deutsche Post Finance B.V. classifies financial instruments in relation to the respective balance sheet accounts. The following table reconciles the balance sheet accounts to the categories used by the Company.

Reconciliation of carrying amounts in the balance sheet as at 31 December 2019

31-12-2019			
EUR	Carrying amount	Debt instruments measured at amortized cost	Financial assets at fair value through profit or loss
Assets			
Non-current assets	533.151.356	500.958.161	32.193.195
Long-term loans receivable

If there is an active market for a financial instrument (e.g., stock exchange), the fair value is determined by reference to the market or quoted exchange price at the balance sheet date. If no fair value is available in an active market, the quoted prices in an active market for similar instruments or recognized valuation techniques are used to determine the fair value. The valuation techniques used incorporate the key factors determining the fair value of the financial instruments using validation parameters that are derived from the market conditions as at the balance sheet date. Counterparty risk is analyzed on the basis of the current credit default swaps signed by the counterparties.

The following table presents the classes of financial instruments recognized at fair value and those financial instruments whose fair value is required to be disclosed; the financial instruments are presented by level in the fair value hierarchy to which they are assigned. The simplification option under IFRS 7.29a was exercised for short-term receivables from affiliated companies; cash pool receivables, other receivables, short-term loans payable, accrued interest and other current liabilities and accruals with predominantly short maturities. Their carrying amounts as at the reporting date are approximately equivalent to their fair values.

Financial assets and liabilities: 31-12- 2019

The financial assets and financial liabilities disclosed under this note are carried at amortized cost and the derivatives at fair value. The fair values of the financial assets were determined using the discounted cash flow method. Financial liabilities (debt instruments) are listed on the capital market.

EUR	Level 1	Level 2	Level 3	Total
Non-current assets	0	550.400.526	0	550.400.526
Total assets	0	550.400.526	0	550.400.526

Long-term liabilities	(537.900.000)	0	0	(537.900.000)
Total liabilities	(537.900.000)	0	0	(537.900.000)

Level 1: quoted market prices

Level 2: measurement using key inputs based on observable market data

Level 3: measurement using key inputs not based on observable market data

Financial assets and liabilities: 31-12- 2018

EUR				
	Level 1	Level 2	Level 3	Total
Non-current assets	0	568.500.146	0	568.500.146
Total assets	0	568.500.146	0	568.500.146

EUR				
	Level 1	Level 2	Level 3	Total
Long-term liabilities	(546.100.000)	0	0	(546.100.000)
Total liabilities	(546.100.000)	0	0	(546.100.000)

Level 1: quoted market prices

Level 2: measurement using key inputs based on observable market data

Level 3: measurement using key inputs not based on observable market data

Level 2 includes interest rate and currency derivatives. The fair values of these derivatives are measured on the basis of discounted expected future cash flows, taking into account forward rates for currencies and interest rates. For this purpose, price quotations observable on the market are imported from information platforms customary in the market into the treasury management system.

The price quotations reflect actual transactions involving similar instruments on an active market.

No financial instruments were transferred between levels in financial year 2019 and the previous year.

Financial assets and liabilities are set off on the basis of netting agreements (master netting agreements) only if an enforceable right of set-off exists and settlement on a net basis is intended as at the reporting date. If the right of set-off is not enforceable in a normal course of business and the master netting arrangements creates a conditional right of set-off that can only be enforced by taking legal action, the financial assets and liabilities must be recognized in the balance sheet at their gross amounts as at the reporting date. At the balance sheet date the Company did not net any financial assets and liabilities.

To hedge fair value risks, the Company enters into financial derivative transactions with Deutsche Post AG. There are no netting agreements for these contracts. Therefore all derivatives are recognized at their gross amount in the Financial Statements.

(31) Employees

The Company has no employees. Employees of the Deutsche Post International in Maastricht and the Treasury Center in Bonn perform the administrative activities.

(32) Directors' remuneration

The Management Board of the Company currently consists of two members:

- Mr. Roland W. Buss
- Mr. Timo L.F. van Druten.

The members of the Management Board do not receive any remuneration from the Company.

(33) Commitments and rights not included in the balance sheet

The Company is part of the fiscal unity headed by Deutsche Post International B.V. As a consequence, the Company is liable for all corporate income tax liabilities of the fiscal unity.

The tax position of the Company is accounted for and included in the consolidated tax position of the head of the fiscal unity, Deutsche Post International B.V. In line with Group policy the income tax expenses are not being charged to the Company, but remain with the head of the fiscal unity.

(34) Independent auditor's fees

The following fees for services rendered by the independent auditor of the Company's Financial Statements, PricewaterhouseCoopers Accountants N.V. are relating to the financial year 2019:

	31-12-2019	31-12-2018
	EUR	EUR
Audit of the Financial Statements	44.846	44.400
Other audit services	0	16.300
Tax services	0	0
Non-Audit services	0	0
	<hr/>	<hr/>
	44.846	60.700
	<hr/>	<hr/>

(35) Post balance sheet events

The Debt Issuance Programme will be updated in the first half of the current year.

The COVID-19 outbreak has developed rapidly in 2020, with a significant number of infections. Measures taken by various governments to contain the virus have affected worldwide economic activity. Deutsche Post DHL has taken a number of measures to monitor and prevent the effects of the COVID-19 virus on the health of its employees (like social distancing and working from home) and on the business. At this stage, the impact on the Group's business and results is limited.

Deutsche Post Finance B.V. has a majority of assets in terms of Long-term loans receivable from Deutsche Post DHL Group companies. The company's financial position is based on interest inflow and repayments of loans by these companies. On a longer term, depending on how the COVID-19 evolves, the impact on the business of the Deutsche Post DHL Group companies is more uncertain, and with that it is too early to estimate the impact on the interest inflow and repayments of loans by these companies.

Towards the future, depending on how the COVID-19 crisis evolves, the impact is more uncertain. Deutsche Post DHL Group will continue to follow the various national institutes' policies and advice and in parallel will do its utmost to continue its operations in the best and safest way possible without jeopardizing the health of its people. We also refer to note 2.

Timo L.F. van Druten

3. Other information

In respect of the appropriation of the net income, the following is stipulated in § 14 of the articles of association:

In the general meeting the shareholder shall decide, whether the profit achieved during the fiscal year will be completely or partly distributed, or whether it shall be transferred to the reserves.

1. Distributions can only be made if the equity exceeds the paid-in and called-up part of the capital plus legal reserves.
2. Dividends are distributed within one month after adoption of the annual Financial Statements. The general meeting can decide that the dividend is completely or partly distributed in another form than cash.
3. Either the general meeting or the management can – by taking into consideration the stipulations of § 2 – effect distributions from the profit and/or the reserves.

Independent auditor's report

To: the general meeting of Deutsche Post Finance B.V.

Report on the financial statements 2019

Our opinion

In our opinion, the financial statements of Deutsche Post Finance B.V. ('the Company') give a true and fair view of the financial position of the Company as at 31 December 2019, and of its result and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union (EU-IFRS) and with Part 9 of Book 2 of the Dutch Civil Code.

What we have audited

We have audited the accompanying financial statements 2019 of Deutsche Post Finance B.V., Maastricht.

The financial statements comprise:

- the balance sheet as at 31 December 2019;
- the following statements for 2019: the statement of comprehensive income, statement of changes in equity and the cash flow statement; and
- the notes, comprising the significant accounting policies and other explanatory information.

The financial reporting framework applied in the preparation of the financial statements is EU-IFRS and the relevant provisions of Part 9 of Book 2 of the Dutch Civil Code.

The basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. We have further described our responsibilities under those standards in the section 'Our responsibilities for the audit of the financial statements' of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of Deutsche Post Finance B.V. in accordance with the European Union Regulation on specific requirements regarding statutory audit of public-interest entities, the 'Wet toezicht accountantsorganisaties' (Wta, Audit firms supervision act), the 'Verordening inzake de onafhankelijkheid van accountants bij assuranceopdrachten' (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence requirements in the Netherlands. Furthermore, we have complied with the 'Verordening gedrags- en beroepsregels accountants' (VGBA, Dutch Code of Ethics).

Our audit approach

Overview and context

Deutsche Post Finance B.V. main activity is the financing of group companies, through bond offerings on the international capital markets. The repayment of the bonds to the investors is guaranteed by Deutsche Post AG as disclosed in note 22 to the financial statements. The company has financial instruments in place to mitigate interest rate risk. We paid specific attention to the areas of focus driven by the operations of the Company, as set out below.

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we considered where the management board made important judgements, for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. In note 5 of the financial statements the Company describes the areas of judgement in applying accounting policies and the key sources of estimation uncertainty. Given the significant estimation uncertainty and the related higher inherent risks of material misstatement in the valuation and existence of issued loans and derivative valuation, we considered these matters as key audit matters as set out in the section 'Key audit matters' of this report. Furthermore, we identified hedge accounting as key audit matter because of the detailed formal and technical requirements that are relevant to the application of hedge accounting and because inappropriate application of these requirements can lead to a material effect on the financial statements.

As in all of our audits, we also addressed the risk of management override of controls, including evaluating whether there was evidence of bias by the management board that may represent a risk of material misstatement due to fraud.

We ensured that the audit team included the appropriate skills and competences which are needed for the audit of a financing company. We therefore included specialists in the areas of valuation and accounting in our team.

The outline of our audit approach was as follows:

Materiality

- Overall materiality: €5,000,000.

Audit scope

- We conducted audit work for Deutsche Post Finance B.V. and no other locations since this is a standalone Company.

Key audit matters

- Valuation and existence of the loans issued
- Derivative valuation
- Hedge accounting

Materiality

The scope of our audit is influenced by the application of materiality, which is further explained in the section 'Our responsibilities for the audit of the financial statements'.

Based on our professional judgement we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and to evaluate the effect of identified misstatements, both individually and in aggregate, on the financial statements as a whole and on our opinion.

Overall materiality	€5,000,000 (2018: €5,000,000).
Basis for determining materiality	We used our professional judgement to determine overall materiality. As a basis for our judgement we used 1% of total assets.
Rationale for benchmark applied	We used total assets as the primary benchmark, a generally accepted auditing practice, based on our analysis of the information needs of the common stakeholders, of which we believe the shareholders and bondholders are the most important ones. On this basis, we believe that total assets is an important metric for the financial performance of the Company.

We also take misstatements and/or possible misstatements into account that, in our judgement, are material for qualitative reasons.

We agreed with the management board that we would report to them misstatements identified during our audit above €250,000 (2018: €250,000) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the financial statements. We have communicated the key audit matters to the management board. The key audit matters are not a comprehensive reflection of all matters identified by our audit and that we discussed. In this section, we described the key audit matters and included a summary of the audit procedures we performed on those matters.

We addressed the key audit matters in the context of our audit of the financial statements as a whole, and in forming our opinion thereon. We do not provide separate opinions on these matters or on specific elements of the financial statements. Any comments or observations we made on the results of our procedures should be read in this context.

Key audit matter	Our audit work and observations
<p>Valuation and existence of the loans issued</p> <p><i>Notes 9 and 17</i></p> <p>We consider the valuation and existence of the loans issued, as disclosed in notes 9 and 17 to the financial statements for a total amount of €500,958,161, to be a key audit matter. This is due to the size of the loan portfolio in combination with the fact that the management board's assessment of objective evidence of impairment is very important and judgmental. As a result, any impairment may have a material effect on the financial statements.</p> <p>The basis for determining any expected credit loss pursuing to IFRS 9 is the classification and measurement of financial instruments. The Company has performed an assessment to conclude whether the cash flows from financial instruments fulfil the requirements of the SPPI test (solely of payment of principal and interest). The management board has determined that all loans issued are categorised as stage 1 loans, hence only a 12-month expected credit loss ('ECL') has been recognised.</p>	<p>We performed the following procedures to test the existence of the loans issued to the Deutsche Post DHL group companies and to test the management board's assessment of the expected credit loss to support the valuation of the loans:</p> <ul style="list-style-type: none"> • We evaluated the financial situation of the Deutsche Post DHL group companies to which loans have been provided by analysing their respective current financial data (such as result and equity) and their ability to repay the notional and interest payments to the company. • We evaluated the financial position of the Deutsche Post DHL group companies by verifying observable data from rating agencies, developments in credit spreads and other publicly available data. • We analysed if there were any loss events at an individual loan level by challenging the valuation assessments prepared by the management board, which we did by analysing the financial situation of the group companies to which loans have been provided. • We compared our own estimates of the fair values of the loans issued with those made by management. • We performed intercompany reconciliation procedures with the counterparties of the loans. <p>• For the expected credit loss, we assessed, with</p>

assistance of our specialists that the impairment methodology and model applied by the company were in accordance with the requirements of IFRS 9.

- We recalculated the expected credit loss and reconciled input parameters used to external sources.
- We assessed, with assistance of our specialists, that the model used by the client as part of the impairment methodology was appropriate considering the characteristics of the loan portfolio of Deutsche Post Finance B.V.
- We verified that the required disclosures in the financial statements with respect to IFRS 9 are sufficient and in line with the applicable requirements.

We found the management board's assessment to be sufficiently rigorous. Our procedures as set out above did not indicate material differences.

Derivative valuation

Note 13

We consider the fair value of the derivative portfolio of €32,193,195 as disclosed in note 13 to the financial statements and used in the company's hedge effectiveness testing to be a key audit matter. This is due to the nature of the portfolio that includes a longer-dated interest rate swap. The market for these swaps is not always fully liquid and therefore valuation is a complex area.

We performed the following procedures to support the valuation of derivatives:

- We tested the valuation of derivatives as well as the valuation of hedged items in hedge accounting relationships by comparing our own estimates of the values of the derivative with those made by management for the derivative.
- We also tested the mathematical accuracy of the models used and reconciled the outcome of the valuation system with the general ledger.

We found the management board's assumptions used in the valuation of the derivative to be reasonable compared to market data and the chosen models to be in line with market practice. Based on the procedures as set out above, we found no material differences.

Hedge accounting

Note 13

We consider the application of hedge accounting to be a key audit matter. Refer to note 13 to the financial statements. This is because of the detailed formal and

We performed the following procedures to assess the appropriateness of the application of hedge accounting:

- We tested in full whether the hedge

technical requirements that are relevant to the application of hedge accounting and because inappropriate application of these requirements can lead to a material effect on the financial statements.

documentation and hedge effectiveness testing as prepared by the management board met the requirements of IAS 39 *Financial Instruments*, and whether the hedge effectiveness test was mathematically correct.

- We reconciled the outcome of the effectiveness testing for the derivative portfolio as a whole to the financial statements.

Based on the procedures as set out above we found the application of hedge accounting to be appropriate.

Emphasis of Matter related to the uncertainty related to the effects of the COVID-19 virus

We draw attention to note 2 in the financial statements in which management has described the possible impact and consequences of the COVID-19 (Corona) virus on the company and the environment in which the company operates as well as the measures taken and planned to deal with these events or circumstances. This note also indicates that uncertainties remain and that currently it is not reasonably possible to estimate the future impact. Our opinion is not modified in respect of this matter.

Report on the other information included in the annual report

In addition to the financial statements and our auditor's report thereon, the annual report contains other information that consists of:

- the management report;
- the other information pursuant to Part 9 of Book 2 of the Dutch Civil Code.

Based on the procedures performed as set out below, we conclude that the other information:

- is consistent with the financial statements and does not contain material misstatements;
- contains the information that is required by Part 9 of Book 2 of the Dutch Civil Code.

We have read the other information. Based on our knowledge and understanding obtained in our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements.

By performing our procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of such procedures was substantially less than the scope of those performed in our audit of the financial statements.

The management board is responsible for the preparation of the other information, including the management report and the other information in accordance with Part 9 of Book 2 of the Dutch Civil Code.

Report on other legal and regulatory requirements

Our appointment

We were appointed as auditors of Deutsche Post Finance B.V. following the passing of a resolution by the shareholders at the annual meeting held on 15 May 2019. Our appointment has been renewed annually by shareholders representing a total period of uninterrupted engagement appointment of seventeen years.

No prohibited non-audit services

To the best of our knowledge and belief, we have not provided prohibited non-audit services as referred to in Article 5(1) of the European Regulation on specific requirements regarding statutory audit of public-interest entities.

Services rendered

The services, in addition to the audit, that we have provided to the Company, for the period to which our statutory audit relates, are disclosed in note 34 to the financial statements.

Responsibilities for the financial statements and the audit

Responsibilities of the management board

The management board is responsible for:

- the preparation and fair presentation of the financial statements in accordance with EU-IFRS and with Part 9 of Book 2 of the Dutch Civil Code; and for
- such internal control as the management board determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, the management board is responsible for assessing the Company's ability to continue as a going concern. Based on the financial reporting frameworks mentioned, the management board should prepare the financial statements using the going-concern basis of accounting unless the management board either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. The management board should disclose events and circumstances that may cast significant doubt on the Company's ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our responsibility is to plan and perform an audit engagement in a manner that allows us to obtain sufficient and appropriate audit evidence to provide a basis for our opinion. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high but not absolute level of assurance, which makes it possible that we may not detect all material misstatements. Misstatements may arise due to fraud or error.

They are considered to be material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

A more detailed description of our responsibilities is set out in the appendix to our report.

Eindhoven, 21 April 2020
PricewaterhouseCoopers Accountants N.V.

Original has been signed by A.J.M. Vercammen RA

Appendix to our auditor's report on the financial statements 2019 of Deutsche Post Finance B.V.

~~In addition to what is included in our auditor's report, we have further set out in this appendix our responsibilities for the audit of the financial statements and explained what an audit involves.~~

The auditor's responsibilities for the audit of the financial statements

We have exercised professional judgement and have maintained professional scepticism throughout the audit in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit consisted, among other things of the following:

- Identifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the intentional override of internal control.
- Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management board.
- Concluding on the appropriateness of the management board's use of the going-concern basis of accounting, and based on the audit evidence obtained, concluding whether a material uncertainty exists related to events and/or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report and are made in the context of our opinion on the financial statements as a whole. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures, and evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the management board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. In this respect, we also issue an additional report to the audit committee in accordance with Article 11 of the EU Regulation on specific requirements regarding statutory audit of public-interest entities. The information included in this additional report is consistent with our audit opinion in this auditor's report.

We provide the management board with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the management board, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, not communicating the matter is in the public interest.
